Written Response

STANDING COMMITTEE ON NATURAL RESOURCES

WATER AUTHORITY OF FIJI (WAF) 2016 ANNUAL REPORT DELIBERATION

HON.MEMBERS QUESTIONS TO WATER AUTHORITY OF FIJI (WAF)

- With an increase budget of 12.4 million for 2020 -2021 operational year compared to 2019 -2020 budget. What plans have WAF considered to undertake to fulfill its responsibilities and functions?

With the increase of 12.4 million for 2020-2021 Financial year, WAF plans to complete the projects which were put on hold due to COVID-19 budget cut. These plans include completing the Water Treatment Package plants in Nabouwalu, Savusavu, Levuka, Waiwai & Deuba, Tasman Tanks and Namau & Balevuto. Major urban projects consists of Lal Singh to Rewa Bridge, Qarawalu, Naiselesele borehole development and Nagado to Nadele pipeline construction.

Below is the summary of the budget allocation for 2020/2021 FY:

Programme	2020-2021 Budget
Water Sources and Water Treatment Plants	\$ 24,475,719.33
Water Distribution System Project	\$ 4,818,000.00
Integrated Meter Management (Meter Replacement)	\$ 1,480,000.00
Non Revenue Water Reduction Project	\$ 2,560,000.00
Water Catchment Management Programme	\$ 900,000.00
Wastewater Treatment Plant	\$ 7,259,485.32
Improvement and Upgrade of Wastewater Distribution System	\$ 4,535,982.85
Rural Water Supply Programme	\$ 6,352,121.53
Relocation of Existing Water and Wastewater Pipeline - FRA Road Works	\$ 1,000,000.00
Emergency Response Contingency	\$ 1,700,000.00
Electrical Upgrading Project	\$ 7,063,682.65
ICT Infrastructure Upgrades	\$ 950,000.00
Rainwater Harvesting Systems – Government to Reimburse 70% for Residential Households	\$ 500,000.00
Purchase of Office Equipment	\$ 150,000.00
WAF Facilities Upgrade	\$ 500,000.00
Rural Water Carting to Non Metered Areas	\$ 3,500,000.00
Land Acquisition	\$ 1,378,000.00
Local Funding - Feasibility Study and Preliminary Engineering Design for Savusavu Water Supply and Sewerage System Project	\$ 300,000.00
EIB Direct Payments - Urban Water Supply and Wastewater Management Project	\$ 6,899,919.00
Local Funding - Urban Water Supply and Wastewater Management Project	\$ 24,144,458.00
GCF Grant - Urban Water Supply and Wastewater Management Project	\$ 9,199,892.00
Direct Payments - Urban Water Supply and Wastewater Management Project - ADB	\$ 10,587,806.00
Total WAF	\$ 120,255,066.68

2. SDG Goal **3.1.1 Water and Sanitation** - Clean and safe water in adequate quantities and proper and adequate sanitation for every Fijian household. How is the Authority committing to the Policies and Strategies as underlined under the 5 year - 20 year National Development Plan? How has the rural communities benefit from the above?

Is the Authority able to meet the NDP target of 100% access to clean and safe water in urban areas by 2021 and for rural and maritime areas by 2030?

The Water Authority of Fiji is working with the Department of Water and Sewerage (DWS) to monitor and formulate policies for the provision of sustainable water and wastewater services. This includes the formulation and implementation of a National Water Resources Management and Sanitation Policy to govern the planning and the development of water resources while reviewing some of the existing policies and legislative processes and developing codes of practice on the provision of water and sanitation services to improve the overall standards of service delivery.

This exercise also ensures the engagement of relevant stakeholders and community awareness on water conservation practices and protection of traditional water sources. WAF continues to work with DWS on the establishment of a National Water Statistics database while managing the following initiatives; Water Conservation Programme; National Liquid Trade Waste Policy; Rural Water and Sanitation Policy and the Rural Water Supply Management Guideline.

In the rural areas where treated water cannot be supplied due to geographical remoteness and access, Ecological Purification Systems (EPS) are being installed that have benefitted over 26,000 Fijians.

The Authority will not be able to meet the NDP target of 100% access to clean and safe water in urban areas by 2021, but after the completion of USD 222 million Urban Water Supply and Wastewater Management Project in 2025, WAF will be able to meet its NDP target of 100% access to clean and safe water in urban areas by 2021 and for rural and maritime areas by 2030.

3. Sustainable Development Goal (SDG) 5 empowers women and girls “Gender Equality” – how is the Authority committing to SDG 5 in terms of all its operations? Please provide a brief summary of the ratio of women in the workforce.

WAF has a draft Gender Equality Policy in place to promote gender mainstreaming as a tool to redress inequality within the water and wastewater sector.

Currently, WAF female numbers is approximately 12% of the total fulltime equivalent staff and is moving towards securing more qualified female civil engineers.

In year 2016, there were a total of 1168 staff employed at WAF and 148 were female. Women workforce at WAF was 0.12% and there was one female engineer.

4. Page 2 of the Annual Report states the 2016 Highlights:

4.1 Highlight No.3 – Please provide an update on the rehabilitation works post TC Winston and also a brief on the suspended programs and projects for 2016.

Following TC Winston, WAF allocated \$8.5 million for the restoration programme, which included:

- a.) Clearing and reinstatement of damaged roads to the water intakes, with proper drainage and graveling works for major raw water intakes in the region;
- b.) Gabion installation works along the collapsed section of access roads to dams;
- c.) Cleaning of blocked culvert crossing along the access roads to raw water intakes, and
- d.) Rehabilitation works on Varaqe raw water trunk mains, the clearing of blocked access roads to water dams, and cut in works for temporary pump stations after Cyclone Winston.

The previous decision by the WAF Board and Executive Management to invest 4 million in standby generators meant that water could still be supplied despite ongoing power outages. Without this foresight, some 300,000 people would have been without water, in addition to those whose supply was affected by the cyclone.

4.2 Highlight No: 7 – Please enlighten the committee on the funding from the Green Climate Fund?

Under the Urban Water Supply and Wastewater Management Project, GCF is providing a grant of USD 31.04 million, ADB is providing loan of USD 67.7 million, EIB is providing loan of USD 38 million and Fiji Government contribution is USD 85.26 million.

GCF Grant is contributing to 14% of the total share of the USD222 million project and it's mainly used for the Water Supply component for Rewa Water Treatment Plant = USD 26.99 million and contingencies = USD 4.05 million.

The project will increase access to reliable and safe water supply in the Greater Suva Area (GSA) through: (i) increasing production by 30,000 m³ per day by designing and constructing a new water supply source in the Rewa river, with a water treatment plant, pumping station and reservoir to serve the GSA water supply system; and (ii) reducing nonrevenue water due to technical losses and non-technical losses by replacing meters; improving leak detection and repairs; establishing district metering and demand management areas and pressure management systems. This will address the existing shortfall in bulk water supply and water treatment during peak dry weather periods, therefore improving water supply reliability and continuity across the GSA water supply system; and provide additional bulk water supply and water treatment capacity to allow the servicing of areas not currently supplied by the system as well as to service future growth in GSA.

The new raw water intake at the Rewa River will result in a more resilient water supply system by reducing the risk posed by dependency solely on the Waimanu River system, as is the case currently. While the water sources are still all reliant on surface water based systems, the Rewa River is a much larger river system and any impact on stream flows associated with future climate change impacts are not likely to impact extractions for urban water supply.

In addition, the new location of the new intake takes into account new insights concerning the impact of climate change on sea water levels and decreased river flows during extended drought periods and provides as such additional security against salinity impacts that are likely caused by climate change in the near future.

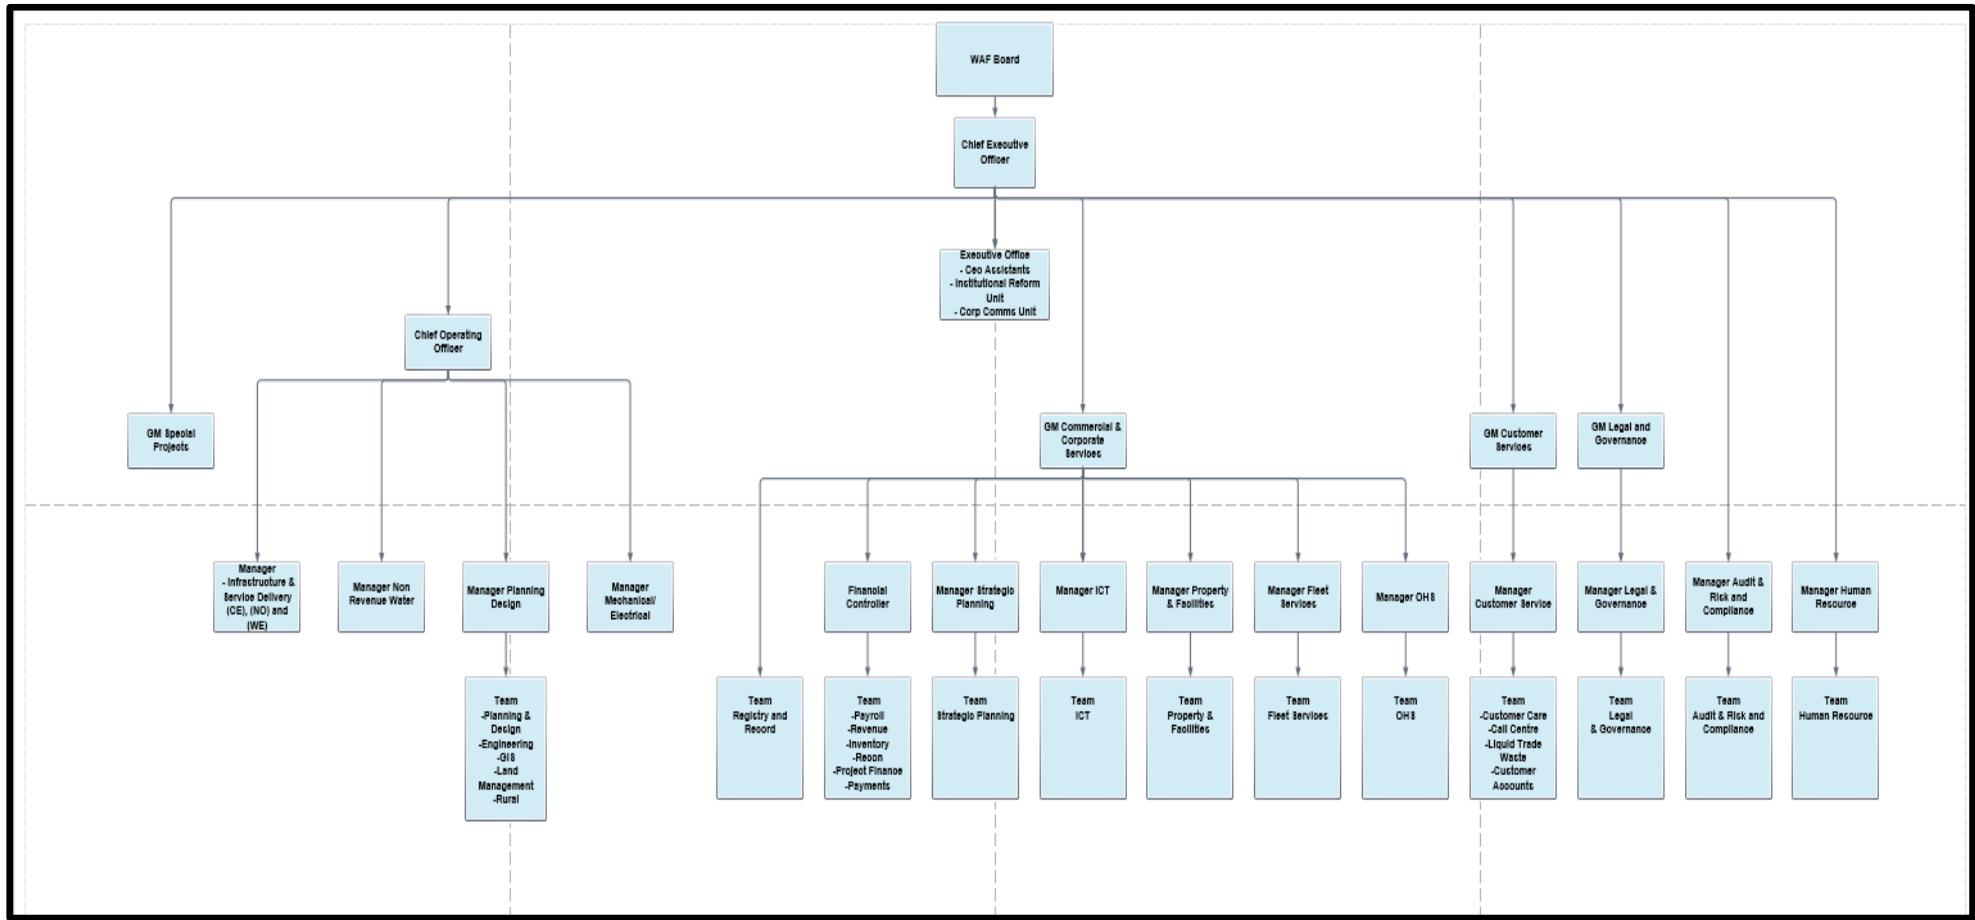

4.3 Highlight No: 8 – Could WAF update the committee on the introduction of the Water Champion?

Water Champion program was introduced to promote water conservation awareness in communities, homes and schools. WAF ran the Water Champions Programme during the school holidays with secondary school students. The objective of the programme was to create awareness to school children of how water sourced, treated and distributed to customers through site visits and presentations by respective staff members. This program provided an opportunity for students to explore career options prior to undertaking the final year of study at school. This program was only for Central division.

5. Page 4 - Organisational Structure – What changes have taken place in the organization structure since 2016 and to date?

Mid-2018, WAF's Management Committee undertook the leadership role to steward the organization with guidance from the WAF Board.

On 20 December 2019, Mr Barry Omundson officially joined Water Authority of Fiji as the new Chief Executive Officer. Mr Omundson is supported by its relevant Strategic Business Unit's General Managers.

6. Page 5 – Rewa River Water Supply Scheme – What is the progress of the scheme?

Rewa River Water Supply Scheme- DBO Contract

- Commencement of the 6 Months design period for DBO contract started on 1st of April 2019.
- 96% of the detailed design completed and Detail design report has been approved by ER.
- Construction of the Waitolu Reservoir (which is part of DBO) has commenced as the contractor has mobilised fully on site with piling works which is 100% complete, Retaining wall construction completed and flowmeter chamber under construction.
- Site clearance of WTP site has commenced with top soil removal together with raw water intake site and Rising Main Section.
- 11 lengths (129 m) of pipes already laid for rising mains.
- Batching plant construction completed. Cofferdam construction completed.

Rewa River Water Supply Scheme - Gravity Mains Contract

- First batch of pipe has arrived on 6th of March which is stored at the stock pile area provided by WAF. Approximately 6km pipes are stored at the stockpile area.
- Welders locally sourced and engaged for welding works on pipes.
- 14 lengths (152m) of pipe have already been laid.

7. Page 5 – What future plans does WAF have in place in terms of implementing CDM?

WAF, through its CDM Project has already claimed \$350,000.00 for its carbon credits through ADB. Currently, WAF is verifying its certified emission reduction (CER) and come July 2021, will be approaching other donors in expanding CDM to generate electricity and earn more credits through reduction and electricity generation. This will not only lead to reduction of emissions, it will also aid in reducing the current electricity bills to more than 50% of the current billing costs of the Kinoya Sewerage Treatment plant.

8. Page 9 – “for quick - fix” solutions – Could WAF elaborate more on this terminology? How does this relate to the overall operations of WAF?

The term ‘quick-fix’ refers to temporary measures that were taken place to provide interim solution before rehabilitation began for village not receiving water. This included water carting services to affected villages.

9. Page 10 – Western Region- Lautoka Water Supply – Buabua reservoir – what is the Authority’s plan for the supply of clean water to the Buabua settlement in Lautoka.

WAF has plan to have separate water scheme for Buabua settlement since it is located above the Buabua reservoir.

10. Page 11 – Capital Works – have the Authority able to achieve all its plans on all capital works for 2016? Please explain?

In 2016, WAF planned 71 capital works which included 26 in Central, 35 in Western of which 3 are on-going and 8 in Northern.

In central division, 17 projects were completed while 9 were shelved due to design issues. In western region, 29 projects were completed 6 were shelved due to design issues. In northern division, all 8 project were completed.

11. Page 11 – Successful Project Completion – please elaborate more on the successful projects for 2016 and identify the successful ones?

Listed below are the list of Water projects that were successfully completed in 2016:

Region	Project Name	Status
Central	Kalabu/Qaravivalu Rd Junction to Kings Road.	complete
Central	Kikau Street	complete
Central	Sese Street	complete
Central	Vuninokonoko No# 2 Mains Upgrading (Navua)	complete
Central	Vuci Village, Tokatoka, Tailevu Mains Upgrading	complete
Central	Ratu Kadavulevu Mains Upgrading	complete
Central	Vuniniudrovu Mains Upgrading	complete
Central	Khalsa 100mm Mains Upgrading	complete
Central	Coloisuva 100mm Mains Extension (Crest Chicken)	complete
Central	Sunken Meter House to BSP 375mm Replacement	complete
Central	Neelgiri Hill Mains Extension	complete
Central	Navuso Top Mains Extension	complete
Central	Bilo Mains Extension	complete
Central	River Drive Sewer Extension	complete
Central	Waila - Duilomaloma and Lal Singh 375 Duplication	complete
Central	Savutalele	complete
Central	Nabukalou Trunk Works	complete
Northern	Lajonia 3" A/C replacement	complete
Northern	Y- Corner 12" A/C replacement	complete
Northern	Nasekula Village 3" A/C replacement	complete
Northern	Siberia A/C replacement	complete
Northern	Mani Road A/C replacement	complete
Northern	Upper Sarosaro Lane sewer mains replacement	complete
Northern	Lower Sarosaro Lane sewer mains replacement	complete
Northern	Hospital Rising Main sewer mains replacement	complete
Western	Kennedy Avenue	complete
Western	Votualevu Voivoi Area	complete
Western	Nasoso Area	complete
Western	Nasau #2 and Taburua	complete
Western	Lovu Seaside	complete
Western	Tagitagi Reservoir Inlet	complete

Western	Clopcott Main Extension (Ba)	complete
Western	Nalovo No# 3 Mains Extension	complete
Western	Naria Seaside Mains Extension	complete
Western	Nadroumai Mains Extension	complete
Western	Vatusui Mains Extension (Balevuto)	complete
Western	Arolevu Mains Extension	complete
Western	Delaivula Mains Extension - Uni of Fiji Settlement Lautoka	complete
Western	Natawarau Water Supply System Upgrading	complete
Western	Nawaicoba 300mm Pipe Laying - Reservoir Outlet	complete
Western	150mm Mains Upgrading at Denarau South	complete
Western	Nawamangi Mains Extension	complete
Western	Natabua Prison	complete
Western	Sovelau (Carreras Tabacco Farm)	complete
Western	Balevuto BPT + Feeder Rds	complete
Western	Naseyani Mains Extension Project	complete
Western	Naria Hillside	complete
Western	Vatiaka	complete
Western	Navau Top	complete
Western	Benai	complete
Western	Tagitagi	complete
Western	Dobuilevu Government Station water reticulation / Savusavu & Lau Settlement Water Supply	complete
Western	Wainivoce Water Project (CWD)	complete
Western	Lautoka Rural Water Project (CWD)	complete

12. Page 12 – Please explain more on the non-revenue water scheme?

By definition, non-revenue water (NRW) is water that has been produced and is “lost” through the network, before it reaches the customer. Losses can be real losses (through leaks, sometimes also referred to as physical losses) or apparent losses, otherwise also known as commercial losses (for example through theft or metering inaccuracies).

NRW is a key indicator for operational efficiencies for water utilities around the world and for WAF, in 2012/2013, the NRW unit was established with increased support to focus on addressing NRW. A generally good indicator for NRW as a percentage of water produced is 15% or lower in case of developed countries water utilities. WAF national average NRW for WAF systems currently estimated at 47%, and for WAF the long term target is to reach 30% by 2025.

13. Page 13 – Rural and Maritime – Can the Authority provide statistics by village and settlements of free water tanks assistance as well as the Rainwater Harvesting Program provided in the maritime area?

Details provided in the excel listing.

13.1 Could the Authority also advise on the outstanding applications?

WAF has received a total number of 24,890 applications of which 19,634 has been inspected and 16,328 has been approved for distribution. 11,743 applicants have received rainwater harvesting tanks and 4,585 applications are pending distribution.

14. Page 15 – Free Water Allowance – Please could WAF explain on the figures provided in the table

The table outlines the number of application received for free water tanks per region.

- A. In Central, total applications received were 10,438 of which 10,049 have received free water tank and 389 applications were under process. Budget for Central division was \$141,449.72
- B. In Western, total applications received were 12,690 of which 12,400 have received free water tank and 290 applications were under process. Budget for Central division was \$174,542.40
- C. In Northern, total applications received were 3,390 of which 3,358 have received free water tank and 32 applications were under process. Budget for Central division was \$47,267.21

15. Page 16 - Waste Water – the 2016 WAF Annual Report states waste water treatment plant being overloaded. What remedial action has the Authority undertaken to minimize this problem? Desludging for overloaded plants namely Kinoya and Natabua was the remedial action undertaken by the authority. WAF is currently in the process of upgrading the wastewater treatment plants. Once the upgrading is completed, the plants should be able to handle the hydraulic loading.

16. Page 16 – Wastewater Odour and Sludge Control Project – Could the Authority clarify the process of awarding the contracts?

Wastewater Odour and Sludge control project followed the proper tender process. WAF followed its tender process to award the contracts. Tender Terms and Conditions were advertised (tender No: WAF 14/12/20/PMU/DOTP) on 19 December 2014.

17. Page 17 – Liquid Trade Waste (LTW) – What is the trend today? Has the non – Compliant businesses percentage been reduced?

Current compliance for non-compliant business is 57.5% for industrial customers only whereas commercial customers are monitored on their grease trap requirements which is 23%.

18. Page 19 – SCADA Operations – Please provide an update on any new sites implemented with the SCADA project as of to date.

- 19. Page 21 – Partnerships** – please brief the committee on the twinning arrangements with New Zealand and whether they still being implemented till to date? What was the impact of the above twinning arrangements?

Following the signing of the partnership agreement with NZ's Ministry of Foreign Affairs and Trade and Water Authority of Fiji on 5 May 2015, NZ Government approved total of \$835,602.00 funding for the water and wastewater services training to support the Water Authority of Fiji's capacity building programme.

Part of the funding was directed for WAF delegation to visit NZ targeting the staff responsible for training and expose them to how Opus conducts courses. The tour was initially funded for 3 officials. Further negotiations by WAF with support from NZ's Ministry of Foreign Affairs and Trade made it possible for six (6) officers of WAF from six (6) different areas to partake into the 1st phase of the programme under the Pacific TA programme funded by MFAT, NZ.

The purpose of the 'Study Tour' was to provide learning objectives that supports development of plans directly linked to the achievement of WAF's 7 strategic objectives which covered 5 themed areas of interest as summarised below:

- Enterprise Risk Management providing a risk portfolio and a monitoring program for WAF in managing the risks
- Non-Revenue Water (NRW) with planning to reduce NRW to 20%. Includes planning and analysis, meter programs, leak detection and water modelling.
- Asset Management Plans particularly around maintenance, repairs or renewal of reticulation and treatment systems.
- Supervisory Control and Data Acquisition automation – to capture and use data required for optimisation for the National Control Centre
- Coordinate the proposed training programs and get more understanding of how Pacific TA Programme works and to negotiate Twinning Arrangement with WaterCare Services Limited.

Due to COVID-19, this twinning arrangement is on hold.

The twinning programme has been an eye opener for WAF into areas listed above and built capacity for WAF staff.

20. Page 21 – KECO – WAF to explain the results and outcome of the KECO Research Agreement
KECO results showed that it was possible to convert the FPG into Bio-electricity and sell if to FEA grid which was sufficient to run Kinoya Wastewater Treatment Plant in 2016. KECO was not provided any further grants to implement the project.

21. Page 23 – what approach had the Authority implemented to be able to recover outstanding water bills /debts on government quarters? How successful is the approach?

Current Debt management strategies to reduce accounts receivable include:

- Making payment arrangement with customers facing financial difficulties.
- Account Officers assigned to respective high value commercial customers
- Call targets to all recovery staff and actuals reviewed.

- Assigning of Weekly and Monthly collection targets by region. Daily results communicated.
- Monthly and quarterly debt management and oversight meetings with all regions.
- E-Billing Registration for Domestic Customers.
- Rollout of my bill info cards to enable customers to pay at all bill pay outlets
- Legal Referrals are made for customers with disputed accounts.
- Way forward waiver for pensioners and social welfare recipients.
- Implementation of revised payment plan.
- Awareness on accumulated debt for customers.

22. Page 33 – Please update the committee on the fraud cases for plant hire in 2016 and what actions have the Authority taken for future improvement.

The authority has implemented strict rotation on plant hire contractors to ensure no favouritism is practised. The selection of plant hire contractors is done via an automated software system. Plant hire hours are strictly monitored and reconciled before payments are done. The authority has reduced its plant hire needs by looking into option of vehicle pooling and outsourcing projects 100% completely.

23. What was the result of the FICAC Investigation on the fraud in Plant Hire?

Water Authority of Fiji Cases

S/N	FEP No.	Brief of Complaint	Status
1	65/16	Allegations against the Land Compensation Officer of Water Authority of Fiji namely Laisasia Valesu and Vilimaina Kalokalo for abuse of office and obtaining financial advantage in the sum of \$ 334,496.18	Convicted and sentenced to 6 years imprisonment
2	58/15	Allegation against One Nunia Rasolo (Public Officer) working as a Cashier at WAF Office in Nadi. It is alleged that she manipulated WAF computer operating system and manual receipts and stole a sum of \$23,500.00	Case is pending in Court
3	95/18	Referral from Water Authority of Fiji on various allegations regarding the procurement of materials and spares and the special review of plant hire as highlighted in the KPMG audit report	Mohammed Shahfaraaz is the Accused and case is pending in Court
4	158/18	Complaint against one Fred Fuakilau of WAF for receiving a Bribe of \$1300.00 from Pulotu King and Director for Sphynx in the period of 2015-2016.	Case is pending in Court
5	159/18	Complaint against one Tuimasi Cataki of WAF for receiving a Bribe of \$500.00from Pulotu King and Director for Sphynx in 2017.	Accused was sentenced to 7 months imprisonment
6	160/18	Complaint against Jeremai Baba of WAF for allegation of Abuse of Office in the year 2017 as highlighted in the KPMG report	<ul style="list-style-type: none"> • There is no criminal intent of the case, and also there was no loss incurred to WAF. • Recommending for Closure. • Compiling file for Submission.
7	133/19	Allegations of fraud against companies namely G Sanyasi Industrial and Ayaans Civil & Electrical Hardware regarding the supply of suspended brand products to Water Authority of Fiji	<ul style="list-style-type: none"> • There is no criminal intent of the case, and also there was no loss incurred to WAF. • Recommending for Closure.

- 24. Page 37 – Accumulated Losses** – an increase of \$22m in 2016, why was there an increase in the accumulated losses?

Increase in accumulated losses is mainly due to the loss incurred for financial year 2016. The authority had a profit before operations of \$38.6m however when taking into consideration the depreciation cost (\$59.42m) which is a non-cash expense – the authority made a loss.

- 25. Page 22 – Customer Service** - could the Authority clarify more on the figures provided in the table. Total complaints resolved was 27,078 and 8,560 were closed.

27,078 refers to the number of complaints that were received and has been resolved whereas 8,560 refers to the number of customers who were called to receive feedback on the complaints lodged.

- 26.** While we thank the Chairman's reassurance to the Minister for Economy with regards to 2017 and 2018 accounts; under good governance and as commercial statutory authority formed by government, how is WAF planning to improve its accountability to the annual budgetary allocations with the timely submissions of its annual reports?

Annual reports are generated based on Auditor General's financial reports. To improve the reporting, WAF has already started compiling its 2017, 2018-2019 and 2019-2020 Annual reports and will await for final Auditor General's financial reports.

Appendix 2

Supplementary

Response

STANDING COMMITTEE ON NATURAL RESOURCES

WATER AUTHORITY OF FIJI (WAF) 2016 ANNUAL REPORT DELIBERATION

SUPPLEMENTARY QUESTIONS TO THE WRITTEN RESPONSES

Refer to response on question 1, page 1 – Water initiative programs

1. How is the Authority distributing water particularly in the western division during the dry season?

During dry seasons in the Western division, the Water Authority of Fiji organizes water carting. WAF has a schedule for water carting at its metered areas. For rural and maritime areas, the divisional commissioner's office is responsible for water carting.

Water Carting – for the Year 2016 – Western Region

Services Costing \$ - 2016			
Month	Disruption \$	ISA \$	Rural \$
January	*	*	87,045
February	*	*	73,398
March	*	*	500,516
April	*	3,423	48,749
May	*	25,292	115,541
June	*	17,224	89,890
July	7,753	12,604	130,874

WAF also has its 24 hour Call Centre to facilitate customer complaints and any other issues on phone number 3346777 or short-code call/text 5777 for Vodafone, Digicel, and Inkk mobile users or email contact@waf.com.fj.

Further, WAF has continued its services in response to situations that arise which includes the current pandemic that prevails internationally.

Refer to response on question 2, paragraph 4, page 2 – NDP target

2. “The Authority will not be able to meet the NDP target of 100% access to clean and safe water in urban areas by 2021 , WAF will be able to meet its NDP target of 100% access to clean and safe water in urban areas by 2021 and for rural and maritime areas by 2030”. Can the Authority clarify will it achieve its NDP target in 2021 for all Fijians?

The Authority will not be able to meet the NDP target of 100% access to clean and safe water in urban areas by 2021, due to the following reasons:

- COVID-19 has enormously affected Fiji’s economy leading to reduced income and as such a reduced capital program.
- The substantial increase in urbanization in both the central and western regions has resulted in capital expenditure to support the unprecedented growth and subsequently a reduction in existing areas.
- Damages to WAF infrastructure due to tropical cyclones (TC Winston, TC Harold)
- El Nino and La Nina effects lead to disturbance of WAF water sources.

The USD 222 million Urban Water Supply and Wastewater Management Project will be completed by 2025 and this will help WAF to meet its NDP target of 100% access to clean and safe water in urban areas by 2025 and for rural and maritime areas by 2030. This information is submitted with a view that the delivery of such services can be made in normal circumstances. Where WAF can account for natural calamities the extent of damages cannot be a forecast in projection models and or Master Plans.

Refer to response on question 4.3, page 4 – Highlight No: 8 – Water Champion

3. Under the water champion program, the authority provided an opportunity for the students to explore career options before undertaking final year study at school which was carried out in the central division, are there plans to undertake this career explore the option to the other respective divisions?

The Financial Year 2016/2017 was the initial start of the Water Champion Program and was done in the Central Division as a pilot program. Water Authority of Fiji received the Global Water Awards in Madrid, Spain on 24 April 2017 for its “Water Champion” program. The program has provided both a theoretical approach to learning about water and wastewater services and a practical exercise where students and corporate bodies witnessed WAF’s operations first-hand.

FJ\$50,000 was set aside for this program which included transportation costs, free WAF brochures, free tee-shirts, certificates, wrist bands, and refreshments. Marketing was done to attract schools around Central to participate.

Unfortunately, this program did not continue past 2017. However, schools are welcomed upon approval from the CEO every year in Central, Western, and Northern division to tour around our Water Treatment Plants. Also, we have Ph.D. students carrying out their research at Wastewater Treatment Plants at Navakai WWTP. All tours, special visits, and researches are accommodated upon obtaining approval from WAF CEO.

Refer to response on question 10, page 7 – Capital Works

4. From the table below on the total number of capital work projects please clarify the following:

Division	Total No. of Projects	Projects Completed	Projects Shelved
Central	26	17	9
Western	35	29	6
Northern	8	8	nil

- a) The committee would like to know what progress was made to the projects that were shelved with regards to redesigning.

Out of the 9 Central projects that were shelved in 2016/2017, 5 were implemented in 2017/2018 whereas 4 have been shelved. The shelved projects are as follows:

- a. Mead Road – FRA has to allow WAF to upgrade the mains as it is in the middle of the road. FRA has plans to upgrade the roads and will allow WAF to carry out its project (relocation of pipeline) simultaneously. WAF awaits FRA response.
- b. Queens Road, Lami – FRA has done the footpath which needs to be removed in portions and sections for WAF to upgrade the mains. WAF awaits FRA approval.
- c. Nailega to Veninuqa – shelved since Namau Water Treatment Plant was built to supply treated water to Nailega and Veninuqa village.

- d. Navunisole Village Mains Extension- shelved since Namau Water Treatment Plant was built to supply treated water to Navunisole Village Mains Extension.

Out of the 6 Western projects that were shelved in 2016/2017, 5 were implemented in 2017/2018 whereas 1 was shelved. The shelved project is as follows:

- a. Natabua Housing – Shelved due to subdivision landowners not giving land concern to WAF to carry out the project.
- a) For the western division the response mentioned 3 are ongoing projects, however the total shelved projects were 6. Please can the authority clarify the figures provided?
The figures provided were given as at 31st July 2017. The 3 ongoing projects were under construction when the Annual report was generated.
However, out of 35 projects under the Western division 34 has been completed and 1 is shelved (Natabua Housing).

Refer to response on question 13, page 8 – Rural and Maritime Assistance

5. The committee would like to receive the excel listing of the Rural and Maritime assistance program which was not attached to the written response.

Refer to Annex 1 – Free water tank and Rainwater Harvesting

Refer to response on question 14, page 9 – Free Water Allowances

6. Please clarify the distribution of water tanks specifically for the Eastern Division?

Refer to Annex 2 – Free water tank Eastern Division

7. The budget allocation for the western and northern division was not stated clearly, can this be clarified for the committee's information?

- A. In Western, the total applications received were 12,690 of which 12,400 has received a free water tank and 290 applications were under process. The budget for the Western division was \$174,542.40
- B. In Northern, the total applications received were 3,390 of which 3,358 has received a free water tank and 32 applications were under process. The budget for the Northern division was \$47,267.21
- C. In Central, the total applications received were 10,438 of which 10,049 has received a free water tank and 389 applications were under process. The budget for Central division was \$141,449.72

The table outlines the number of applications received for free water tanks per region (2016).

Regions	Budget	Total applications received	Total number of tank distributed
Western	\$174,542.40	12,690	12,400
Northern	\$47,267.21	3,390	3,358
Central	\$141,449.72	10,438	10,049
