

Honourable Jone Usamate

**Minister for Infrastructure, Transport, Disaster Management and  
Meteorological Services**

---

**AUGUST 2019**

**RESPONSE TO WRITTEN QUESTION**

**ENERGY FIJI LIMITED (EFL)**

---

**180/2019 Can the Minister inform Parliament on the Hydro-Power Plans for the Nation?**

There are two major Hydro Power Schemes that are being considered for development by EFL in Viti Levu. They are:

**1. Qaliwana Upper Wailoa Diversion and Lower Ba Scheme**

Feasibility studies are currently underway for the technical and commercial viability of Hydro Power Development for the Qaliwana Upper Wailoa Diversion Project (44MW).

**2. Namosi Hydro Scheme**

This project is located in Viti Levu with a capacity of 32MW. This scheme is divided into 3 schemes based on the design considerations to maximize output.

a) Wainikoroiluva – 15MW,

b) Wainikovu – 12MW

c) Waivaka – 5MW

The combined energy output from this scheme is 102 Gigawatt hour (GWh) per annum.
