#### **OVERVIEW**

The global economic growth held up in 2023 with many economies showing remarkable resilience with inflation declining steadily. In its January World Economic Outlook (WEO), the International Monetary Fund (IMF) forecasts global economic growth at 3.1 percent in 2024, unchanged from 2023. The 2024 projection is 0.2 percentage points higher than previous forecast in October, reflecting stronger-than-expected performance in major advanced emerging market economies around the world, including the United States and China. Though the chance of a soft landing has increased, global growth is below historical average and risks remain due to impacts of withdrawal higher interest rates pandemic-related fiscal support, and persistently low levels of productivity.

On the domestic front, the Fijian economy is estimated to have grown by 8.2 percent in 2023, following post-pandemic economic recovery efforts and surge in service activities, led by increased inbound tourism.

While the tourism industry performed above expectations in 2023, output in some sectors remained broadly weak, largely due to industry-specific issues. Visitor arrivals reached a historic-high of 929,740 visitors, surpassing pre-pandemic levels by 4.0 percent. On the production front, electricity generation (3.6%) grew while gold (-12.7%), cane (-4.5%), sugar (-10.4%), mineral water (-8.8%) and timber outputs recorded negative outcomes in the review period.

Consumption activity remained upbeat throughout 2023, backed by low interest rates and favourable credit conditions coupled with a buoyant labour market and higher incomes evidenced by increased Pay As You Earn (PAYE) collections and inward

personal remittances. Net value-added tax (VAT) and PAYE tax collections (28.5% and 20.4%, respectively), as well as commercial banks' new consumption loans (11.6%), noted increases over the quarter. Nevertheless, new and second-hand vehicle registrations (-4.0%) fell in the year to November.

Investment activity, although slow, aligned with economic recovery efforts. New loans for investment purposes rose (8.6%) over the December quarter, underpinned by higher credit to the real estate (21.2%) which morethan-offset the fall in the building & construction (-1.9%) sector as well as private individuals' loan for a second home (-19.2%). However, domestic cement sales fell by 4.9 percent in the year to November, and building material prices declined by 3.8 percent over the December quarter. In the year to September, the estimated value of work put-in-place, a measure of construction activity, grew over the year (7.8%) from higher private and public construction work. Similarly, building permits issued forward-looking indicator) increased both in number (33.4%) and value (7.7%) over the September quarter.

Labour market conditions remained tight reflective of the growing economic activity coupled with higher labour emigration. Higher recruitment intentions were noted in 2023 (22.8%) by the RBF's job advertisement survey.

On the prices front, the annual headline inflation rate noted a 10-year end high of 5.1 percent in December 2023, mainly underpinned by the higher import commodity prices and an increased VAT and tariff rates implemented from August 2023. Higher prices were noted in the food and non-

alcoholic beverages, transport, alcoholic beverages, tobacco & narcotics, housing & utilities and restaurants & hotels categories.

Financial sector conditions remained accommodative through high liquidity and historically low interest rates which led to strong private-sector credit growth. In the December quarter, new lending by commercial banks' expanded by 21.9 percent.

On the external front, reflecting the higher domestic activity and record tourism, Fiji's trade deficit widened (5.4%) as the increase in import payments continued to outpace export receipts in the year to October. However, inflows from personal remittances

increased (20.4% to \$1.25b), recording a fourth year of double-digit growth in 2023.

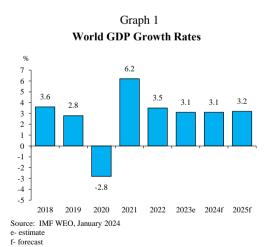

Foreign reserves (RBF holdings) stood at \$3,361.6 million in December 2023, sufficient to cover 5.7 months of retained imports (MORI). On an annual basis, foreign reserves were lower by \$69.0 million, reflecting higher import demand from increased economic activity.

Given the comfortable outlook for inflation and foreign reserves, the RBF maintained its accommodative monetary policy stance and kept the overnight policy rate at 0.25 percent in the December quarter in support of economic growth and financial stability.

#### THE INTERNATIONAL ECONOMY

#### **International Economic Conditions**

The global economy performed better-thanexpected in 2023 with inflation subsiding and labour markets remaining resilient. According to the IMF's January WEO, the global economic expansion was estimated at 3.1 percent in 2023, a slight upgrade (0.1 percentage point higher) from the October 2023 WEO. Going forward, global growth is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025 (Graph 1). Nonetheless, the 2024-2025 growth is below the historical (2000-2019) annual average of 3.8 percent, reflecting restrictive monetary policies, withdrawal of fiscal support amid high debt weighing on economic activity, as well as low underlying productivity growth. Global inflation is moderating with the IMF's overall inflation outlook lower in 2024 at 5.8 percent from 6.8 percent in 2023.

Correspondingly, growth in Fiji's major trading partner economies was slow in 2023 as tighter financial conditions, depletion of savings accumulated during the pandemic and stubborn inflation dampened domestic

demand.

Growth in the US economy has been resilient despite restrictive monetary conditions. The economy expanded by 3.1 percent in the December quarter of 2023, slightly higher than the 2.9 percent recorded in the September quarter, driven by expansion in consumption spending, specifically services activity. Government spending and non-residential investment softened alongside an improvement in net trade. The labour market continued to be robust as the unemployment rate fell to 3.7 percent in December from 3.8 percent in September. On the price front, the annual inflation rate eased to 3.4 percent in December from 3.7 percent in September largely led by a drop in energy prices. In its December meeting, the US Federal Reserve kept the federal funds rate unchanged at 5.25-5.50 percent for the fifth consecutive month.

The Eurozone economy broadly weakened in 2023 as higher energy prices due to Russia's invasion of Ukraine, weighed on household spending and manufacturing activity. In the third quarter, the economy stagnated, noticeably lower than the growth of 0.6 percent as in the previous quarter, largely due to decelerating outcomes in private inventories, trade balance and fixed investments. The unemployment rate rose to 6.5 percent in September, compared to the 6.4 percent in June 2023. Consumer prices eased to 2.9 percent in December from 4.3 percent in September 2023, owing to lower prices for energy while food and non-energy prices rose. The European Central Bank (ECB) in its December meeting, maintained its interest rates at record-high levels. The main refinancing operations rate and the deposit facility rate were kept at 4.5 percent

and 4.0 percent, respectively.

The Japanese economy grew annually by 1.5 percent in the third quarter of 2023 following a 2.2 percent growth in the previous quarter, due to services driven growth and easing of price pressures. On the labour market, the unemployment rate fell slightly to 2.5 percent in November, compared to 2.6 percent in September, due to higher hiring intention. The inflation rate fell to 2.6 percent from the 3.0 percent in September 2023 due to moderation in prices of food, healthcare, communication, fuel and energy. In its December meeting, the Bank of Japan (BoJ) continued to maintain an accommodative monetary policy and kept its key short-term interest rate at -0.1 percent and the 10-year bond yields at 0.0 percent.

The Australian economy slowed slightly to 2.1 percent in the third quarter of 2023 from the 2.0 percent noted in the second quarter, as household activity was squeezed by inflation, rising taxes and higher interest rates. The unemployment rate edged up to 3.9 percent in the last quarter, higher than the 3.6 percent noted for September 2023. The annual headline inflation rate remained high at 5.4 percent in September but lower than the 6.0 percent noted for June 2023 driven by a slowdown in both goods and services inflation. Following a 25 basis points increase in November, the Reserve Bank of Australia maintained the cash rate at 4.35 percent in December, to allow time to assess the impact of the previous rate hikes on the economy.

The **New Zealand** economy contracted by 0.6 percent in the third quarter of 2023 from the 1.5 percent expansion in the June quarter, as output in goods-related industries fell and tight monetary conditions curbed household spending. The unemployment rate increased from 3.6 percent in June 2023 to 3.9 percent in September, in line with the weakening of the domestic economy. The annual inflation

rate eased to 4.7 percent in the December quarter, from 5.6 percent in the previous quarter as prices moderated for food, housing and household utilities. Following its November meeting, the Reserve Bank of New Zealand kept the official cash rate unchanged at 5.50 percent in view that it was restricting demand, but rates needed to be maintained high due to ongoing excess demand and inflationary pressures.

The Chinese economy expanded by 5.2 percent (y-o-y) in the final quarter of 2023, up from 4.9 percent in the September quarter, underpinned by growth in industrial production and retail sales. unemployment rate slightly rose to 5.1 percent in December 2023, from 5.0 percent in the previous quarter. The annual inflation rate further fell to a deflationary outcome (-0.3%) in the December quarter of 2023 from 0.0 percent in September, as food prices continued to decline. In its December meeting, the People's Bank of China (PBoC) kept its lending rates steady, with the oneyear loan prime rate (LPR) remaining at a record low of 3.45 percent and the five-year rate staying at 4.2 percent.

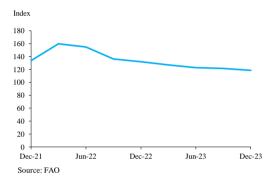

The **Indian economy** grew by 7.6 percent in the September quarter of 2023, from 7.8 percent in the June quarter, owing primarily to a strong growth in major sectors including manufacturing and construction and rise in infrastructure spending. The unemployment rate rose to 8.7 percent in December compared to the previous quarter (7.1%), as joblessness in rural areas rose due to monsoon rains. Headline inflation rose to 5.7 percent in December, up from 5.0 percent in the previous quarter as food prices rose underpinned by monsoon rains due to EI Nino affecting agricultural production. The Reserve Bank of India (RBI) kept its repurchase rate at 6.50 percent during its December meeting to ensure inflation stays within the central bank's target range while supporting growth.

**Commodity prices** noted mixed performances in the December quarter, however, recent conflicts in the Middle East have flared geopolitical risks and heightened uncertainty in commodity markets.

Global food prices<sup>1</sup> eased further by 2.5 percent from September to 118.5 points in December 2023, as declines in the price indices for sugar, vegetable oils and meat more-than-offset increases in prices of dairy products and cereals (Graph 2).

Graph 2

FAO Food Price Index

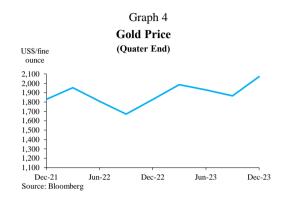

World market sugar<sup>2</sup> prices fell in December to US20.58 cents per pound, 22.3 percent lower than in September, attributed to better global market supply expectations (Graph 3).

Graph 3

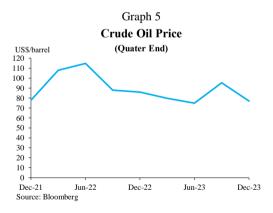

<sup>&</sup>lt;sup>1</sup> As measured by the United Nations Food and Agriculture Organisation (FAO) Food Price Index.

Gold prices rose to US\$2,071.8 per fine ounce (oz.) in December, 11.0 percent higher than in September, led by growing expectations among investors of interest rate cuts by the US Federal Reserve, a weaker US dollar and geopolitical tensions (Graph 4).

On the other hand, the **price of Brent crude oil** fell on a quarterly basis by 19.2 percent to US\$77.04 per barrel in December led by concerns over weak global manufacturing activity and demand while production of US crude continued to increase at record pace. (Graph 5).

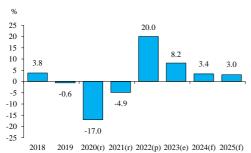

<sup>&</sup>lt;sup>2</sup> Month-end world market sugar prices as per the New York No. 11 benchmark.

#### THE DOMESTIC ECONOMY

#### **Domestic Economic Conditions**

The Fijian economy is estimated to have returned to its 2019 GDP in 2023 with a growth of 8.2 percent (Graph 6). The expansion was fuelled by the resilience of the tourism sector and its positive flow-on effects to other sectors of the economy, such as the accommodation & food services; transport & storage; wholesale & retail sale; and agricultural sectors. The domestic economy is projected to grow by 3.4 percent and 3.0 percent in 2024 and 2025, respectively.<sup>3</sup>

Sources: FBOS and Macroeconomic Committee

r - revised

p - provisional f - forecast

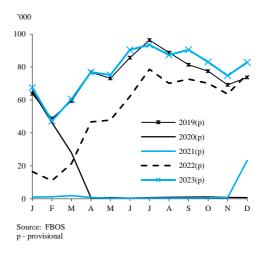

#### **Production**

Broadly, resource-based sectors underperformed in 2023 owed to industryspecific challenges, while the tourism and related sectors continued to perform well throughout the year.

In 2023, the number of international tourists increased by 46.1 percent to 929,740 visitors, surpassing pre-pandemic 2019 levels<sup>4</sup> by 4.0 percent (Graph 7).

Graph 7

Monthly Visitor Arrivals

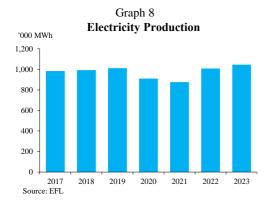

The positive outcome was mainly driven by higher visitor arrivals from major source markets such as Australia (46.7%), New Zealand (23.8%), US (10.7%) and Canada (2.4%).

In 2023, electricity generation by Energy Fiji Limited (EFL) totalled 1,044,862.7 Megawatt hours (MWh), a 3.6 percent increase over the previous year (Graph 8). Renewable energy sources accounted for

<sup>&</sup>lt;sup>3</sup> Forecasts by the Macroeconomic Committee as at November 2023.

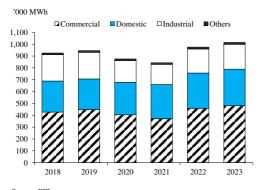

<sup>&</sup>lt;sup>4</sup> In 2019: 894,389 visitors.

51.6 percent of total electricity generated in the review period.

Similarly, electricity consumption rose annually by 4.0 percent (to 1,013,745 MWh) in 2023, mainly due to increased demand from commercial (5.1%), domestic (3.3%), and industrial (2.6%) consumers (Graph 9).

Graph 9 **Electricity Consumption** 

Source: EFL

At the end of 2023 sugar crushing season,<sup>5</sup> both cane (-4.5% to 1,565,564 tonnes) and sugar (-10.4% to 139,628 tonnes) production fell relative to the last season, largely attributed to unfavourable weather conditions and milling issues.<sup>6</sup>

Gold production by the Vatukoula Gold Mines Limited (VGML) continued to fall in 2023 by 12.7 percent to 22,249 ounces following a 28.4 percent reduction noted in 2022 (Graph 10). Likewise, mineral water production fell in 2023 by 8.8 percent despite a massive positive monthly outturn (124.4%) in December.

Graph 10

'000 ounces Gold Production

40

20

2017 2019 2021 2023

Source: VGML

The weak performance of the timber industry persisted. In 2023, pinewood supply fell by 29.9 percent (to 277,369 tonnes). Consequently, sawn timber output fell by 23.7 percent to 24,668 cubic metres (m³). In addition, woodchip production (-22.9% to 228,355 tonnes) also dropped.

June. The season ended on 10, 11, and 28 November for Rarawai, Labasa and Lautoka mills respectively. <sup>6</sup> Both operational and mechanical issues.

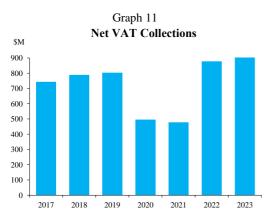

<sup>&</sup>lt;sup>5</sup> Labasa and Lautoka mills commenced operations on 31 May while Rarawai mill began crushing on 15

Comparably, mahogany production contracted by 16.4 percent to 33,558 m<sup>3</sup> in the same period, largely due to adverse weather conditions.

#### Consumption

Consumption activity remained robust in 2023.

Receipts from the consumption tax (net VAT) rose by 28.5 percent (to \$1,128.0m) in 2023, as higher domestic (34.0% to \$700.6m) and customs import VAT (27.1% to \$715.7m), coupled with the rise in other Government department VAT (3.6%, to \$12.9m), more-than-offset the increase in refunds (36.4% to \$299.0m) (Graph 11).7 Similarly, PAYE tax collections grew annually by 20.4 percent (to \$176.9m) in the review period.8 Additionally, the wholesale and retail trade survey revealed that total sales/service income increased annually by 9.8 percent to \$4,824.3 million, cumulative to the third quarter of 2023.9

Source: Fiji Revenue & Customs Service

In 2023, commercial banks' new lending for consumption purposes grew by 11.6 percent over the quarter to \$1,439.8 million, driven by increased disbursement of new loans to the WRHR sector (13.5% to \$1,241.1m) and the private individuals category (1.6% to \$198.7m).

Contrastingly, vehicle registrations decreased by 4.0 percent (from a 24.4% increase a year ago) cumulative to November 2023, underpinned by lower registrations of second-hand vehicles particularly private, hire, taxi, and rental cars.

#### **Investment**

The momentum in investment activity has been slow in 2023, as revealed by partial investment indicators.

New credit for investment purposes grew by 8.6 percent in quarter 4 of 2023 to \$881.3 million, largely boosted by higher credit to the real estate (21.2% to \$542.4m) coupled with a dip in lending to the building & construction (-1.9% to \$237.2m) sectors. Similarly, new loans to private individuals to purchase a second home (as an investment) contracted by 19.2 percent (to \$101.7m).

Notably, building material prices dropped on a quarterly basis (-3.8%)<sup>10</sup> in the December 2023 quarter (Graph 12), underpinned by lower prices in cement & related materials, iron & steel and plumbing ware which more-than-offset the

 $<sup>^7</sup>$  Effective 1 August 2023, VAT rate on non-essential items increased from 9% to 15% .

<sup>&</sup>lt;sup>8</sup> Fiji National Provident Fund data shows that wages paid has increased significantly.

increased prices for the remaining categories, particularly floor & wall tiles, electrical products and wood & related materials.

Graph 12 **Building Material Prices Index** Index 130 125 120 115 110 105 Dec-20 Dec-21 Jun-21 Jun-22 Dec-22 Jun-23 Dec-23 Source: FBOS

Likewise, domestic cement sales declined by 4.9 percent in the year to November.

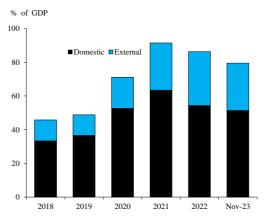

Cumulative to the third quarter of 2023, the estimated value of work put-in-place, a measure of construction activity, was higher (7.8% to \$402.1m) on an annual basis from more private (11.6%) and public (2.3%) construction work. However, the value strengthened (10.0%) on a quarterly basis in comparison to the June quarter, partly due to the lower cost of building materials.

Building permits issued – a forward-looking indicator for construction activity – increased both in number (33.4%), and value (7.7%) over the September quarter, whilst over three-quarters of the year, the number rose (17.1%) although the value (5.1%) of building permits issued, fell.

#### **Public Finance**

Government debt stood at \$9,972.6 million In November 2023, or 79.5 percent of GDP (Graph 13). Regarding debt components, domestic debt comprised a higher portion, totalling \$6,440.1 million (51.3% of GDP), while external debt totalled \$3,532.5 million (28.2% of GDP).

Graph 13
Government Debt

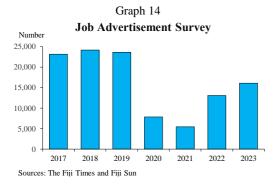

Source: Ministry of Finance, Strategic Planning, National Development and Statistics

#### Labour Market

Labour demand continued to increase during the year led by higher economic activity and increased emigration rate.

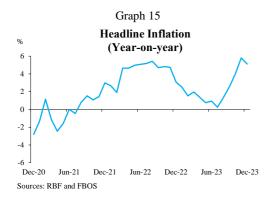

As per the RBF Job Advertisement Survey, the number of jobs advertised in 2023 rose by 22.8 percent, following a strong rebound of 140.1 percent in 2022 (Graph 14). The outturn was due to improved recruitment intentions mostly in the community, social

& personal services; and wholesale & retail trade & restaurants & hotels sectors.

#### Inflation

The 2023 year-end headline inflation rate noted a 10 year-end peak of 5.1 percent, higher than the 3.1 percent recorded in December 2022 underpinned by higher import commodity prices and an increased VAT and tariff rates implemented from August 2023. Larger price increases were mostly evident in the food and non-alcoholic beverages, transport, alcoholic beverages, tobacco & narcotics, housing & utilities and restaurants & hotels categories (Graph 15).

Going forward, movements in oil and other commodity prices could affect the outlook because of price increases, on the back of geopolitical tensions and a tight supply. Nonetheless, the year-end inflation for 2024 is forecast to moderate to around 3.0 percent, as the impact of the Government's tax changes wanes.

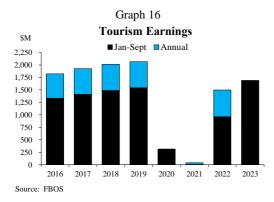

#### **External Sector**

In the year to October 2023, Fiji's trade deficit widened by 5.4 percent to \$3,660.5 million as the growth in imports continued to outpace exports. Comparatively, this is lower than the 90.0 percent widening of the trade deficit in the corresponding period in 2022.

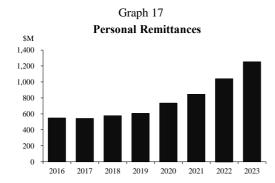

Over the same period, imports (excluding aircraft) rose by 5.9 percent to reach \$5,652.2 million, compared to a growth of 59.4 percent noted in the corresponding period of 2022. All import categories, particularly machinery transport & equipment (excluding aircraft). miscellaneous manufactured goods and food and live animals categories underpinned the growth in imports.

Exports (excluding aircraft) grew by 6.9 percent in the first ten months of 2023 to \$1,991.6 million, contrary to a higher growth of 22.5 percent in the same period in 2022. Re-exports grew by 14.5 percent to \$853.4 million on the back of mineral fuels and lubricant exports, while domestic exports rose by 1.9 percent to \$1,138.2 million, driven by higher sugar and mineral water exports.

Cumulative to September 2023, tourism earnings grew by 75.3 percent to total \$1,689.9 million led by both higher visitor arrivals and per-diem expenditure. This compares to the 16,812.3 percent<sup>11</sup> growth (to \$964.0m) in the same period in 2022. Relative to the same period in 2019, earnings were higher by 9.5 percent (Graph 16).

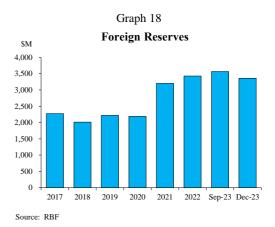

Inward remittances in 2023 grew by 20.4 percent to a new high of \$1,253.4 million, compared to an expansion of 23.1 percent (\$1,040.9m) in 2022 (Graph 17). The positive outturn was predominantly driven by personal transfers (21.1%).

Sources: Mobile Network Operators, Commercial banks and the RBF

In terms of transfer channels, a majority of remitters' utilised money transfer operators (41.9%) and mobile network operators (38.0%) over commercial banks (20.1%) to send money to Fiji. The steady inflow of personal remittances has continued to support the level of foreign reserves.

At the end of 2023, foreign reserves (RBF holdings) remained adequate at \$3,361.6 million (5.7 MORI), although a fall of \$203.1 million from the September quarter, as payments exceeded receipts during the period. On an annual basis, foreign reserves fell by \$69.0 million in 2023 (Graph 18).

#### **Domestic Financial Conditions**

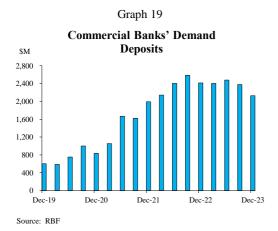

The RBF maintained its accommodative monetary policy stance during the December quarter by keeping the overnight policy rate at 0.25 percent. The comfortable level of liquidity, coupled with historically low interest rates, strengthened Fiji's economic recovery efforts. Increased lending, particularly to the private sector,

<sup>&</sup>lt;sup>11</sup> Higher percentage growth is due to base effect on no tourism in 2021 due to internal border closures.

underlined the positive aggregate demand during the review period.

Excess liquidity in the banking system, as measured by the banks' demand deposits (BDD), declined further by 10.5 percent on a quarterly basis to \$2,128.4 million at the end of December (Graph 19).

The decline in BDD was underpinned by a decline in foreign reserves as well as a growth in currency in circulation, statutory reserve deposits, and the reduced utilisation and higher repayment of unconventional monetary policy facilities.<sup>12</sup>

**Financial Intermediaries** 

**Broad money** (M3) rose (1.8%) to \$11,115.4 million in the December quarter compared to the 2.8 percent growth noted in the September quarter. The expansion in M3 was led by **net domestic assets (NDA)** 

(4.4%) while net foreign assets (NFA) declined over the quarter (-4.6%). The increase in NDA was underpinned by higher private sector credit (3.2%), constituting loans mostly to private sector business entities by commercial banks. In addition. credit net to the central government grew (8.3%,\$41.0m), reflecting commercial banks' investment in government securities. The contraction in NFA was largely driven by the decline in gross reserves (-5.6%) which more-thanoffset the decline in foreign liabilities (-4.9%) during the same period.

Narrow money (M1), a component of broad money, rose further (1.4%) in the December quarter compared to the 5.0 percent growth during the September quarter, attributed to higher transferrable deposits (1.5%, \$113.6m), mainly demand deposits of PSBEs. This more-than-offset the decline in currency in circulation (-0.1%) in the review period. Other deposits, a sub-component of M3 also increased (4.5%) driven by time deposits of public enterprises, local government and private sector business entities.

Commercial banks' outstanding loans rose by 3.2 percent (by \$268.5m) in the December quarter to a total of \$8,533.5 million, compared to a 1.4 percent growth in the September quarter. The quarterly outcome was mainly due to higher lending to the wholesale, retail, hotels & restaurants (WRHR), households, real estate, transport

<sup>&</sup>lt;sup>12</sup> Since the beginning of this fiscal year, the RBF has ceased all lending under its Unconventional Monetary Policy facilities.

& storage, manufacturing, electricity, and gas & water sectors (Graph 20).

Graph 20 Commercial Banks' Lending to Sectors \$M Private Individuals 2,500 2,000 Wholesale, Retail, Hotels & Restaurants 1,500 1,000 Transport & Storage 500 Electricity, gas & water Dec-20 Dec-21 Dec-22 Dec-23 Source: RBF

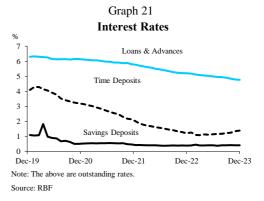

Similarly, new lending by commercial **banks** rose by 21.9 percent (\$1,105.9m) cumulative to the December quarter, totalling \$3,788.1 million, largely underpinned by the increase in new credit to the electricity, gas & water, WRHR, storage, real transport & estate. professional & business services. manufacturing and non-bank financial institutions sectors.

Commercial banks' interest rates fell over the review period. The weighted average outstanding lending rate remained on a downward trend, reaching a historical low of 4.77 percent, from 4.90 percent in the September quarter. Likewise, the weighted average new lending rate fell to

4.77 percent from 4.89 percent in the previous quarter.

The weighted average existing time deposit rate rose further to 1.40 percent in December from 1.23 percent in September 2023. Similarly, the weighted average new time deposit rate increased over the same period to 1.52 percent from 1.19 percent.

As a result of these movements, both the outstanding (31.0 bp) and new interest rate (46.0 bp) spread narrowed over the December quarter (Graph 21).

#### Money Market

Government treasury bills were undersubscribed by \$3.0 million in the December quarter, with a total of \$107.0 million accepted on maturities of 91, 182, and 364 days, having respective yields<sup>13</sup> of 0.03, 0.07, and 0.15 percent.

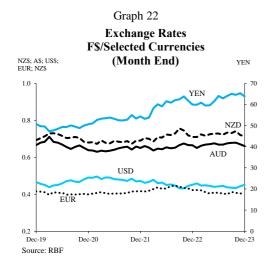

<sup>&</sup>lt;sup>13</sup> Rates quoted for the money and bond market are the weighted average rates.

#### **Bond Market**

The Fiji Government Infrastructure bonds were undersubscribed by \$35.6 million in the December quarter, and a total of \$134.1 million were accepted on the 2, 3, 10, 15, and 20 years maturities, with yields of 0.56, 0.99, 3.90, 4.12, and 4.67 percent, respectively. Over the same period, \$3.2 million worth of Viti bonds were accepted on the 5, 7, and 10 years maturity, earning fixed rates of 3.00, 3.50, and 4.00 percent, respectively.

#### **Exchange Markets**

Exchange rate movements between the Fijian dollar (FJD) and major trading partner currencies were generally mixed over the December quarter (Graph 22).

On a quarterly basis, the FJD strengthened against the US dollar (3.6%), but weakened against the Australian dollar (-2.6%), NZ dollar (NZD) (-2.4%), Japanese Yen (JPY) (-1.9%) and the Euro (-1.1%).

The Nominal Effective Exchange Rate<sup>14</sup> index rose (1.0%) over the December quarter reflecting an appreciation of the Fiji dollar against the trading partner currencies. However, the Real Effective Exchange Rate<sup>15</sup> index fell by 0.7 percent, indicating an improvement in Fiji's international competitiveness due to lower domestic inflation relative to key trading partner economies (Graph 23).

Graph 23

<sup>&</sup>lt;sup>14</sup> The NEER is the sum of the indices of each trading partner country's currency against the FJD, adjusted by their respective weights in the basket. This index measures the overall movement of the FJD against the basket of currencies. An increase in this index indicates a slight appreciation of the FJD against the basket of currencies and vice versa.

The new ER weights were implemented in November 2023.

<sup>&</sup>lt;sup>15</sup> The REER index is the sum of each component of the NEER index, adjusted by the relative price differential between Fiji and each of Fiji's major trading partners. The index measures the competitiveness of the FJD against the basket of currencies. A decline in the REER index indicates an improvement in Fiji's international competitiveness and vice versa.

#### Banking Industry Quarterly Condition Report – 30 September 2023

#### Overview - Commercial Banks

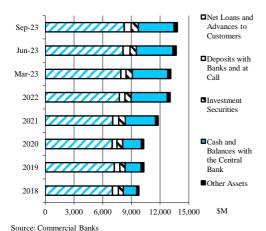

The commercial banking sector's performance was assessed as satisfactory for the review quarter, based on satisfactory capital, earnings, and liquidity positions, and a marginal rating for asset quality.

#### **Balance Sheet**

The combined balance sheet of the commercial banking sector stood at \$13.8 billion, registering a quarterly growth of 0.9 percent (or \$119.5m) and an annual growth of 5.4 percent (or \$711.8m).

The growth over the quarter was largely underpinned by the increase in net loans (by \$119.4m), investments (by \$80.0m) and statutory reserve deposits (by \$31.8m), off-set by the decline in exchange settlement account (by \$99.1m) and other assets (by \$10.2m) (Graph 26).

Graph 26 Structural Change and Growth in Commercial Banks' Assets

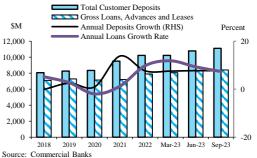

Commercial banks' total deposits increased by \$306.9 million (or 2.8%) to \$11.1 billion, with the bulk of the growth stemming from demand and time deposits.

The growth in demand deposits of 2.8 percent (or \$237.6m) over the quarter to \$8.8 billion was underpinned by the increase in deposit balances of central Government (by \$113.1m), Private Sector Business Entities (PSBEs) (by \$99.5m), private individuals (PIs) (by \$72.7m), local Government (by \$17.7m) and Public Enterprises (PEs) (by \$5.7m), which outweighed the reduction in balances of Non-Bank Financial Institutions (NBFIs) (by \$66.9m) and non-residents (by \$4.0m).

Time deposits increased by 3.3 percent (or \$74.3m) to \$2.3 billion as a result of increase in deposit placements from non-residents (by \$97.6m) and NBFIs (by \$52.3m), off-set by maturities of PSBEs (by \$43.9m), PIs (by \$16.4m) and PEs (by \$15.4m).

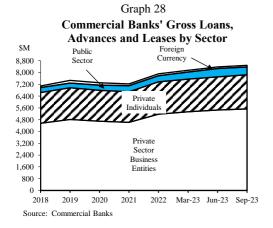

On the contrary, savings deposits declined slightly from \$54.6 million in the prior quarter to \$50.6 million, largely due to withdrawals by PIs of \$4.0 million (Graph 27).

Graph 27 Commercial Banks' Customer Deposits and Loans

Commercial banks' gross loans and advances expanded over the quarter, although at a slower pace compared to the June 2023 quarter, by 1.3 percent (or \$108.9m) to \$8.4 billion.

On an annual basis, gross loans and advances reported a growth of 7.1 percent (or \$553.6m). The growth in lending over the quarter was largely driven by loans to PSBEs (by \$78.2m) and PIs (by \$63.9m) (Graph 28).

Majority of the new loans disbursed to the PSBEs were to the wholesale, retail hotels and restaurant (WRHR) (\$293.5m or 32.4%) and manufacturing (\$126.4m or 13.9%) sectors. Lending for housing purposes continued to dominate the bulk of PI lending.

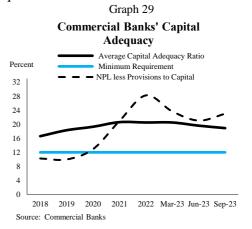

#### Capital Adequacy

Commercial bank's capital adequacy ratio stood at 18.9 percent as at 30 September 2023 (June 2023: 19.3%), attributed to a larger increase in total risk weighted assets by 2.1 percent (or \$170.8m) compared to

the increase in total capital by 0.2 percent (or \$3.2m).

All commercial banks complied with the prudential minimum capital adequacy requirement of 12.0 percent and continued to be assessed as satisfactory (Graph 29).

The increase in total capital was underpinned by the growth in paid-up/assigned capital (by \$30.1m) and unaudited retained earnings (by \$74.2m), which was offset by dividends/profit repatriation (by \$88.8m) in the review quarter.

The growth in total risk weighted assets was attributed to the increases in both onbalance sheet and off-balance sheet exposures, by \$123.2m and \$47.6m, respectively.

Commercial banks' capital position continues to remain vulnerable to credit risk, indicated by the levels of non-performing loans (NPLs) less specific provisions<sup>16</sup> to capital ratio slightly having deteriorated to 23.9 percent from 21.8 percent in the June 2023 quarter.

<sup>&</sup>lt;sup>16</sup> Includes individually assessed provisions (IAP) and collectively assessed provisions (CAP).

#### **Asset Quality**

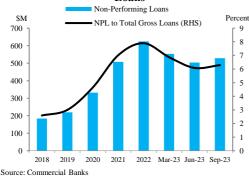

Commercial banks' asset quality continued to be assessed as marginal, as the classified exposures to gross loans ratio deteriorated slightly to 6.3 percent in the review quarter, compared to 6.1 percent in the prior quarter (Graph 30). On an annual basis however, the classified exposures to gross loans ratio improved from 7.6 percent.

Graph 30

Commercial Banks' Non-Performing

Loans

Non-Performing Loans

Total classified exposures of commercial banks increased over the quarter by 4.8 percent (or \$24.1m) to \$528.1 million, emanating solely from the deterioration in the substandard (by \$43.5m) accounts, while the doubtful and loss categories declined by \$16.7 million and \$2.7 million, respectively. The industry's classified exposures is dominated by the substandard category (\$329.3m), followed by doubtful (\$142.4m) and loss (\$56.4m) accounts. The special mention category fell by 7.6 percent (or \$23.0m) to \$282.2 million.

Similarly, total past due levels increased slightly over the quarter by 0.7 percent (or \$1.6m) to \$238.4 million, as a result of the increases in accounts aged "one to two

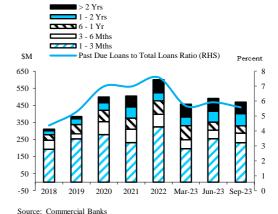

years" (by \$7.7m) and "three to six months" (by \$5.8m) (Graph 31).

By sector, the largest concentration of credit risk in the review quarter, was PIs at 28.1 percent, followed by real estate (20.4%), WRHR (20.4%), building and construction (9.0%) and transport and storage (7.0%) sectors.

In terms of coverage, specific provisions fell over the quarter by 6.7 percent (or \$10.8m) to \$150.0 million due to the decrease in collectively assessed provisions (by \$6.3m) and individually assessed provisions (by \$4.6m). Specific provisions to non-performing loans stood at 28.4 percent (June 2023: 31.9%).

Graph 31

Commercial Banks' Past Due Status

General reserve for credit losses (GRCL) decreased slightly by 0.5 percent (or \$0.6m) to \$108.4 million, and was assessed as adequate to cover 1.3 percent of net loans.

#### **Earnings and Interest Spread**

Commercial banks' earnings was assessed as satisfactory for the review quarter, as profit before tax grew over the quarter by 29.2 percent (or \$21.6m) to \$95.5 million. This was largely due to the write-back of provisions of \$26.3 million. On an annual basis, profit before tax increased by 58.4 percent (or \$35.2m) (Table 1).

Source: Commercial Banks

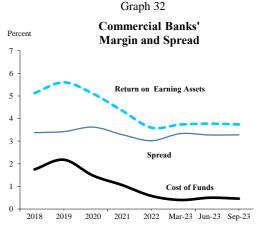

Commercial banks' operating income increased by 4.6 percent (or \$7.4m) to \$168.6 million attributed to the increase in non-interest income by \$6.0 million as a result of the increase in income from overseas exchange transactions, fees and charges and "other" income earned in the review quarter.

Operating expenses also increased by 17.3 percent (or \$12.1m) to \$82.1 million, underpinned by the increase in "other" expenses, other management expenses and personnel expenses.

As a result of the higher increase in operating expenses compared to operating income, the efficiency ratio for commercial banks deteriorated to 48.7 percent (June 2023: 43.4%) in the review quarter.

Bad debts and provisions decreased by \$26.3 million, due to the reduction in loan loss provisions (by \$26.2m); collectively assessed provisions by \$17.7 million and individually assessed provisions by \$8.5 million. Bad debts also declined slightly (by \$25k) while loan recoveries of \$1.1 million was recorded for the quarter (June 2023: \$1.0m).

The annualised return on assets (ROA) before tax stood at 2.8 percent (June 2023: 2.2%) supported by the increase in profits reported in the review quarter, while the combined annualised interest spread for commercial banks remained at 3.3 percent (Graph 32).

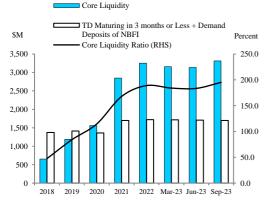

Source: Commercial Banks

#### Liquidity

Commercial banks' liquidity position continued to be assessed as satisfactory in the review quarter, underpinned by the level of liquid assets available to cover short term liabilities. (Graph 33).

Graph 33
Commercial Banks' Core Liquidity
Ratio

Source: Commercial Banks

Commercial banks' aggregate liquid assets holdings decreased slightly by 0.6 percent (or \$24.3m), remaining at \$4.1 billion, and continued to be assessed as satisfactory, with a coverage of 36.6 percent of total deposits.

Loans to deposits ratio was reported at 75.7 percent (June 2023: 76.8%), while core liquidity<sup>17</sup> ratio was assessed as satisfactory, covering 195.1 percent of short term liabilities.

#### Overview - Credit Institutions

The overall performance of the credit institutions sector continued to be assessed as *satisfactory*, underpinned by satisfactory

<sup>17</sup> Core liquidity includes cash on hand, demand balances at RBF and demand balances due from corresponding foreign banks. Core liquidity ratio is the ratio of core liquidity to capital, liquidity and earnings positions, whilst asset quality continued to be assessed as poor.

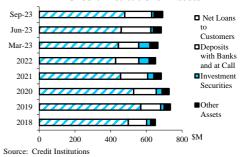

#### **Balance Sheet**

The combined balance sheet of the credit institutions' sector expanded by 1.1 percent (or \$7.7m) to \$691.4 million in the review quarter, underpinned largely by the increase in net receivables (by \$19.9m) and fixed assets (by \$1.6m), which were partially offset by the decline in deposits with banks (by \$15.4m).

On an annual basis, credit institutions' balance sheet also increased by 5.8 percent (or \$38.1m) from \$653.3 million in September 2022(Graph 34).

Graph 34

Structural Change and Growth in Credit Institutions' Assets

Credit institutions' total deposits increased by 1.2 percent (or \$5.1m) over the quarter to \$422.5 million, largely due to new deposit placements from NBFIs (of \$5.0m), PSBEs (of \$3.4m) and PIs (of

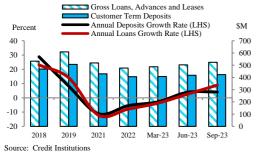

\$1.0m). The increase in deposits however, was partly offset by maturity withdrawals of \$2.5 million by PEs. On an annual

term deposits maturing in three months or less plus demand deposits of non-bank financial institutions.

basis, total deposits increased by 4.1 percent (or \$16.5m) from \$406.0 million (Graph 35).

Gross loans and advances for credit institutions increased by 3.9 percent (or \$19.9m) over the quarter, and by \$42.6 million (or 8.9%) over 12 months, to \$523.3 million. The increase in lending continued to be driven by PIs and PSBEs.

Graph 35
Credit Institutions' Customer Term
Deposits and Loans and Advances

New loans disbursed in the review quarter were largely to the PIs (\$31.3m or 42.5%), transport & storage (\$15.0m or 20.4%), building & construction (\$6.9m or 9.4%) and WRHR (\$6.8m or 9.3%) sectors.

#### **Capital Adequacy**

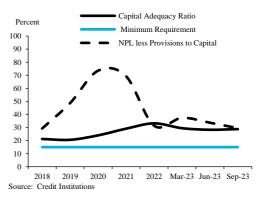

Credit institutions' capital adequacy ratio was assessed as satisfactory at 28.8 percent in the review quarter (June 2023: 28.3%), well above the minimum prudential requirement of 15.0 percent (Graph 36).

The growth in total capital by 5.9 percent (or \$8.7m) over the quarter, as a result of an increase in disclosed reserves by \$16.6 million, was partially offset by the decline

in unaudited retained profits net of appropriation by \$11.5 million.

Graph 36

Credit Institutions' Capital Adequacy

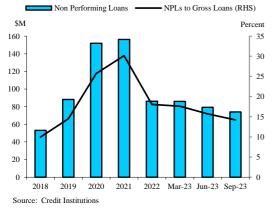

Total risk weighted assets also increased by 3.8 percent (or \$20.1m) over the quarter to \$542.8 million, driven by other loans to private sector (by \$20.9m) and premises, plant, equipment and other fixed assets (by \$1.6m) and other assets (by \$1.5m).

Credit institutions' ability to absorb NPLs related losses, measured by NPLs less provisions to capital improved to 28.2 percent from 32.7 percent in the prior quarter. Despite a slight reduction in specific provisions by \$0.9 million, the improvement in coverage was attributed to the overall reduction in the credit institutions' NPLs and an increase in capital and reserves.

#### **Asset Quality**

Credit institutions' asset quality continued to be assessed as poor as at September 2023, although noting a further improvement in the level of classified exposures to gross loans and advances from 15.7 percent in the prior quarter to 14.2 percent (Graph 37).

Graph 37
Credit Institutions' Non Performing
Loans

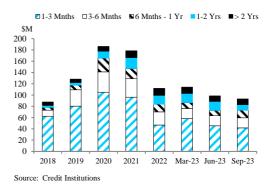

classified The improvement in the exposures to gross loans and advances ratio was attributed to the overall decline in classified exposures by 6.5 percent (or \$5.2m) to \$74.1 million while total gross loans and advances increased. NPLs were mainly concentrated in the transport & storage (29.6%). private individuals (24.1%), and building & construction (13.7%) sectors.

Specific provisions to classified exposures also noted a further increase over the quarter, from 39.0 percent to 40.5 percent, owed largely to the reduction in classified exposures.

GRCL increased by 51.1 percent (or \$1.5m) to \$4.3 million, and assessed as adequate to cover 0.9 percent of net loans.

Past due levels recorded a decline of 3.2 percent (or \$1.7m) as it stood at \$51.6 million in the review quarter. The reduction was underpinned by accounts aged "one to two years" by 38.6 percent (or \$6.2m) to \$9.8 million, "one to three months" by 8.2 percent (or \$3.7m) to \$41.6 million and "three to six months" by 0.3 percent (or \$0.05m) to \$17.9 million. This was partly offset by the increases in the "six months to one year" and "over two years" categories by \$4.1 million and \$0.4 million, respectively (Graph 38).

Graph 38
Credit Institutions' Past Due Status

#### **Earnings and Interest Spread**

Credit institutions' earnings was assessed as satisfactory for the review quarter, despite a decline in profit before tax by 21.9 percent (or \$2.1m) to \$7.5 million. On an annual basis, profit before tax also declined by 5.1 percent (or \$0.4m) from \$7.9 million (Table 2).

Credit institutions' net interest income increased over the quarter by 8.0 percent

(or \$1.3m) to \$17.6 million, as a result of the growth in interest income by 6.0 percent (or \$1.3m), and the reduction in interest expense by 2.7 percent (or \$0.1m).

Source: Credit Institutions

Operating expenses (non-interest expense) stood at \$8.7 million, denoting an increase of 2.4 percent (or \$0.2m) from the prior quarter, attributed largely to the increase in other expenses. Bad debts and provisions also reported a significant increase of \$2.4 million over the quarter to \$2.6 million.

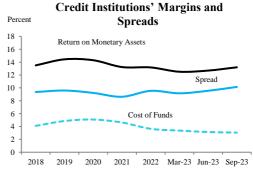

Credit institutions' efficiency ratio remained relatively consistent at 46.4 percent (June 2023: 46.3%) as the increase

in operating income of \$0.5 million was partially offset by the increase in operating expenses of \$0.2 million.

Credit institutions' annualised interest margin (interest spread) stood at 10.2 percent for the quarter ending 30 September 2023 (Graph 39).

Credit institutions' annualised ROE and ROA ratios (before tax) were recorded at 15.2 percent and 4.4 percent, respectively for the review quarter.

Graph 39

Source: Credit Institutions

#### Liquidity

Credit institutions' liquidity position continued to be assessed as *satisfactory*, despite a reduction in liquid assets<sup>18</sup> by 8.4 percent (or \$15.2m) over the quarter to \$165.4 million, as a result of a larger decline in deposits with banks (of \$15.4m) compared to the increase in investments by \$0.2 million. Liquid assets represented 23.9 percent of the credit institutions' total assets.

<sup>&</sup>lt;sup>18</sup> Liquid assets include demand and term balances with banks, and holdings of Government and Quasi Government debt securities.

Core liquidity<sup>19</sup> ratio declined over the quarter from 132.2 percent to 128.5 percent, attributed to the decrease in the level of core liquidity (Graph 40).

## Insurance Industry Quarterly Condition Report – 30 September 2023

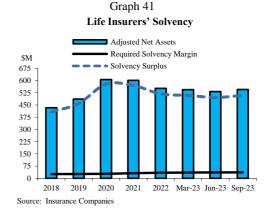

The insurance industry continued to be assessed as satisfactory in the review quarter, as both the life and general insurance sectors maintained strong solvency levels, with satisfactory liquidity and earnings positions.

#### **Life Insurance Sector**

#### Capital

Life insurers' solvency position continued to be assessed as strong, with a consolidated solvency surplus of \$508.8 million as at 30 September 2023, above the minimum solvency requirement of \$36.3 million (Graph 41).

The growth of 2.6 percent (or \$12.9m) in solvency surplus during the review quarter Was underpinned by a greater increase of 1.0 percent in admissible assets when compared to the adjusted liabilities increasing by 0.4 percent. This resulted in the net adjusted assets growing by 2.4 percent (or \$13.0m) to \$545.1 million, whereby Government securities remained the major admissible assets for life insurers at 54.6 percent.

**Assets** 

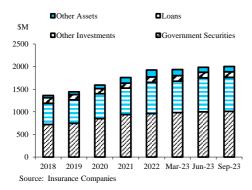

Total assets of life insurers expanded by 1.0 percent (or \$19.5m) over the quarter to \$2.0 billion, while a growth of 9.2 percent (or \$168.6m) was recorded over the year.

<sup>&</sup>lt;sup>19</sup> Core liquidity includes demand balances with banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months or less.

During the quarter, life insurers' investment portfolio rose by \$9.4 million to \$1.8 billion, while cash on hand was up by \$4.4 million to \$74.9 million (Graph 42).

Graph 42

Distribution of Assets of Life Insurance
Companies

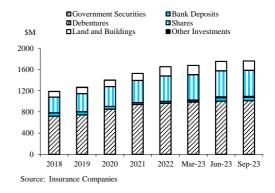

Life insurers' total investments recorded increases during the quarter in Government securities (by \$10.4m), bank deposits (by \$0.4m), and land & buildings (by \$0.3m). These were offset by the decrease in shares in non-related persons (by \$0.9m) and debentures with related persons (by \$0.8m). On an annual basis, total investments rose by 12.1 percent (or \$190.3m).

Assets portfolio of the life insurance sector continued to be dominated by the investments at 87.7 percent as at 30 September 2023, with Government securities continuing to be the largest component of total investments at 57.5 percent, followed by shares (27.7%), land & buildings (10.2%) and bank deposits (3.7%) (Graph 43).

Graph 43

Composition of Investments

#### Liabilities

Total liabilities of the life insurance sector increased by 1.0 percent (or \$19.4m) over the quarter to \$1.9 billion. This was attributed to the balance of revenue account, which rose by 1.0 percent (or \$18.7m) to \$1.8 billion and continued to be the major liability of the life insurers at 95.9 percent. On an annual basis, total liabilities grew by 9.4 percent (or \$165.7m).

Similarly, other provisions increased by 0.7 percent (or \$0.3m) to \$47.7 million, attributed to employee entitlements provisions, while 'other' liabilities were up by 3.2 percent (or \$0.6m) to \$20.3 million during the review quarter.

#### **Earnings**

Earnings continued to be assessed as satisfactory for the September 2023 quarter, as life insurers reported a combined after tax profit of \$13.4 million (June 2023: \$16.5m).

During the quarter, total income decreased by 33.0 percent (or \$31.0m) to \$63.1 million, attributed to asset value depreciation of equities & properties (by \$14.6m), coupled with the decrease in net insurance premiums (by \$13.4m) and return on dividend investment income (by \$3.8m).

Similarly, the overall total outgoings of life insurers fell over the quarter by 34.8 percent (or \$26.6m) to \$49.7 million. This was underpinned by the decrease in policy liabilities (by \$25.1m), net policy payments (by \$1.2m) and net commissions incurred (by \$0.3m).

#### Liquidity

Core liquid assets expanded over the quarter by 3.6 percent (or \$4.8m) to \$139.3 million, underpinned by the increases of \$4.4 million and \$0.4 million in cash on hand and bank deposits, respectively.

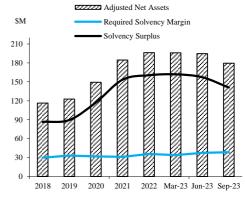

The broad liquidity ratio (incl. Government securities), which measures the ability of life insurers to meet policyholder liabilities, stood at 62.2 percent compared to 62.0 percent in the prior quarter and as such, the liquidity position of life insurers continued to be assessed as satisfactory.

#### **General Insurance Sector**

#### Capital

General insurers' solvency position continued to be assessed as strong, despite the reduction in the consolidated solvency surplus by 10.3 percent (or \$16.3m) to \$141.0 million. The industry solvency surplus remained well above the mandated requirement of \$38.5 million (Graph 44).

Graph 44
General Insurers' Solvency

Source: Insurance Companies

The decline in consolidated solvency surplus resulted from the greater increase in adjusted liabilities compared to admissible assets. Total admissible adjusted liabilities increased by 10.7 percent (or \$38.5m) over the quarter to \$397.7 million, which led to an overall decline in the net adjusted assets by 7.8 percent (or \$15.2m) to \$179.5 million.

#### Assets

Total assets of the general insurance sector expanded by 5.5 percent (or \$32.2m) over the quarter to \$620.0 million. On an annual basis, total assets grew by 19.5 percent (or \$101.0m).

The quarterly rise in the total assets was underpinned by the increases in bank deposits (by \$21.2m), outstanding premiums (by \$15.3m), other fixed assets (by \$2.3m), and sundry debtors – related persons (by \$1.6m) during the review quarter.

On the other hand, decrease were noted in cash on hand (by \$6.4m), deferred reinsurance expense (by \$1.8m), non-

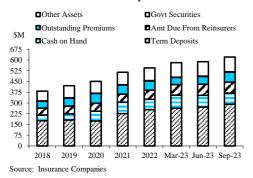

Related person prepayment (by \$0.7m), computer hardware (by \$0.4m) and sundry debtors-related persons (\$0.3m).

Investments of the general insurance sector increased by 6.5 percent (or \$21.6m) over the quarter to \$352.3 million, and represented 56.8 percent of total assets.

Bank deposits continued to remain the largest component of general insurers' total assets at 47.1 percent, followed by amounts due from reinsurers on outstanding claims at 12.4 percent of total assets, cash on hand (12.3%), outstanding premiums (11.3%), and land & buildings (5.8%) (Graph 45).

Graph 45

Distribution of Assets for General
Insurance Companies

#### Reinsurance

Reinsurance premiums ceded offshore doubled during the review quarter by 109.5 percent (or \$7.1m) to \$13.5 million when compared to \$6.4 million recorded in the previous quarter. All general insurers complied with the reinsurance requirements.

#### Liabilities

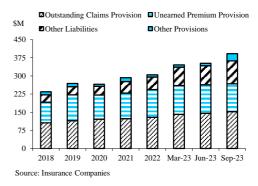

Total liabilities of general insurers increased by 11.1 percent (or \$39.6m) over

The quarter to \$398.0 million. Similarly, the industry recorded an annual growth of 34.4 percent (or \$101.8m) over the year.

The quarterly increase in total liabilities was mainly due to the increase in dividend provisions by \$20.0 million to \$20.2 million, sundry creditors by \$18.3 million to \$22.4 million, outstanding claims provision by \$6.5 million to \$152.4 million and 'other' liabilities by \$0.5 million to \$2.8 million.

On the other hand, unearned premium provision decreased by \$2.9 million over the quarter to \$114.8 million (Graph 46).

Graph 46
Distribution of Liabilities of General
Insurers

#### **Earnings**

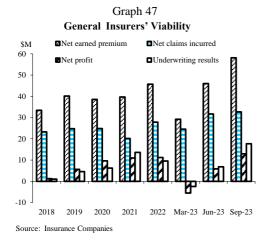

The general insurers recorded an after tax profit of \$12.9 million in September 2023. The improvement of \$7.0 million over the quarter is attributed to underwriting surplus increasing by \$10.9 million to \$17.7 million amidst increased premium and continued policy renewals during the quarter.

Underwriting result of the general insurance sector improved amidst the increase in net premium income of \$10.5

million brought by the higher increase in gross premium income (by \$17.5m) compared to the increase in reinsurance outward (by \$7.1m) to \$13.5 million (Graph 47).

Consequently net earned premiums was up by 26.3 percent to \$58.1 million relative to the increase of 3.1 percent in underwriting expense to \$7.8 million. Additionally, net claims incurred grew during the review quarter by \$1.0 million.

Non-underwriting income, on the other hand, recorded a decline of \$1.3 million to \$1.1 million.

#### Liquidity

Liquid assets continued to be assessed as satisfactory as the industry strengthened its liquidity position by 4.2 percent (or \$15.2m) to \$376.8 million, in the review quarter. Liquid assets was assessed as sufficient to cover outstanding claims by 2.5 times.

#### **Insurance Broking Industry**

#### **Earnings**

The insurance broking sector reported an after tax profit of \$2.0 million, an increase of \$0.2 million when compared to the previous quarter, as expenses declined by \$0.9 million.

Total revenue for insurance brokers was at \$7.1 million for the quarter ending 30 September 2023, whereby brokerage earned as commission increased by \$0.1 million to \$6.8 million, while brokerage earned from fees declined by \$0.5 million to \$0.3 million, and accounted for 95.3 percent and 4.5 percent of total revenue earned, respectively.

Total expenses fell by 17.9 percent (or \$0.9m) to \$4.3 million, with other expenses declining by \$0.7 million. Salaries & wages decreased by \$0.2 million, while directors' fees, professional indemnity & fidelity guarantee insurance, travel and audit fees noted minor decreases during the quarter.

#### **Broking Account**

The broking account balance rose over the quarter by 18.0 percent and stood at \$13.1 million as at 30 September 2023, with increases noted in both the monies received and withdrawn during the quarter.

Total monies received by insurance brokers during the quarter was up by \$28.4 million to \$72.9 million. Premiums received from insureds for payment to local insurers stood

to \$52.1 million and accounted for 71.4 percent of the total monies received, while premiums received from insureds on account of offshore insurers amounted to \$20.8 million, and 28.5 percent of total monies received.

Total monies withdrawn, on the other hand, increased by 59.5 percent to \$70.9 million, with premium payments to local insurers representing 56.7 percent (at \$40.2m), while premium payments to offshore insurers and payments to self, represented 28.9 percent and 13.9 percent, respectively.

#### **Offshore Placements**

358 applications totalling \$29.7 million in premiums were approved during the quarter, when compared to 308 applications with premiums of \$13.8 million approved in the prior quarter (Table 3).

Of the 358 offshore applications approved during the quarter, 70 applications worth \$22.2 million in premiums were approved by the RBF, while the remaining 288 applications worth \$7.6 million in premiums were approved by the licensed insurance brokers.

The material damage and business interruption (MD/BI) class continued to dominate the share of premiums remitted offshore at 60.3 percent, followed by term life (16.2%) and directors & officers' liability (4.0%) classes.

Table 3
Summary of Offshore Placements

September 2023 June 2023

#### Capital Markets Quarterly Performance Report – 30 September 2023

#### Stock Market

The stock market's key performance indicators of market capitalisation, SPX Total Return Index (STRI), number of trades, value of shares traded recorded declines over the quarter, whilst volume of shares traded noted an increase. The buy

and sell ratio continued to reflect the excess number of listed securities on offer relative to bids.

The market capitalisation of listed securities contracted by 1.5 percent (or \$48.0m) over the quarter to \$3,206.7 million as at 30 September 2023, however expanded by 7.6 percent (or \$227.2m) over the year (Graph 49).

The quarterly decline in market capitalisation was largely attributed to the decrease in the share price of four of the top five listed securities namely Amalgamated Telecom Holdings (ATH) by 6.1 percent, RB Patel Group (RBG) by 0.3 percent, Vision Investment Limited (VIL) by 0.2 percent and Flour Mills of Fiji (FMF) by 1.6 percent, despite an additional 150,078 shares quoted by Kontiki Finance Limited (KFL) on the SPX trading platform, as part of its dividend reinvestment plan.

The top 5 listed securities composition in terms of the market capitalisation declined to 73.3 percent as at 30 September 2023 (June 2023: 74.2%), and the individual market share over the quarter were as follows:

- ATH: 27.6 percent (June 2023: 29.0%);
- RBG: 14.9 percent (June 2023: 14.7%);
- VIL: 13.2 percent (June 2023: 13.0%);
- FHL: 8.9 percent (June 2023: 8.8%); and
- FMF: 8.7 percent (June 2023: 8.7%).

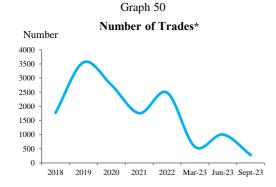

In the September 2023 quarter, six listed companies either declared or paid dividend returns, and all reported increased dividend returns. The STRI contracted by 1.1 percent over the quarter to 8,201.83. However, when compared to the previous year, the STRI expanded by 9.6 percent from 7,486.67.

As at 30 September 2023, the stock market recorded a year-to-date (YTD) average return of 4.7 percent comprising of an average yield<sup>20</sup> of 2.1 percent (September 2022: 2.8%) and capital gain<sup>21</sup> (CG) of 2.6 percent (September 2022: -5.7%).

The number of trades executed over the quarter declined by 72.3 percent (or 726 trades) to 278 trades in September 2023 (June 2023: 1004) (Graph 50).

<sup>&</sup>lt;sup>20</sup> Average dividend/interest yield as per the companies' financial year.

<sup>&</sup>lt;sup>21</sup> Average capital gain as per the calendar year.

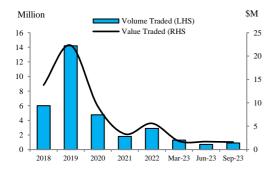

\* Excludes special crossing transactions Source: SPX

The volume and value of shares traded stood at 0.9 million and \$1.6 million, respectively as there were no special crossing transactions conducted in the September 2023 quarter (Graph 51).

Graph 51

Volume and Value Traded\*

\* Excludes special crossing transactions Source: SPX

The buy and sell ratio marginally improved to 1:17 in September 2023 compared to 1:20 in the previous quarter, however there continues to be a higher supply of securities on offer relative to demand. The

improvement in the ratio was due to partial execution of sell orders for KFL and FHL.

### Managed Investment Schemes (MIS) Market

The MIS market's key performance indicators recorded mixed results over the quarter with funds under management, number of unit holders and investment portfolio improved, while liquid assets to unit repurchases ratio and earnings declined.

#### **Balance Sheet**

Total funds under management expanded further by 2.2 percent (or \$11.9m) over the quarter to \$551.8 million as at 30 September 2023. On an annual basis, funds under management expanded by 14.3 percent (or \$69.1m) from \$482.7 million in September 2022.

The quarterly increase in funds under management resulted from a growth in unitholders fund by 3.5 percent (or \$13.3m) to \$393.3 million (June 2023: \$380.0m), while the total reserves contracted marginally by 0.9 percent (or \$1.4m) to \$158.6 million (June 2023: \$160.0m)

#### Assets

The combined total asset for the MIS market increased by 1.6 percent (or \$9.0m) over the quarter to \$564.8 million as at 30 September 2023 (June 2023: \$555.9m). The growth in assets was attributed to increases in investments (by \$4.1m), cash

on hand (by \$3.9m) and accrued income (by \$1.0m).

The MIS market's investment portfolio expanded by 0.9 percent to \$448.4 million in the review quarter (June 2023: \$444.3m) and this was mainly attributed to the increases in the cash and cash equivalents (by \$4.0m) and investments in listed securities (by \$0.7m).

However, this increase was partially offset by the decreases in the investments in money market instruments (by \$0.2m) due to the maturity of bonds, loans and receivables by (\$0.2m) and unlisted securities (by \$0.1m).

Unlisted securities continued to dominate the investment portfolio at 35.4 percent followed by listed securities at 33.7 percent, cash and cash equivalents (term deposits) at 18.1 percent, loans and receivables at 3.6 percent and property at 0.7 percent.

#### Liabilities

The combined total liabilities of the MIS market decreased by 18.5 percent (or \$3.0m) over the quarter to \$13.0 million as at 30 September 2023. The fall in total liabilities resulted from a decline in distribution payables (by \$4.8m) and management fee payable (by \$1.1m). However, this increase was partially offset by a rise in redemptions payable (\$2.5m)

and sundry creditors (by \$0.3m).

#### **Liquid Assets**

Liquid assets for MIS market further increased by 4.4 percent (or \$7.9m) to \$185.4 million in the review quarter when compared to \$177.5 million in the prior quarter, largely attributed to the increases in term deposits (by \$4.0m) and cash on hand (by \$3.9m). Total liquid assets were able to cover 47.1 percent of the total unitholders' funds.

Unit repurchases/redemptions increased over the quarter to \$8.8 million (Units redeemed: 7.2m) when compared to \$7.4 million (Units redeemed: 5.9m) in the preceding quarter. Institutional investors continued to record the highest value of repurchases at 73.6 percent (or \$6.5m) followed by retail investors at 26.4 percent (or \$2.3m).

Despite the increase in unit repurchases, the ratios of repurchases to unitholders funds improved to 2.2 times in September 2023 compared to 2.0 times in the prior quarter. On the other hand, the liquid assets to repurchases ratio deteriorated to 21.1 times from 23.9 times recorded in the prior quarter.

#### **Earnings**

The MIS market recorded a net profit of \$1.9 million or the September 2023

quarter compared to a net profit of \$8.8 million in the prior quarter.

The decline in net profit was largely underpinned by a significant decline in investment income by 67.2 percent (or \$6.9m) to \$3.4 million compared to \$10.2 million in the prior quarter. This decline in investment income was mostly attributed to a fall in dividend income (by \$7.0m) to \$1.8 million. Investment expenses for the MIS market remained constant at \$1.4 million over the September 2023 quarter.

Table 4
MIS Combined Income Statement

Quarter	Sep-23	Jun-23	Sep-22	% Change	
Performance (\$M)				Over Qtr.	Over Yr.

Income Tax	0.0	0.0	0.0	-	-
Net Profit after tax	1.9	8.8	2.9	(78.4%)	(34.5%)

Source: MIS Returns

In line with the decrease in investment income, the Annualised Return on investment (AROI)<sup>22</sup> stood at 3.0 percent in the review quarter compared to 9.2 percent in the prior quarter.

#### The Bond Market

The value of bonds outstanding increased by 1.4 percent (or \$82.1m) to \$6.1 billion during the quarter (June 2023: \$6.0b), due to an additional \$142.8 million bond issuance (June 2023: \$120.3m), which outweighed the redemptions of \$60.7 million (June 2023: \$26.1m).

Government bonds continued to grow the fixed income market through the issuance of Fiji Infrastructure Bonds (FIB) (by \$138.0m) and Viti Bonds (by \$4.8m). Bond redemptions were noted for Fiji Development Loan (FDL) of \$27.1 million, FIB of \$25.1 million and FDB of \$8.5 million.

There was no secondary trading of bonds on the SPX in the review quarter.

#### RBF MAINTAINS AN ACCOMMODATIVE MONETARY POLICY STANCE

Statement by the Reserve Bank of Fiji, 26 October 2023

The Reserve Bank of Fiji (RBF) Board maintained the Overnight Policy Rate at 0.25 percent.

The Governor and Board Chairman, Mr Ariff Ali stated that the domestic economy is on track to achieve the envisaged growth for this year on back of strong tourism industry performance. The influx of visitors up to September and the high room rates boosted revenue gains per room sold. In addition, the outlook for the tourism industry remains promising based on forward bookings for October. Aggregate demand remains robust with consumption proxies such as net Value Added Tax (VAT) collections and banks' new consumption lending noting a growth in the review period. Investment activity, although modest, has been improving evident by higher value of work put in place up to June. The outlook for investment activity is positive based on increases in forward looking indicators such as banks' new investment lending and domestic cement sales up to September. In addition, respondents to the July 2023 Business Expectations Survey have indicated plans to invest in new plant and buildings in the next 12 months.

Financial conditions in the economy remain supportive of the recovery process, with the expansion in private sector credit (5.5%) mostly driven by households in September amid the high system-wide liquidity (\$2.3b on 25/10) and historic low lending rates.

The monetary policy objectives remained intact in the review period. The annual headline inflation rate was 2.5 percent in September and is expected to rise in the coming months as the full impact of the increase in VAT and other taxes pass through to final prices. As of 26 October, foreign reserves stood at \$3,495.40 million, sufficient to cover 6.2 months of retained imports, and are expected to remain adequate in the medium term.

Given the steady economic rebound, risk assessment and the outlook on the monetary policy objectives, the Board agreed to maintain the current accommodative monetary stance. The RBF will continue to monitor risks and developments and align monetary policy accordingly.

## RESERVE BANK OF FIJI ANNOUNCES SECONDMENT OF DEPUTY GOVERNOR MASITABUA TO THE INTERNATIONAL MONETARY FUND

Statement by the Reserve Bank of Fiji, 27 October 2023

The Reserve Bank of Fiji (RBF) has announced a two-year secondment of the Deputy Governor, Mr Esala Masitabua, to the International Monetary Fund (IMF). Commencing from 01 November 2023, Mr Masitabua will serve as an Advisor in the Southeast Asia Group at the Fund until 31 October 2025.

Mr Masitabua has over 26 years of central banking experience, having held several senior positions at the RBF. In March 2005, he was promoted to the role of Chief Manager Currency and Corporate Services before being transferred to the Chief Manager Financial Institutions role in February 2010. In April 2013, Mr Masitabua was again provided the opportunity to be exposed to another key oversight role of Chief Manager Financial Markets. from which. acknowledgement of all the leadership roles that he held throughout the years, he was promoted to his current position of Deputy Governor in January 2018.

Mr Masitabua holds a Masters of Business Administration, a Post Graduate Diploma in Economics, and a Post Graduate Certificate in Human Resources Management from the University of the South Pacific and a Bachelor of Commerce Degree from Griffith University, Australia.

During Mr Masitabua's secondment to the IMF, four senior RBF executives will rotate into the Deputy Governor role for six-month tenures. Chief Manager Financial System Development Group, Ms Caroline Waqabaca will act as Deputy Governor until 05 April 2024.

In making the announcement, RBF Governor Mr Ariff Ali, stated that these executive role transitions, align with the Bank's policy of fostering ongoing succession planning and leadership development. The role changes will continue to enhance the Bank's efficiency in fulfilling its crucial role of Leading Fiji to Economic Success.

# FINANCIAL STABILITY OUTLOOK CONTINUES TO BE RESILIENT BUT RISKS REMAIN IN THE HORIZON

Statement by the Reserve Bank of Fiji, 02 November 2023

The Reserve Bank of Fiji (RBF) has today released its Financial Stability Review for 2023, highlighting that the Fijian financial system has remained resilient despite specific challenges that have impacted on global financial stability such as the 2023 March banking stress, the slowdown in global growth and escalation in geopolitical tensions.

The Financial Stability Review outlines the RBF's assessment of the state of, and risks to the stability of the Fijian financial system by assessing how developments in the global and domestic markets affect the financial health of Fiji's households and businesses, and the financial performance and soundness of financial institutions in Fiji. Risks to the Fijian financial are monitored though the regulatory assessments of seven (7) key areas of: global environment; macroeconomic risks; credit risk; market and liquidity risk; systemically important financial institutions (SIFI) risk; risk appetite and; capital & profitability.

RBF Governor, Mr Ariff Ali in releasing the 2023 Financial Stability Review states that "while credit risk remains the major area of concern for the banking industry, the Fijian financial system remains strong and well capitalised. However, risks remain slightly

elevated, in view of the consequences of fiscal measures announced in the FY 2023-2024 National Budget, and the implications these may have on general economic sentiments and especially households' disposable income and debt serviceability in the short to medium term".

Ensuring financial stability is one of the two key stability mandates of the RBF and the ongoing publication of its Financial Stability Reviews brings to the fore its important role as the regulator of the Fijian financial system. Commentaries on pertinent issues regarding the safety and soundness of systemically important financial institutions, measures taken by the RBF to manage the impact of the COVID-19 pandemic, results of the system-wide stress tests conducted to assess banking sector resilience, and the results of the Credit Conditions Survey undertaken in 2023, are also part of the 2023 Financial Stability Review and should be of interest to those who wish to better financial understand how stability maintained by the RBF.

The 2023 Financial Stability Review is available on the RBF website at www.rbf.gov.fj

#### RESERVE BANK OF FIJI RELEASES 2022 INSURANCE ANNUAL REPORT

Statement by the Reserve Bank of Fiji, 21 November 2023

The 2022 Insurance Annual Report was tabled in Parliament on 20 November 2023 by the Honourable Deputy Prime Minister and Minister for Finance, Professor Biman Chand Prasad. The Report provides an overview of the performance of the Fijian insurance industry in 2022, with a reflection of key developments in the global insurance industry.

The Governor of the Reserve Bank of Fiji, Mr Ariff Ali stated that the global insurance and reinsurance market remained resilient despite recording above-average levels of insured losses on the back of economic factors such as high inflation rates, accumulation of asset values, urbanisation and rising population, as well as, weather and climate-related events such as prolonged droughts, scorching heatwaves, and severe cyclones and flooding.

On the domestic front, Mr Ali said that the Fijian insurance industry was assessed as resilient in 2022, with adequate solvency and liquidity positions, and positive profitability, supported by economic recovery and the absence of major catastrophes. The domestic gross premium pool continued to grow and stood at \$409.9 million in 2022, equivalent to 3.8 percent of Fiji's GDP.

The Fijian insurance industry's total assets

grew by 8.4 percent to \$2.5 billion. Total assets of life insurers expanded by 8.5 percent to \$1.9 billion, with the general insurance sector's assets increasing by 7.9 percent to \$551.2 million. The combined net profit after tax of the life and general insurance sectors stood at \$49.0 million. General insurers' recorded a profit of \$32.8 million, while life insurers' reported a profit of \$16.2 million.

Governor Ali further remarked that having resilience demonstrated strength and throughout the pandemic, the insurance industry must continue to be innovative and responsive to the needs and expectations of Sustaining growth consumers. without sacrificing profitability will be a challenge, with climate change impacting risk profiles, and customers expecting tailor made products. Entities that focus on technology led innovation but remain customer centric, will continue to succeed.

The Reserve Bank remains grateful to the insurance industry and relevant stakeholders, for their ongoing collaboration in supporting the Reserve Bank's regulatory role.

The 2022 Insurance Annual Report is available on the RBF website at www.rbf.gov.fi.

# STATEMENT BY THE CHAIRMAN OF THE MACROECONOMIC COMMITTEE AND GOVERNOR OF THE RESERVE BANK OF FIJI

### **REVISIONS TO GDP FORECAST: 2023-26**

Statement by the Reserve Bank of Fiji, 22 November 2023

The post-pandemic economic recovery in Fiji is now complete as the economy has returned to the 2019 level of GDP. This year, the Fijian economy is projected to expand by 8.2 percent, an upgrade from the 8.0 percent growth expected earlier.

The upward revision reflects the exceptional recovery in the tourism industry as up to October this year, 772,172 tourists graced our shores, around 3.0 percent higher than the same period in 2019. By the end of the year, visitor arrivals are expected to be 4.0 percent higher than 2019 and reach a new record of 930,165 visitors. The spillover of higher tourist arrivals increased consumption spending and boosted aggregate demand. Investment spending has also been rising, although at a relatively gradual pace. In contrast, the natural resource sectors continue to show dismal performance and have been a drag on growth. Sugar, mineral water, gold and the forestry sector outputs noted annual contractions so far into the year due to industry-specific supply side issues.

Over the medium term, economic growth is expected to return to trend. The current capacity constraints in the tourism industry is expected to keep annual visitor arrivals growth at around 3.0 percent, slightly lower than the trend before the pandemic. However, investment spending is expected to fast-track from next year due to more clarity on taxes and incentives, pent-up demand from the pandemic and continuous improvements in the local

business environment. As a result, the economy is projected to grow by 3.4 percent in 2024 and a further 3.0 percent in 2025-26. The services and industrial sectors are expected to be the leading drivers of growth while the primary sectors is expected to remain broadly flat.

Despite the positive outlook, there are downside risks. The global economic outlook remains fragile as it suffers from weak demand, slowdown in China, tight labour markets, rising commodity prices and elevated inflation. Domestically, ongoing capacity constraints in the tourism industry, loss of skilled labour due to high emigration, increasing cost of doing business and the constant threat from natural disasters and climate change can easily disrupt the growth projections going forward.

Over the medium to long term, higher-thantrend growth is required to compensate for the lost economic outputs in 2020-21 and to rebuild fiscal buffers for future economic shocks. Fasttracking structural reforms related to ease of doing business, improving capacity constraints in the tourism industry, addressing the push factors behind high emigration and raising productivity are key policy priorities for unlocking further growth potential.

The next review of the GDP forecasts will be before the 2024-25 National Budget. outputs and looks forward to their ongoing support in the 2023-2024 financial year.

#### For the Record

#### RBF MAINTAINS ACCOMMODATIVE MONETARY POLICY STANCE

Statement by the Reserve Bank of Fiji, 27 November 2023

The Reserve Bank of Fiji (RBF) Governor, Ariff Ali, announced the go live of the new National Payment System's (NPS) Automated Clearing House (ACH) today. The ACH is part of ongoing efforts to reform the payment system and marks an important milestone in modernising the way we do business in Fiji. This go live represents a culmination of the industry and the RBF's collective efforts over the last three years to digitally transform Fiji's payment system with the objective of increased efficiency to support the economy.

The ACH is the second of two major components introduced, the first being the Real Time Gross Settlement System (RTGS) and Central Securities Depository, that was launched in November 2022. Following this go live, bank customers are expected to be able to carry out instant interbank transactions (up to a specified limit) i.e. transactions between one Bank to another, 24 hours a day, 7 days a week. This will be applicable for those banks that have implemented straight-through processing in their own environment. The ACH will enable enhanced efficiency across the financial and real sectors, thereby supporting economic activity.

"The second phase of the NPS project is an exciting opportunity for the banks and customers to see the effects of having a payment system that provides reliable, fast and efficient exchange of funds within a reasonable timeframe." said Mr Shane Smith, Westpac Fiji Chief Executive.

BSP Country Head and current Association of Banks (ABIF) in Fiji Chairman, Mr Haroon Ali praised the recent achievement in the ongoing NPS Project stating, "All Fijians will enjoy the wide-ranging benefits of the ACH facility thanks to the collaborative effort led by the Central Bank and its partners. Some significant advantages it delivers include the immediate availability and readiness of funds for transactions between customers, irrespective of whether these occur within or outside standard business hours. For instance, individuals can promptly access their wages/salaries, and utilise them on the same day. Similarly, small businesses can expect improved cash flow management with the elimination of processing delays."

Businesses are expected to see efficiencies in operations due to reduced cash handling costs, increased speed of operations, quicker and improved payment processing due to interoperability between the Banks and the implementation of straight-through processing.

The system will form the pipeline for channelling approximately \$200 billion worth of transactions annually. In commissioning the system, the Governor stated that "increased interoperability is fundamental to driving payments efficiency. We saw a dramatic increase in transactions with the launch of the upgraded RTGS and anticipate this to grow even further within the first few months after this go live. This improved infrastructure will help bolster business and retail transactions since it has the potential to handle increased volumes of digital payments seamlessly."

The RBF, with the assistance of its development partner, International Finance Corporation, a member of the World Bank Group, has extensively consulted and collaborated with the ABIF and Montran Corporation, the vendors of the system, on the

business processes, technology and infrastructure to enable a successful go live.

The Governor expressed appreciation to all stakeholders who contributed towards the project. He stated that the RBF will continue its collaboration with the wider industry in the

upcoming months for the interoperability of Mobile Wallets to Bank Accounts, which is expected to bring further enhancements and seamless payments within the system. The RBF will also begin the awareness on phasing out of cheques shortly after the onboarding of the Mobile Network Operators.

#### For the Record

# RESERVE BANK OF FIJI RELEASES AUGUST 2022 – JULY 2023 ANNUAL REPORT

Statement by the Reserve Bank of Fiji, 28 November 2023

The Honourable Deputy Prime Minister and Minister for Finance, Strategic Planning, National Development and Statistics, Professor Biman Prasad, tabled the 2022-23 financial year (FY) Annual Report of the Reserve Bank of Fiji (RBF) in Parliament on 24 November 2023. The report details the audited accounts and operations of the RBF for the period August 2022-July 2023.

Commenting on the publication, Governor Ariff Ali stated that the annual report provides a comprehensive overview of the RBF's initiatives in safeguarding its core mandates. He highlighted that the RBF has contributed immensely towards the post-pandemic recovery of the domestic economy through conventional and unconventional measures. The monetary policy stance was kept accommodative throughout the FY to ease any liquidity constraints and facilitate the necessary credit support required by Fijians to regain their footing and expand. In terms of the Bank's monetary policy objectives, the 2022-23 FY annual average headline inflation moderated to 2.7 percent from 3.1 percent noted in the 2021-22 FY, while foreign reserves were at adequate levels of \$3.6 billion, equivalent to 6.3 months of retained imports cover at the end of the FY (July 2023). Regarding economic growth, an expansion of 8.2 percent is now estimated for 2023, following a solid post-pandemic recovery of 20.0 percent in 2022.

The banking sector remained well capitalised and maintained satisfactory liquidity and earnings positions to buffer against the marginal performance of asset quality. The insurance industry also remained resilient, aided by the absence of natural disasters, and sustained appropriate solvency positions as well as satisfactory earnings and liquidity levels. The Fiji National Provident Fund also maintained its solvency levels above the minimum statutory requirement.

The RBF's annual report highlights its efforts to promote innovation and dynamism in the financial Among system. its major achievements is the RBF's collaboration with multiple stakeholders to reform the National Payment System (NPS). The objective is to provide seamless payment experiences to the people of Fiji while promoting investment and innovation opportunities in various economic sectors. In September 2022, the 2021 NPS Act and the 2022 NPS Regulations came into effect. and in November 2022, the upgraded Real Time Gross Settlement and Central Securities Depository were launched. Furthermore, the Bank continued efforts in the FinTech Regulatory Sandbox space to facilitate the testing and entry of new digital financial products and players during the FY.

The RBF is also working on climate-related initiatives and has hosted awareness sessions on the Climate Change Act 2021 for its supervised entities. Additionally, the Bank has supported businesses engaged in the renewable energy sector through its Import Substitution and Export Finance Facility.

This year, the RBF celebrates its five decades of existence and acknowledges the collective contribution, dedication, and unwavering support of its staff, management, Board, and key stakeholders. The RBF continues to play its part in shaping a prosperous and stable future for the country, and it is grateful to everyone who has been a part of this journey.

#### For the Record

#### RBF MAINTAINS AN ACCOMMODATIVE MONETARY POLICY STANCE

Statement by the Reserve Bank of Fiji, 07 December 2023

The Reserve Bank of Fiji (RBF) Board decided to maintain the Overnight Policy Rate at 0.25 percent at its meeting on 07 December.

The Governor and Board Chairman, Mr Ariff Ali, stated that the accommodative monetary policy stance remains appropriate given the downward revision to the 2024 growth forecast. The Fijian economy has fully recovered from the pandemic, one year earlier than projected following the very promising recovery in the tourism industry and its positive flow-on effects to other sectors. Based on the recent data on tourism activity as well as consumption and investment indicators, the economy is projected to grow by 8.2 percent in 2023.

The Governor added that the financial sector continues to support domestic economic activity, with private sector credit expanding by 5.9 percent in October due to higher lending to business entities and households. Liquidity in the banking system was adequate at around \$2.2 billion (05/12), keeping interest rates at

historic lows.

On RBF's twin monetary policy objectives, Mr Ali mentioned that the annual headline inflation was 5.8 percent in November as higher prices were recorded across most categories with year-end inflation projected to be around 6.0 percent. However, annual average inflation is expected to moderate to around 3.6 percent in 2024. As of 06 December, foreign reserves stood at around \$3.4 billion, sufficient to cover 5.7 months of retained imports of goods and services and are projected to remain adequate over the medium term.

The Governor concluded that despite the slowdown in global growth, Fiji's macroeconomic growth prospects are positive, and the outlook for RBF's twin monetary policy objectives are within comfortable levels. The RBF will continue to monitor global and domestic economic developments and their implications on the current outlook and align monetary policy accordingly.

<sup>11</sup> The Monetary & Credit Aggregates table is derived from the Central Bank Survey (CBS) (Table 3) and Other Depository Corporations Survey (ODCS) (Table 2).

<sup>&</sup>lt;sup>2</sup> Monetary base is normally referred to as reserve money and its components include currency in circulation, ODCS deposits at the Reserve Bank and other deposits of other financial corporations.

<sup>3</sup> As of May 2012, the official definition of broad money has changed to include securities of money issuers. As a result, M3 will now be known as broad money.

Note:

The Statutory Reserve Deposit is derived as 10 percent of commercial banks' deposits and similar liabilities at the end of the previous month.
 From 1996, demand deposits include funds placed in the Trust Account established for re-financing NBF Asset Management Bank.
 Currency with non-bank public was revised from 2001-October 2015.

<sup>4</sup>th Held outside of the banking system.
5th Differences, if any, in total assets and liabilities are due to rounding off.

Note:

 $<sup>^{1/} \</sup>textit{Commercial banks liabilities reported in the table include both local and foreign currency denominated liabilities}.$ 

 $<sup>^{2/}</sup>$  Previously reported as demand deposits.

<sup>&</sup>lt;sup>3/</sup>Previously reported as Local Government.

<sup>4</sup> Previously reported as Statutory Bodies.
5 Includes both savings and time deposits.

<sup>6/</sup> Includes local bills payable.

<sup>7&#</sup>x27; Under Non-Residents, previously reported balance to banks abroad has been separated into transferable and other deposits, while foreign bills payable is classified under others.

\*\* Differences, if any, in total assets and liabilities are due to rounding off.

Note:

<sup>&</sup>lt;sup>1</sup> As defined under the Section 43 of the RBF Act. Since 1996, when the National Bank of Fiji Restructuring Act became effective, Section 31 exempts the NBF Assets Management Bank from holding Statutory Reserve Deposit and Unimpaired Liquid Asset.

<sup>&</sup>lt;sup>2</sup> Balances at the end of the review month.

<sup>3</sup> Refers to the total only and not individual items. The total is derived as 10% of commercial banks deposits and similar liabilities at the end of the previous month.

 $<sup>^{4\</sup>prime}$  Balances of deposits and related liabilities as at the end of the previous month.

Note:

n.i.- no issue n.t. - no trade <sup>1/</sup>Represents monthly weighted average rate.

<sup>&</sup>lt;sup>2/</sup> Prior to October 2006, Minimum Lending Rate (MLR) = Repurchase Facility Rate (Policy Indicator Rate + 100 basis points). From October 2006, MLR = Policy Indicator Rate + 100 basis points and Repurchase Facility Rate = latest weighted average overnight interbank rate + 100 basis points. From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 5 percentage points). From January 2009, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).

Note:

Note:

1. Subject to rounding off.

Investment data as a percent of GDP from 1980-1988 is based on nominal GDP derived under the 1977 base, data from 1989-1994 reflect nominal GDP derived under the 1989 base, data from 2005-2007 reflect nominal GDP derived under the 1989 base, data from 2005-2007 reflect nominal GDP derived under the 2005 base, data from 2008-2010 reflect nominal GDP derived under the 2011 base while data from 2014 onwards is based on nominal GDP derived under the 2014 base.
