OVERVIEW¹

Global growth for 2024 is anticipated to continue at a steady pace in the near term. The International Monetary Fund (IMF) July World Economic Outlook (WEO) report forecasts global economic growth to remain at 3.2 percent in 2024² and 3.3 percent in 2025. This growth reflects the expected expansion in advanced economies driven by narrowing output gaps over the medium term. However, the WEO also highlights that the progress on disinflation was slowing, with increased risks from renewed trade and geopolitical tensions potentially leading to prolonged interest rates.

On the domestic front, moderate performance in Fiji's economy has led to a downward revision of the economic growth rate for 2024 to 2.8 percent (from 3.4%). The growth in 2024 is underpinned by the finance, agriculture, transportation, accommodation, wholesale & retail sales, manufacturing, information & communication, electricity, construction, mining and administration sectors. However, an increase in economic activity by 3.0 percent is expected in 2025.

Sectoral performances were mixed in the first half of the year as revealed by recent economic indicators. The tourism sector performed better-than-expected with visitor arrivals up by 7.0 percent to 447,155 in the year to June. Similarly, the sugar industry experienced growth with a favourable start to the 2024 crushing season. Both cane (11.5% to 366,039 tonnes) and sugar production (23.4% to 30,749 tonnes)³ increased significantly owing to favourable weather

conditions. Gold production rebounded (33.5% to 13,942 ounces) in the review period boosted by the Tuvatu gold project and higher electricity production continued to reflect increased demand. In contrast mineral water production and the forestry industry continued to underperform due to supply issues and sector-specific challenges.

Looking at partial indicators of consumption activity Net VAT collections increased (38.3% to \$663.5m) cumulative to June, higher than 30.4 percent when compared to the same period in 2023, largely reflecting the higher VAT rate. Commercial banks' new consumption-related loans (excluding refinance). leading indicator a consumption activity, grew by 24.1 percent \$863.6 million. Additionally, Wholesale and Retail Trade (WRT) Survey revealed an annual increase (3.7%) over the March 2024 quarter, although lower in comparison to the 2023 period. However, the WRT's real⁴ growth, increased by a mere 0.3 percent in the same quarter due to higher prices.

Investment activity noted a gradual improvement over the year to June. A forward-looking indicator, new credit for investment purposes (excluding refinance), rose by 20.3 percent (to \$448.1m) cumulative to June, implying higher prices and somewhat infers the recovery in investor confidence. In tandem, domestic cement sales rose by 9.7 percent cumulative to June as pending and new construction projects commenced.

1

-

¹ Data comparison periods vary.

² Unchanged from the IMF's April assessment.

³ As of 22 July 2024.

⁴ Adjusted for inflation.

Labour market pressures have eased slightly but remain tight. This was evident in a slight decline in the number of jobs advertised (-1.1%)⁵ cumulative to June, indicating that businesses are adjusting their strategies against rising operational costs. disposable Moreover. incomes increased, evidenced by higher Pay As You Earn (28.6%) tax collections in the year to reflecting retention efforts June. businesses. Conversely, resident departures for employment, education, emigration and other purposes noted an annual decline (-32.9%) cumulative to June although higher compared to pre-pandemic levels.

On the prices front, the annual headline inflation rate remained high, rising by 6.7 percent in June 2024. This was attributed to higher prices for food and non-alcoholic beverages, alcoholic beverages, tobacco & narcotics, transport, housing & utilities, restaurants & hotels, furnishing, health and miscellaneous categories. The year-end inflation is expected to be around 4.0 to 5.0 percent in 2024 as the impact of VAT increase is anticipated to drop out from calculations later this year.

Financial sector conditions remained stable, supported by adequate liquidity, resulting in a low-interest rate environment. However, Banks' Demand Deposits (BDD) fell over the year to June by 22.5 percent to \$1,913.3 million, largely due to declining foreign

reserves (-4.9%, \$169.6m). Broad money rose over the year to June, led by increased private sector credit which accelerated to 11.3 percent, the highest since July 2017, which more than offset the contraction in Net Foreign Assets (NFA).

On the external front, cumulative to April 2024, Fiji's trade deficit⁶ widened marginally (0.6% to \$1,391.3m) as imports growth rebounded, countering the pace of growth in exports. Inward personal remittances grew by 5.2 percent to \$508.1 million cumulative to May with bulk of the funds being channelled via mobile network operators and foreign exchange dealers. On the same note, tourism earnings increased and was estimated at \$490.7 million in the first quarter of 2024 led by higher visitor arrivals and average daily spending by tourists (i.e. higher per-diems).

Foreign reserves (Reserve Bank of Fiji (RBF) holdings) stood at \$3,304.5 million in June 2024, covering 5.4 months of retained imports (MORI) and is forecast to remain adequate in the medium term.

The outlook for inflation and foreign reserves remained within comfortable range. Consequently, the RBF Board chose to keep its monetary policy stance unchanged, maintaining the overnight policy rate at 0.25 percent in the June quarter to support economic growth.

_

⁵ RBF Job Advertisements Survey

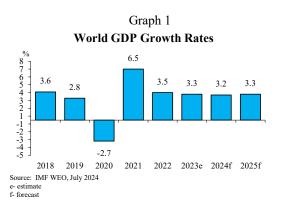

⁶ Trade deficit (value of imports exceeding the value of exports) excluding aircraft.

THE INTERNATIONAL ECONOMY

International Economic Conditions

global economy remains steady; however, medium-term growth prospects are still below trend. In its July WEO report, the IMF maintained its global growth forecast at 3.2 percent for 2024 while slightly revising upwards to 3.37 percent for 2025 (Graph 1). Growth in major advanced economies is becoming more synchronised as output gaps narrow. The United States (US) is showing signs of slowing down particularly in the labour market following robust growth in 2023. In contrast the Euro Area is expected recover after a nearly stagnant performance last year. Asia's emerging market economies continue to drive the world economy, mainly led by India and China, whose growth forecasts have been revised upward. However the outlook for the next five years is less optimistic due to decreasing momentum in emerging Asia.

Global inflation continues to ease although at a slower pace. For advanced economies, the momentum of global disinflation is forecast to slow in 2024 and 2025, driven by persistent services inflation alongside elevated commodity price expectations. Inflation is projected to remain higher in Emerging Market Developing Economies (EMDEs) than Advanced Economies.

Many of Fiji's major trading partner economies (TPEs) noted moderate growth in quarter one, except for an economic contraction in Japan. The US economy expanded by an annualised 2.8 percent in the second quarter of 2024, while China's economy grew by 0.7 percent (seasonally adjusted) respectively over the same period but remained affected by multiple headwinds such as weak consumption, high government debt, and ongoing property market weakness. Australia and New Zealand registered lower growth at 0.1 percent and 0.2 percent, respectively, in the March quarter. The Euro Area grew by 0.3 percent in quarter one, whereas the Indian economy expanded by 1.9 percent in the same period. On the other hand, the Japanese economy contracted by 0.5 percent in quarter one, underpinned by weak private consumption as consumers continued to reduce their spending due to

_

 $^{^{7}}$ A 0.1 percentage point (pp) increase from the April WEO forecast.

high prices and sluggish wages. Most TPEs' unemployment rate remains low, reflecting tight labour market conditions.

Headline annual inflation various in economies is gradually easing towards respective central bank target ranges. The inflation rate in New Zealand slowed to 3.3 percent in the second quarter of 2024, from 4.0 percent in the previous quarter, gradually moving towards the central bank's target range of 1-3 percent. In Australia, the annual inflation rate stood at 3.6 percent in the March quarter compared to 4.1 percent in the prior quarter. For the Euro area, annual inflation was 2.5 percent in June, slightly lower than 2.4 percent in March. In the US, the annual inflation rate receded to 3.0 percent in June from the 3.5 percent recorded in March. On the other hand, prices increased modestly in China and India to 0.2 percent and 5.1 percent, respectively, in June. Japan's inflation rate remained unchanged at 2.8 percent in May from March.

Given inflation outcomes, most TPEs' central banks left their key policy interest rates unchanged in the second quarter of 2024 (Table 1), except for the European Central

Bank, which lowered its key interest rates (by 25 basis points) in June. On the contrary, the Bank of Japan had maintained its rates to 0-0.10 percent range that it set in the March quarter by ending its eight years of negative rates.

Table 1 **TPEs' Policy Interest Rates**

Source: Various Central Bank websites

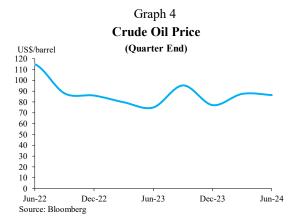

Commodity prices noted mixed outcomes in the second quarter (June-end vs March-end), with sugar and Brent crude oil prices falling. In contrast, gold and food prices rose, impacted by geopolitical tensions and supply conditions in the review period. World market sugar⁸ prices fell significantly by 9.9 percent to US20.30 cents per pound in June compared to March, amid improved production expectations from India and robust sugar output in Brazil. (Graph 2).

Gold prices⁹ rose to a month-end high of US\$2,339.60 per fine ounce (oz.) in June, 4.5 percent higher than in March, underpinned by expectations of the Federal Reserve cutting interest rates in September 2024. Moreover, intensified geopolitical tensions and strong demand from central banks, led by China, have also contributed to the rise in prices (Graph 3).

The price of **Brent crude oil price** declined slightly by 1.2 percent to US\$86.41 per barrel in June compared to the March outcome. Higher than expected Russian crude production over the quarter offset the decrease in OPEC¹⁰ output and drove the ease in prices (Graph 4).

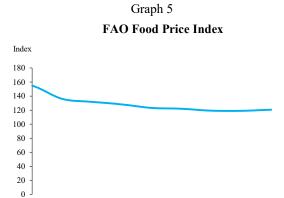

⁸ Month-end world market sugar prices per the New York No. 11 benchmark.

⁹ Gold prices recorded an all-time month-end high in May (US\$2,345.8 per fine ounce).

¹⁰ Organisation of the Petroleum Exporting Countries.

Global food prices¹¹ rose by 1.3 percent to 120.6 points in June from March, underpinned by higher prices for meat, dairy, cereals, and vegetable oil, while sugar prices fell in the review period. Despite the uptick, the indices for food prices remained low at 2.1 percent compared to a year ago and 24.8 percent below their peak in March 2022 (Graph 5).

¹¹ As measured by the United Nations Food and Agriculture Organisation (FAO) Food Price Index.

THE DOMESTIC ECONOMY

Domestic Economic Conditions

The Fijian economy is projected to grow by 2.8 percent in 2024, a downward revision from 3.4 percent¹² (Graph 6). Sectors such as finance, agriculture, transportation, accommodation, wholesale & retail sales, information manufacturing. communication, electricity, construction, mining and administration are projected to underpin growth in 2024.

Sources: FBOS and Macroeconomic Committee

- r revised
- p provisional f - forecast

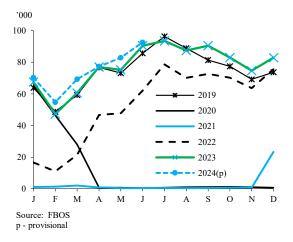

Going forward, the pace of domestic economic growth is projected to continue hovering around the pre-pandemic average growth trend of 3.0 percent in 2025 and 2026, respectively.

Production

Sectoral production in the June quarter has been mixed, based on the latest economic indicators.

comparable period in 2023. New Zealand contributed around 1.5 percentage points (pp) to the overall growth, followed by USA (1.4pp), China (1.3pp) and Australia (1.1pp).Graph 7 **Monthly Visitor Arrivals**

In the year to June, visitor arrivals increased by 7.0 percent to 447,155 tourists (Graph 7), up from 417,852 visitors in the

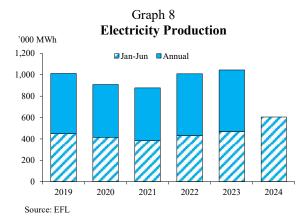

The sugar industry noted a positive start to the 2024 crushing season¹³ compared to that in 2023. As of 22 July, both cane (11.5% to 366,039 tonnes) and sugar (23.4% to 30,749 tonnes) productions were high, largely due to favourable weather conditions.

For the energy sector, electricity generated by the Energy Fiji Limited (EFL) totalled 604,384 Megawatt hours (MWh), a 10.7 percent increase in the year to June when compared to the same period last year

¹² Forecasts reviewed in November 2023 and June 2024.

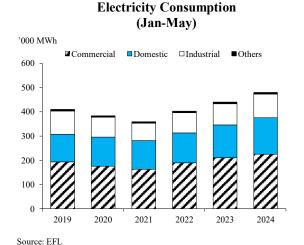

¹³ Labasa and Lautoka mills commenced operations on 17 June while Rarawai mill began crushing on 24 June.

(Graph 8). Renewable energy sources accounted for 63.8 percent of total electricity generated, higher than the 53.2 percent recorded cumulative to June last year.

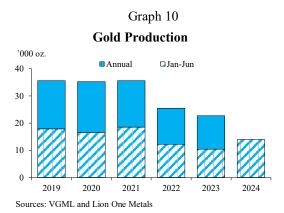

Similarly, electricity consumption rose by 9.2 percent (to 479,913 MWh) cumulative to May, mainly due to increased demand from industrial (11.4%), domestic (11.3%), and commercial (7.1%) consumers (Graph 9).

Graph 9

In the year to June, gold production rebounded as output was boosted with the commencement¹⁴ of Lion One's Tuvatu

Gold project. Gold production expanded by 33.5 percent to 13,942 ounces following a 14.7 percent decline noted by VGML¹⁵ alone in the same period a year ago (Graph 10). Mineral water production on the other hand, fell in the same period (-16.8%) due to calibration works in the expanded facility by a key industry player.

The forestry industry's performance was muted so far into the year. Cumulative to June, pinewood supply fell by 32.3 percent (to 49,854 tonnes), mainly attributed to supply sustainability issues of pulp wood. This resulted in the decline in sawn timber (-3.7%) leading to a lower production of 9,387 cubic metres (m³), in comparison to the 9,748 m³ produced in the comparative previous period, while wood chip production decreased by 10.6 percent (to 67,538 tonnes) as a result of decrease in pulp production. Similarly, mahogany production contracted by 4.7 percent to 9,634 m³ in the first half of 2024, mostly owing to a decline in demand from local buyers.

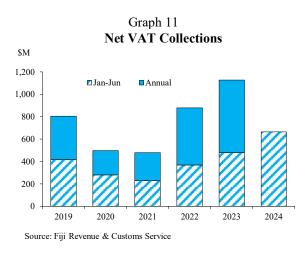

Consumption

During the first half of the year, partial indicators reveal an improvement in consumption activity amid higher prices.

¹⁴ Gold production at Tuvatu gold mines started in December 2023.

¹⁵ Vatukoula Gold Mine Limited.

Net Value Added Tax (VAT) collections rose by 38.3 percent (to \$663.5m) cumulative to June, as higher domestic (35.2% to \$415.3m) and customs import VAT (54.0% to \$419.6m), more-thanoffset the increase in refunds (67.3% to \$175.9m) (Graph 11).16 Additionally, the Wholesale and Retail Trade (WRT) Survey¹⁷ revealed that total sales/service income increased annually by 3.7 percent to \$1,609 million in the March 2024 quarter, although lower in comparison to the comparative 2023 period (21.3%). However, in real terms, the WRT's sales income merely grew by 0.3 percent in the same quarter due to high prices.

Commercial banks' new consumption-related loans, a leading indicator of consumption activity, grew¹⁸ by 24.1 percent to a cumulative total of \$863.6 million by June, driven by increased disbursement of new loans to the wholesale and retail sector (22.0%) which amounted to \$739.6 million.

Likewise, total vehicles registered increased by 20.2 percent (compared to a

14.4% contraction a year ago) cumulative to June 2024, primarily due to a substantial rise in second-hand private vehicle registrations.

Investment

Investment activity noted a gradual recovery in the second quarter, with recent forward-looking indicators suggesting an improvement in activity.

New credit for investment purposes rose by 20.3 percent cumulative to June (to \$448.1m), underpinned by higher credit to the building & construction sector (+82.7% to \$158.6m). Although possibly reflecting higher prices, the rise in new loans somewhat infers investor confidence is beginning to recover.

In tandem, domestic cement sales grew by 9.7 percent in the year to June, partly driven by increases in bulk buying due to the commencement of pending and new construction projects.

However, the estimated value of work putin-place¹⁹, a measure of construction activity, was lower (by -16.9% to \$122.0m) on an annual basis in March due to lower uptake of private (-22.5%) and public (-9.0%) construction works.

Building material prices in the June 2024 quarter rose slightly (0.4%) on a quarterly basis. Higher prices of electrical products and cement & related materials more-than-offset the fall in prices of plumbing ware, floor & wall tiles and iron & steel (Graph 12). However, prices contracted (-0.8%)

¹⁶ The VAT rate on non-essential items increased from 9 percent to 15 percent since 1 August 2023.

¹⁷ This survey is undertaken by the Fiji Bureau of Statistics on a quarterly basis.

¹⁸ Excluding refinancing, in order to gauge appetite for fresh loans.

¹⁹ Lagged Data

on average in the year to June, largely due to the decline in prices of cement-related materials.²⁰

Graph 12 **Building Material Prices Index** Index 140 135 130 125 120 115 110 105 100 Dec-21 Jun-22 Dec-22 Jun-24 Source: FBOS

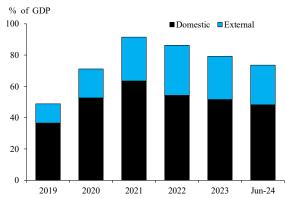

Building permits issued²¹ – a forward-looking indicator – increased on a quarterly basis, both in number (29.9%), and real value (21.5%), in the March 2024 quarter. The number and nominal value of building permits issued also rose (195.5% and 65.3%, respectively) on an annual basis in March, indicative of a pickup in construction activity going forward.

Going forward, the initiatives announced in the fiscal year 2024-25 National Budget is expected to stimulate economic activity.

Public Finance

Government debt stood at \$10,016.9 million in June 2024, or 73.6 percent of GDP²² (Graph 13). Domestically denominated debt totalled \$6,573.3 million (48.3% of GDP), while external debt stood at \$3,443.6 million (25.3% of GDP).

Graph 13
Government Debt

Sources: Ministry of Finance, Strategic Planning, National Development and Statistics, RBF

Labour Market

Labour market pressures have eased slightly but remain tight. According to the RBF Job Advertisement Survey, the number of jobs advertised fell by 1.1 percent cumulative to June, compared to an increase (35.1%) in the comparative previous year (Graph 14). Sectors such as the community, social & personal services; wholesale & retail trade; electricity & water; and finance & real estate recorded a decline in recruitment intentions. The trend implies that businesses are adjusting hiring strategies to the rising operational costs amidst higher input costs. However, job openings for the agriculture, forestry & fishing, construction, and transport, storage & communication sectors were higher.

Moreover, disposable incomes rose as reflected by higher Pay As You Earn (28.6%) collections in the year to June, which surpassed the 17.1 percent growth noted in the previous corresponding period.

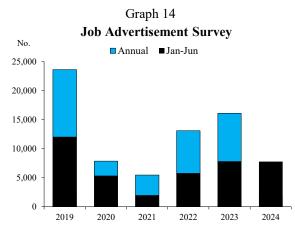

²⁰ This is based on the new 2019 BMPI base.

²¹ Lagged Data

²² Based on Nominal GDP.

The rise is indicative of retention efforts by businesses given the ongoing skilled labour migration and high cost of living environment.

Conversely, cumulative to June, data showed a decline²³ in the overseas movement of Fijian citizens, specifically, resident departures for employment (-22.1% to 3,327 citizens), and emigration (-22.8%). Notably, of the 3,327 departures, 47.8 percent had departed under various labour mobility schemes.

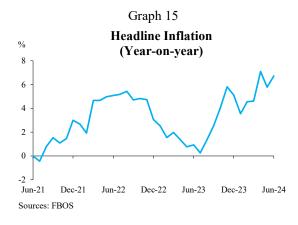

Sources: The Fiji Times and Fiji Sun

Inflation

The annual headline inflation rate in June rose to 6.7 percent, from 4.6 percent recorded in March. The outcome was underpinned by higher prices in the food and non-alcoholic beverages, alcoholic beverages, tobacco & narcotics, transport, housing utilities, restaurants & hotels, furnishings, health, and miscellaneous categories (Graph 15).

²⁴ A slight upward forecast (from 3.0%), factoring actual inflation outcomes in the first five months of the year coupled with the latest oil price futures.

Inflation is projected to remain around 4.0-5.0 percent²⁴ by the end of 2024, while the volatility in global oil and commodity prices due to geopolitical and supply factors, coupled with the impact of policies in the recent National Budget (e.g. the 5% increase of excise duty on alcohol and tobacco products), will continue to influence consumer prices.

External Sector

In the year to April, Fiji's merchandise trade deficit (excluding aircraft)²⁵ deteriorated by an annual 0.6 percent to a deficit of \$1,391.3 million. The slight widening of the deficit is attributed to the pick-up in imports which more than offset the growth in exports. However, this outcome is better than the 11.7 percent deterioration in the trade balance over the same period in 2023.

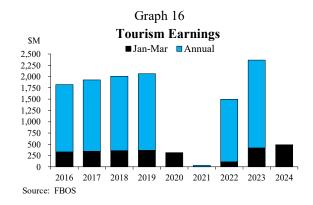

Total merchandise exports (excluding aircraft) in the review period rose by 6.3 percent to \$712.9 million, decelerating in

²⁵ Trade deficit (value of imports exceeding the value of exports) excluding aircraft.

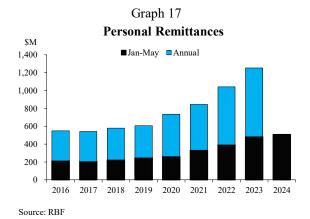

comparison to the same period last year (22.7%) due to a slowdown in re-exports of mineral fuel. However, re-exports continued to boost growth this year (4.8pp), led by machinery, transport equipment, and fresh fish re-exports, complemented by domestic exports (1.4pp), driven primarily by gold, sugar, kava, and dalo exports.

Meanwhile, imports (excluding aircraft) grew by 2.5 percent to \$2,104.1 million, slower than the growth of 15.1 percent noted in the corresponding period last year. The increase was driven by higher imports of machinery & transport equipment, manufactured goods, and food & live animal categories, which offset the contraction in mineral fuel imports.

In the first quarter of 2024, estimated earnings from tourism were \$490.7 million, which was 16.7 percent higher than that in the same period in 2023 (Graph 16). Higher visitor arrivals and average daily spending by tourists (i.e. higher per-diems) led the growth.

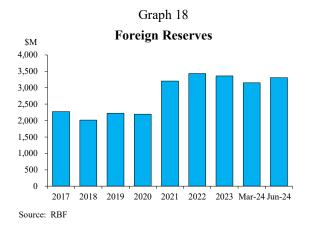

Inward remittances cumulative to May 2024 grew by 5.2 percent to \$508.1 million, compared to a 23.9 percent expansion in the comparable 2023 period (Graph 17). Higher personal transfers led the growth.

In terms of transfer channels, mobile money (45.9%) constitutes the largest share of the mode of inward remittance transfer, followed by foreign exchange dealers (35.5%) and commercial banks (18.6%).

Foreign reserves (RBF holdings) settled at \$3,304.5 million (5.4 MORI) at the end of June 2024. This was an improvement of \$157.7 million from the March quarter (\$3,146.8m) as inflows surpassed the outflows during the period (Graph 18). Government grants and strong tourism receipts supported total inflows during the June quarter, which more than offset total outflows. Foreign reserves are forecast to remain adequate in the medium term.

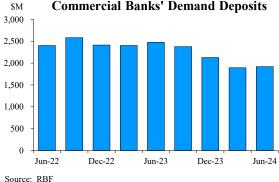

Domestic Financial Conditions

During the June quarter, the RBF maintained an accommodative monetary policy stance by keeping the overnight policy rate at 0.25 percent and ensuring sufficient liquidity.

Excess liquidity in the banking system, as measured by the banks' demand deposits remained adequate although (BDD), declining by 22.5 percent to \$1,919.3 million over the year to June (Graph 19). The dip in BDD was largely driven by the suspension of unconventional monetary policies (-20.5%, -\$212.1m) and foreign reserves (-4.9%, \$169.6m), the former indicating repayments on RBF facilities.

Financial Intermediaries

Broad money (M3) rose (7.6%) to \$11,663.2 million on an annual basis in June compared to the 8.5 percent growth recorded in 2023. The growth in M3 was attributed to higher net domestic assets (NDA) (14.5% from 9.7%), which morethan-offset the contraction in net foreign **assets (NFA)** (-9.2% from 4.8%) over the year to June. The annual outturn in NDA underpinned by increased Net Domestic Credit (\$1,101.5m) particularly private sector credit (11.5%, \$1,011.9m), which was the highest increase since July 2017 (15.6%). The growth in private sector credit was led by commercial banks lending to private sector business entities (\$691.3m) and the Households (\$280.3m) sector. However, NFA (which has been contracting since the last two quarters) was largely driven by a decline in gross reserves (-\$173.2m) which more-than-offset the pick-up in other foreign assets (\$115.2m) during the same period.

Narrow money (M1), a component of broad money, increased (8.8%) on an annual basis in June compared to the 11.2 percent in the previous year, led by higher transferrable deposits (9.1%, \$660.8m), particularly demand deposits of non-bank financial institutions (NBFIs) Households. In addition, currency in circulation (5.9%, \$46.7m) and other deposits (4.8%, \$130.8m) rose in the year to June, which more than offset the contraction in securities other than shares (-38.9%, \$28.0m).

Commercial banks' outstanding loans rose by 11.5 percent (\$935.4m) to \$9,084.5 million in the year to June, compared to 9.6 Source: RBF

percent in the same period last year. The outcome was led by higher lending to the WRHR (\$367.2m), households (\$251.7m) and the real estate (\$175.9m) sectors that jointly comprises 69.8 percent of CB's lending activities (Graph 20).

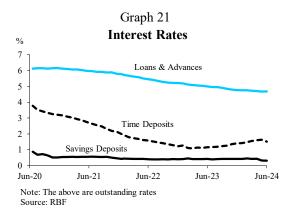

Graph 20 Commercial Banks' Lending to Sectors \$M 3,000 Private Individuals 2,500 2,000 Wholesale, Retail, Hotels & Restaurants 1,500 1,000 Transport & Storage 500 Professional & business services Jun-22 Jun-20 Jun-21 Jun-23 Jun-24

However. lending (excluding new refinance) by commercial banks increased by 19.1 percent (\$517.9m) cumulative to totalling \$2,009.5 June, underpinned by increased new credit to the wholesale, retail, hotels & restaurants (\$133.3m), households (\$99.4m), building & construction (\$71.8m) and professional & businesses services (\$35.7m) sectors, which offset the decline in lending to the public enterprise (-\$25.9m) and transport & storage (-\$22.0m) sectors.

Commercial banks' interest rates declined over the review period. The weighted average outstanding lending rate reached a new historical low at 4.68 percent, from 4.99 percent recorded in June last year. Similarly, the weighted average new lending rate rose to 4.63 percent from 4.40 percent in the previous year.

Furthermore, the weighted average existing time deposit rate rose to 1.52 percent in June from 1.15 percent in June 2023. Similarly, the weighted average new time deposit rate increased to 1.84 percent from 1.55 percent in the previous year.

As a result of these movements, both the new (7bp) and outstanding (67bp) interest rate spread narrowed in the year to June (Graph 21). The movement of the spreads are reflective of the comfortable level of banking system liquidity and risk appetite of banks.

Money Market

Government treasury bills (T-Bills) were undersubscribed by \$125.0 million in the June quarter, with a total of \$40.0 million accepted on maturities of 182 and 364 days, having respective yields²⁶ of 0.35, and 0.84 percent. The T-bills have been undersubscribed for both April and May while there was no issuance in June. The undersubscriptions have prompted the continued increase in T-bill rates in recent months.

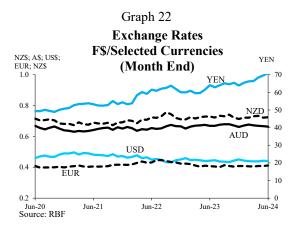

²⁶ Rates quoted for the money and bond market are the weighted average rates.

Bond Market

The Fiji Government Infrastructure bonds were undersubscribed by \$92.5 million in the June quarter, and \$260.5 million was accepted on the 20-year maturity, with a yield of 4.90 percent. No Viti bonds were issued over the same period

Exchange Markets

Exchange rate movements between the Fijian dollar (FJD) and major trading partner currencies remain mixed over the year to June (Graph 22).

In June, the FJD appreciated annually against the Japanese Yen (10.7%) and the Euro (1.2%) but depreciated against the Australian dollar (-0.7%), New Zealand dollar (-0.5%) and the US dollar (-0.3%).

Banking Industry Quarterly Condition Report – 31 March 2024

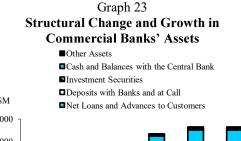

Overview - Commercial Banks

The overall performance of the commercial banking sector was assessed as satisfactory, based on satisfactory earnings, capital and liquidity positions, with a marginal rating for asset quality.

Balance Sheet

Commercial banks' consolidated balance sheet marginally contracted in the March 2024 quarter, with total assets decreasing by 0.1 percent (or \$13.1m) to \$13.9 billion. On an annual basis, total assets grew by 6.3 percent (or \$829.8m) from \$13.1 billion.

The quarterly decline mainly emanated from reductions in the exchange settlement account (by \$232.2m), cash on hand (\$45.0m), fixed assets (by \$2.5m) and bank acceptances (by \$2.0m). On the other hand, increases were noted in net loans (by \$249.0m), statutory reserve deposits (by \$6.6m), other assets (by \$5.0m), deposits with banks and at call (by \$4.5m) and investments (\$3.6m) (Graph 23).

15,000 12,000 9,000 6,000 3,000 2019 2020 2021 2022 2023 Mar-24 Source: Commercial Banks

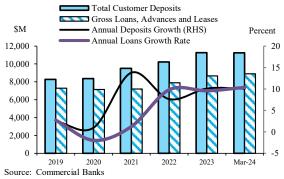

Total deposits contracted by 0.1 percent (or \$13.1m) over the quarter to \$11.2 billion, underpinned by the decrease in demand deposits (by \$100.4m) and savings deposits (by \$1.7m), while time deposits grew by

\$88.9 million (Graph 24).

Graph 24

Commercial Banks' Customer

Deposits and Loans

Demand deposits declined by 1.1 percent over the quarter to \$8.7 billion largely due to withdrawals by central Government (by \$159.8m), private sector business entities (PSBEs) (bv \$93.7m) and enterprises (PEs) (by \$35.9m), which were partially offset by the increases in deposit placements from non-bank financial institutions (NBFIs) (by \$151.2m), nonresidents (by \$31.0m), private individuals (PIs) (by \$3.6m) and local Government (by \$3.3m).

Similarly, savings deposits declined by 3.5 percent to \$46.9 million, on the back of withdrawals by PIs (by \$1.6m) and PSBEs (by \$0.1m), respectively.

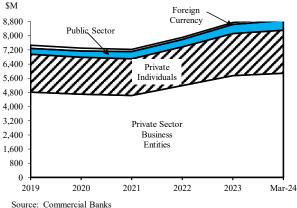

However, time deposits grew by 3.7 percent to \$2.5 billion, largely attributed to the increases in deposit placements by PSBEs (by \$60.2m), NBFIs (by \$22.4m), PIs (by \$14.1m) and non-residents (by \$0.9m), which were partially offset by the maturity in deposits of PEs (by \$8.4m), local Government (by \$0.2m) and central Government (by \$0.06m).

In terms of composition, demand deposits continued to account for the largest share of commercial banks' deposits at 77.4 percent, followed by time and savings deposits at 22.2 percent and 0.4 percent, respectively.

Gross loans and advances increased over the quarter by 2.6 percent (or \$225.2m) to \$8.9 billion as of 31 March 2024. Similarly, on an annual basis, gross loans and advances expanded by 10.4 percent (or \$835.0m).

The quarterly growth in lending was largely driven by loans to PSBEs (by \$135.1m), PIs (by \$55.0m), PEs (by \$33.0m), non-residents (by \$0.6m), credit card receivables (by \$0.3m) and NBFIs (by \$0.2m) (Graph 25).

Graph 25
Commercial Banks' Gross Loans,
Advances and Leases by Sector

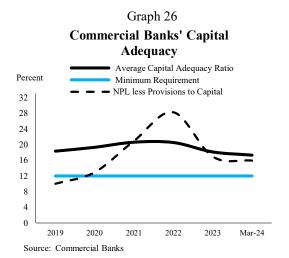

Sectoral lending concentration of commercial banks continued to be in the PI sector at 27.8 percent, followed by the wholesale, retail, hotels & restaurants (WRHR) (21.4%), real estate (20.3%), and building and construction (8.3%) sectors.

New loans disbursed amounted to \$0.9 billion and were dominated by the WRHR at 37.4 percent (or \$353.0m), followed by PIs (\$180.8m), manufacturing (\$130.4m) and real estate (\$106.6m) sectors.

Capital Adequacy

Commercial banks' capital adequacy ratio noted a slight decline to 17.9 percent as of 31 March 2024 (December 2023: 18.1%) but remained above the minimum capital adequacy requirement of 12.0 percent.

The decrease in capital adequacy ratio was due to the greater increase in total risk weighted assets by 2.3 percent (or \$195.7m) to \$8.7 billion, compared to the increase in total capital by 1.1 percent (or \$17.1m) to \$1.6 billion (Graph 26).

Total risk weighted assets on balance sheet exposure increased by 2.3 percent (or \$175.8m) to \$7.7 billion, underpinned by the increase in 100 percent risk weighted assets, while the off-balance sheet category increased by 2.0 percent (or \$19.8m) to \$1.0 billion.

Total capital increased by 1.1 percent (or \$17.1m) to \$1.6 billion, due to increases in disclosed reserves (by \$87.8m) and general

provision for doubtful debts (by \$10.9m), which were partly offset by the decrease in unaudited retained profits net appropriation (by \$73.7m) and audited interim retained profits (by \$14.4m).

Non-performing loans (NPLs) less specific provisions to capital ratio stood at 15.9 percent, declining from 16.9 percent in the prior quarter, due to the increase in specific provisions.

Asset Quality

Commercial banks' asset quality continued to be assessed as *marginal* as of 31 March 2024, despite the improvement in classified exposures to gross loans ratio to 4.3 percent compared to 4.8 percent in the prior quarter, mainly attributed to the decrease in non-performing loans (Graph 27).

Commercial Banks' Non-Performing Loans Non-Performing Loans Percent NPL to Total Gross Loans (RHS) 700 8 600 7 500 400 300 3 200 2 100 2019 2020 2021 2022 2023 Mar-24 Source: Commercial Banks

Graph 27

Classified exposures fell by 8.8 percent (or \$36.8m) over the quarter to \$380.6 million (Graph 5), attributed to decreases in all categories. The substandard category declined by \$23.5 million to \$214.9 million, while the doubtful and loss categories decreased by \$9.3 million and \$4.0 million, to \$119.0 million and \$46.7 million respectively. The improvement noted in the review quarter was largely due to the upgrading of accounts to the standard category.

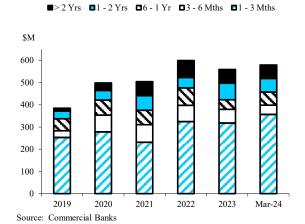

Total past due levels greater than 3 months for commercial banks contracted over the quarter by 7.5 percent (or \$18.0m) to \$223.5 million. Decreases were noted in accounts aged "3-6 months", "1-2 years" and "over 2 years".

In terms of sectoral concentration of classified exposures, NPLs continued to be concentrated in the real estate sector (30.3%), followed by the PIs (25.6%), transport & storage (by 14.5%), WRHR (13.5%) and building and construction (5.7%) sectors. The WRHR and building & construction sectors recorded the largest decline in classified exposures over the quarter by \$26.1 million and \$16.0 million, respectively.

Specific provisions declined over the quarter by 17.1 percent (or \$23.9m) to \$115.6 million, on the back of reductions in both collectively assessed provisions (by \$17.2m) and individually assessed provisions (by \$6.6m), reflective of the decline in commercial banks' impaired assets²⁷. Specific provisions to non-performing loans declined over the quarter to 30.4 percent (December 2023: 33.4%).

Graph 28

Commercial Banks' Past Due Status

General reserve for credit losses (GRCL) increased by 17.4 percent (or \$18.9m) to \$127.3 million and covered 1.5 percent of net loans.

Earnings and Interest Spread

Commercial banks' earnings performance continued to be assessed as *satisfactory* for the quarter ending 31 March 2024. Profit before tax was reported at \$88.5 million, a decline of 15.8 percent (or \$16.6m) over the quarter, underpinned by the decrease in non-interest income (by \$5.1m) and coupled with the increase in operating expenses (by \$3.3m). On an annual basis,

in the institution's income statement or where the need for a specific provision has been identified and allocated on a particular credit facility.

²⁷ Impaired Assets are those credit facilities and other assets which are not fully performing, for example, where the full amount of originally contracted interest is not being accrued

profit before tax declined by 7.4 percent (or \$7.1m) from \$95.6 million (Table 1).

Source: Commercial Banks

Commercial banks' operating income stood at \$164.0 million for the review quarter, a decline of 1.9 percent (or \$3.2m) over the quarter, attributed to the decrease in non-interest income by 7.2 percent (or \$5.1m) despite the improvement in net interest income by 2.0 percent (or \$1.9m).

Operating expenses grew over the quarter by 4.4 percent (or \$3.3m) to \$79.0 million, largely due to the increases in other expenses (by \$2.1m), personnel expenses (by \$1.3m) and depreciation (by \$0.4m), offset by the decrease in other management expenses (by \$0.4m).

Bad debts and provisions declined by 73.3 percent (or \$9.9m) to \$3.6 million, underpinned by the decrease in loan loss provisions emerging from the reductions in CAP and IAP by \$17.2 million and \$6.6 million, respectively.

As a result of the decrease in net profit before tax, the annualised return on assets (ROA) and return on equity (ROE) for commercial banks fell over the quarter to 1.9 percent (December 2023: 2.3%) and 16.4 percent (December 2023: 19.4%), respectively.

The combined interest spread for commercial banks declined by 3bps to 3.24 percent over the review quarter, as both the cost of funding and yield on earning assets increased by 7bps and 4bps, respectively (Graph 29).

Graph 29 Commercial Banks' Percent Margin and Spread 7 6 Return on Earning Assets 5 4 3 Spread 2 1 Cost of Funds 0 2019 2020 2021 2022 2023 Mar-24

Source: Commercial Banks

Liquidity

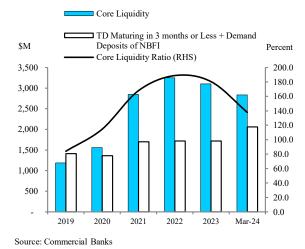

Commercial banks' liquidity position continued to be assessed as satisfactory in the review quarter, despite the quarterly decline in liquid assets.

Commercial banks' liquid assets²⁸ declined for the second consecutive quarter by 7.0 percent (or \$269.2m) to \$3.6 billion, underpinned by the decline in ESA (by \$232.2m) and cash on hand (by \$45.0m) which was offset by the increases in balances due from (by \$4.5m) and investments (by \$3.6m).

Accordingly, commercial banks' liquid asset ratio, which is an indicator of the liquidity available to meet expected and unexpected demand for cash, stood at 25.7 percent in the March 2024 quarter, compared to 27.6 percent in the prior quarter, while the loans to deposits ratio increased to 78.8 percent (December 2023: 76.8%).

Furthermore, commercial banks' core liquidity²⁹ ratio fell to 137.8 percent from 180.5 percent recorded in the prior quarter, however, commercial banks were still adequately placed to meet short term withdrawal of funds (Graph 30).

Graph 30
Commercial Banks' Core Liquidity
Ratio

Overview – Credit Institutions

The overall performance of credit institutions continued to be assessed as satisfactory in the March 2024 quarter, supported by satisfactory capital, earnings and liquidity positions, and a poor asset quality rating.

²⁸ Liquid assets include cash on hand, demand balances at RBF, demand and term balances due from corresponding foreign banks and holding of Government and Quasi Government debt securities.

²⁹ Core liquidity includes cash on hand, demand balances at RBF and demand balances due from corresponding foreign banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months or less plus demand deposits of non-bank financial institutions.

Balance Sheet

Credit institutions' consolidated balance sheet further expanded over the quarter by 1.1 percent (or \$7.6m) to \$715.2 million, attributed to increases in net receivables (by \$22.4m), future income tax benefit (by \$1.0m) and fixed assets (by \$0.8m), which offset the reductions in deposits with banks (by \$16.4m) and other assets (by \$0.2m).

On an annual basis, the credit institutions' balance sheet also noted an increase of 7.6 percent (or \$50.7m) from \$664.5 million (Graph 31).

Graph 31 Structural Change and Growth in **Credit Institutions' Assets** Other Assets ■Investment Securities \$M Deposits with Banks and at Call ■ Net Loans to Customers 800 600 400 200 2019 2020 2021 Source: Credit Institutions

Balance Sheet Funding

Total deposits grew by 0.3 percent (or \$1.4m) over the quarter to \$425.3 million, underpinned by deposit placements from NBFIs (by \$14.3m), which was offset by withdrawals from PSBEs (by \$6.5m), PIs (by \$3.8m) and public enterprises (by

\$2.5m). Total deposits increased over the year by 4.3 percent (or \$17.5m) (Graph 10).

Credit institutions' term deposits continued to be concentrated in the PIs sector at 35.2 percent, followed by the PSBEs (28.3%), public enterprises (18.1%) and NBFIs (16.5%).

The 15 large depositors stood at \$257.1 million and represented 60.4 percent of the credit institutions' total deposits.

Financial Intermediation

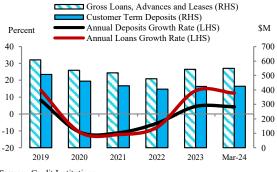

Credit institutions' gross loans increased over the quarter by 0.9 percent (or \$5.0m) to \$548.1 million (and accounted for 76.6 percent of total assets. The increase was largely driven by the increases in borrowings by PIs (by \$6.0m) and NBFIs (by \$0.2m) sectors, which was offset by the decrease in PSBEs (by \$1.2m).

On an annual basis, gross loans increased by 12.4 percent (or \$60.5m) from \$487.6 million.

Loans to PIs increased by 2.3 percent (or \$6.0m) to \$267.2 million, underpinned by the increases in cars, motorcycles and other personal transport (by \$5.5m) and "others" (by \$1.7m), which comprises of personal loans.

Loans to PSBEs on the other hand declined by 0.4 percent (or \$1.2m) to \$279.1 million, whereby decreases were noted in lending to the wholesale, retail, hotels & restaurants (by \$2.1m), professional and business services (by \$2.0m) and transport and storage sectors (by \$0.1m). This was partially outweighed by the increases in mining and quarrying (bv manufacturing (by \$1.3m) and building and construction (by \$0.6m) sectors.

Graph 32 **Credit Institutions' Customer Term Deposits and Loans and Advances**

Source: Credit Institutions

The PSBEs sector accounted for the majority of the credit institutions' gross loans at 50.9 percent, followed by PIs (48.8%), public enterprise (0.2%) and local Government (0.1%) sectors.

The 15 largest credit exposures were reported at \$38.9 million and represented 7.1 percent and 23.2 percent of the credit institutions' gross loans and total capital, respectively.

Capital Adequacy

Credit institutions' capital adequacy ratio continued to be assessed as satisfactory in the March 2024 quarter at 28.9 percent, compared to 28.5 percent in the prior quarter. The increase in the capital adequacy ratio was attributed to the greater increase in total capital by 4.8 percent when compared to the increase in risk weighted assets by 3.5 percent.

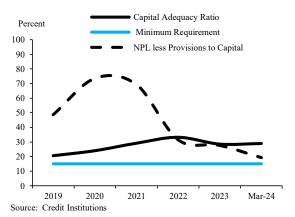

All credit institutions maintained their capital adequacy ratios above the minimum prudential requirement of 15.0 percent.

Total capital increased over the quarter by 4.8 percent (or \$7.8m) to \$169.9 million, on the back of increases in disclosed reserves (by \$11.7m) and general provision for doubtful debts (by \$1.4m), offset by the decline in unaudited retained profits (by \$5.7m) and future tax benefits (by \$0.5m).

Total risk weighted assets increased by 3.5 percent (or \$19.7m) to \$587.8 million, as a result of an increase noted in the 100 percent risk weighted assets.

Credit institutions' NPLs less provisions to capital ratio, decreased from 27.6 percent to 19.3 percent over the quarter, due to declines in classified exposures specific provisions, while capital and reserves increased (Graph 33).

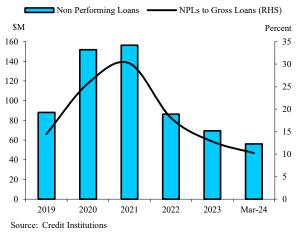

Graph 33 **Credit Institutions' Capital Adequacy**

Asset Quality

Asset quality continued to be assessed as *poor* despite the improvement in classified exposures to gross loans ratio to 10.2 percent compared to 12.8 percent in the prior quarter (Graph 34).

Graph 34
Credit Institutions' Non Performing
Loans

The improvement in asset quality was underpinned by the decrease in classified exposures by 19.3 percent (or \$13.4m) to \$56.1 million, primarily due to reductions in the substandard (by \$10.5m) and doubtful (by \$7.6m) accounts. The loss accounts on the other hand recorded an increase of 32.7 percent (or \$4.7m) to \$19.0 million. Special mention accounts stood at \$73.8 million as of 31 March 2024 compared to \$58.4 million in the prior quarter, and represented 13.5 percent of total gross loans.

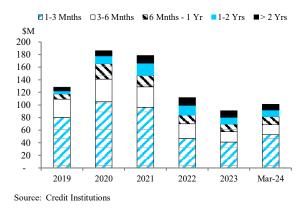

Impaired assets also declined over the quarter to \$49.9 million and represented 9.1 percent of gross loans.

In terms of coverage, specific provisions to classified exposures ratio increased to 42.3 percent compared to 37.6 percent in the prior quarter. The increase in provision coverage was due to the fall in classified exposures.

GRCL stood at \$9.0 million, and covered 1.7 percent of net loans as of 31 March 2024.

Past due levels were recorded at \$101.2 million in the review quarter, an increase from \$90.9 million recorded in the prior quarter. Increases were noted in the 1-3 months (by 28.0%) and 6 months -1 year (by 5.9%), while the over 2 years, 1-2 years and 3-6 months declined by 11.1 percent, 4.2 percent and 2.5 percent, respectively (Graph 35).

Graph 35
Credit Institutions' Past Due Status

Earnings and Interest Spread

The earnings performance of credit institutions continued to be assessed as *satisfactory* for the March 2024 quarter, recording a profit before tax of \$8.7 million compared to \$11.5 million reported in the prior quarter. The quarterly decline in profit before tax was a result of a decline in non-interest income by \$2.2 million and an increase in bad debts & provisions by \$1.4 million.

On an annual basis, profit before tax declined by 33.6 percent (or \$4.4m) (Table 2).

Table 2

Credit institutions' net interest income stood at \$18.9 million in the March 2024 quarter compared to \$18.1 million in the prior quarter, underpinned by the increase in interest income by 2.8 percent to \$22.1 million, and complemented by the decrease in interest expense by 5.9 percent to \$3.2 million. The decrease in non-interest income by 68.8 percent to \$1.0 million in

the review quarter was attributed to the decline in dividend income by \$2.0 million.

Operating expenses increased by 1.1 percent (or \$0.1m) over the quarter to \$9.0 million and bad debts & provisions increased by 155.6 percent (or \$1.4m) over the quarter to \$2.3 million.

The efficiency ratio of the credit institutions sector deteriorated to 45.1 percent in the review quarter compared to 41.8 percent in the prior quarter, as a result of the increase in operating expenses, while operating income declined.

Annualised interest margin (interest spread) stood at 10.8 percent in the review quarter, compared to 9.6 percent in the previous quarter, with an increase noted in the yield on earnings assets whilst cost of funding liabilities decreased (Graph 36).

Graph 36 Credit Institutions' Margins and Percent **Spreads** 18 Return on Monetary Assets 16 14 12 Spread 10 8 6 Cost of Funds 4 2 0 2019 2020 2021 2022 2023 Mar-24

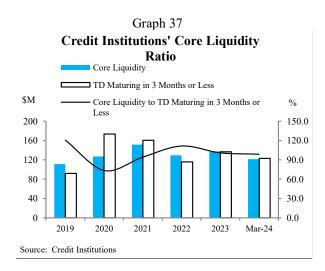

Credit institutions' annualised ROE and ROA ratios (before tax) were recorded at 17.0 percent and 3.9 percent, respectively for the March 2024 quarter.

Liquidity

Credit institutions' liquidity position continued to be assessed as *satisfactory* as of 31 March 2024.

Liquid assets³⁰ stood at \$136.0 million, a reduction of 10.8 percent (or \$16.4m) over the quarter, due to the decrease in deposits with banks by \$16.4 million to \$121.4 million. Liquid assets represented 19.0 percent of the credit institutions' total assets.

Core liquidity³¹ ratio decreased over the quarter to 98.8 percent from 100.8 percent, attributed to a greater decrease in core liquid assets compared to maturing short term deposits (Graph 37).

Insurance Industry Quarterly Condition Report – 31 March 2024

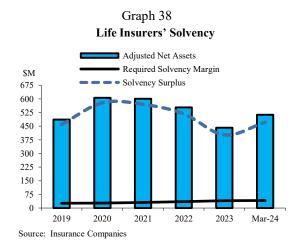

The performance of the insurance industry continued to be assessed as satisfactory in the review quarter, as both the life and general insurance sectors maintained strong solvency levels and satisfactory earnings and liquidity positions.

Life Insurance Sector

Capital

Life insurers' solvency position continued to be assessed as strong, with an increased consolidated solvency surplus of \$471.1 million as of 31 March 2024, and above the minimum solvency requirement of \$40.9 million (Graph 38).

The growth of 17.4 percent (or \$69.7m) in solvency surplus over the quarter was underpinned by a greater increase in admissible assets of 4.5 percent compared to the increase in liabilities of 1.0 percent. This resulted in the net adjusted assets increasing by 15.9 percent (or \$70.4m) to \$512.1 million.

³¹ Core liquidity includes demand balances with banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months.

³⁰ Liquid assets include demand and term balances with banks, and holdings of Government and Quasi Government debt securities.

Assets

Total assets of the life insurers expanded by 0.8 percent (or \$16.4m) over the quarter to \$2.1 billion, and also noted a growth over the year of 7.7 percent (or \$149.8m).

The quarterly growth in total assets largely emanated from increases in investments (by \$20.4m), secured loans (by \$3.1m) and outstanding premiums (by \$0.7m), which were partially offset by the decrease in cash on hand (by \$6.6m) and other assets (by \$1.2m).

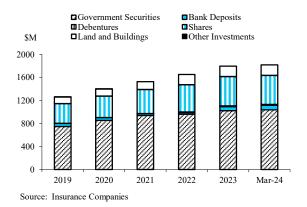

Total assets of the life insurance sector continued to be dominated by investments at 86.9 percent, followed by other assets at 6.6 percent, loans at 6.2 percent and outstanding premiums at 0.3 percent (Graph 39). Government securities continued to be the largest component of total investments at 56.9 percent, followed by shares at 27.7 percent, land and buildings at 10.0 percent, bank deposits at 4.5 percent and debentures at 0.8 percent.

Graph 39 Distribution of Assets of Life Insurance Companies Other Assets Outstanding Premiums Loans Other Investments \$M ■Government Securities 2400 2000 1600 1200 800 400 2020 2021 2019 2022 2023 Mar-24 Source: Insurance Companies

Total investments of life insurers grew over the quarter by 1.1 percent (or \$20.4m) to \$1.8 billion, largely attributed to increases in bank deposits (by \$12.4m) and Government securities (by \$12.0m), which outweighed the decreases in land & buildings (by \$2.4m), debentures (by \$0.8m) and shares in non-related persons (by \$0.8m) (Graph 40). Similarly, investments increased over the year by 8.5 percent (or \$141.8m) from \$1.7 billion.

Graph 40

Composition of Investments

Liabilities

Total liabilities of the life insurance sector increased by 0.5 percent (or \$9.7m) over the quarter to \$2.0 billion. This was attributed to the balance of revenue account, which expanded by 1.0 percent (or \$19.9m) to \$1.9 billion and continued to be the major liability of life insurers at 96.0 percent. On an annual basis, total liabilities grew by 7.8 percent (or \$144.8m).

On the other hand, other provisions declined over the quarter by 16.8 percent (or \$9.7m) to \$48.0 million, owed to decreases in provisions for dividends by \$8.5 million, doubtful debts by \$0.6 million, taxation by \$0.4 million and employee entitlements by \$0.2 million. Similarly, 'other' liabilities decreased by 2.2 percent (or \$0.5m), largely due to the decreases in sundry creditors by \$0.6 million.

Earnings

Earnings continued to be assessed as satisfactory for the March 2024 quarter, despite a decline in life insurers consolidated after tax profit to \$12.0 million compared to \$21.5 million recorded in the previous quarter. On an annual basis, a lower decline in after tax profit was noted of \$3.6 million from \$15.6 million.

Total income decreased significantly by 39.7 percent (or \$47.9m) to \$72.8 million, attributed to asset value depreciation (by \$46.4m). Decreases were also noted in investment income from dividends and interest by \$5.6 million and \$0.9 million, respectively, which outweighed the increase in net insurance premiums (by \$4.3m).

Similarly, total outgoings of life insurers decreased over the quarter by 36.5 percent (or \$35.1m) to \$61.0 million, underpinned by the reductions in policy liabilities (by \$28.5m), net policy payments (by \$4.4m), operating expenses (by \$1.6m) and net commissions incurred (by \$0.5m).

Liquidity

Core liquid assets increased over the quarter by 3.2 percent (or \$5.8m) to \$185.3 million, owed to an increase in bank deposits by \$12.4 million while cash on hand declined by \$6.6 million.

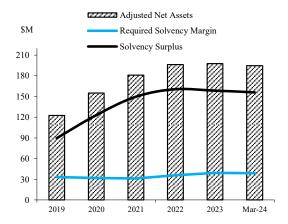

The broad liquidity ratio (incl. Government securities), which measures the ability of life insurers to meet their total liabilities, stood at 61.3 percent compared to 60.7 percent in the prior quarter. Overall, the liquidity position of life insurers continued to be assessed as satisfactory.

General Insurance Sector

Capital

General insurers' solvency position continued to be assessed as strong, despite a decrease in the consolidated solvency surplus by 1.6 percent (or \$2.6m) to \$155.9 million, however still above the mandated requirement of \$38.8 million (Graph 41).

Graph 41
General Insurers' Solvency

Source: Insurance Companies

The greater increase in total liabilities by 4.2 percent (or \$14.4m) compared to the increase in total admissible assets by 2.1 percent (or \$11.4m), led to an overall decline in net adjusted assets by 1.5 percent (or \$3.0m) to \$194.7 million. The decline in solvency requirement by \$0.4 million resulted in a further decrease in consolidated solvency surplus for the review quarter.

Assets

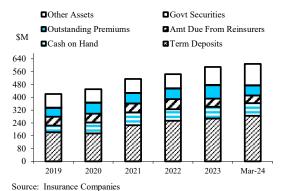

Total assets of the general insurance sector expanded over the quarter by 3.1 percent (or \$18.0m) to \$607.5 million. On an annual basis, total assets grew by 4.6 percent (or \$26.6m) from \$580.9 million.

The quarterly increase in total assets was underpinned by increases in bank deposits (by \$16.0m), deferred reinsurance expense (by \$12.6m), outstanding premiums for over 3 months but 6 months and under (by \$9.8m), cash on hand (by \$6.9m) and land & buildings (by \$5.6m). These were partially offset by major decreases in outstanding premiums for 3 months and under (by \$29.4m), fixed assets (by \$4.9m) and amounts due from reinsurers on outstanding claims (by \$3.1m).

Total investments of the general insurance sector grew by 6.4 percent (or \$21.3m) over the quarter to \$355.7 million and represented 58.6 percent of total assets. The increase in total investments was attributed to bank deposits and land & buildings.

Bank deposits continued to remain the largest component of general insurers' total assets at 46.7 percent, followed by cash on hand at 13.1 percent, outstanding premiums at 10.3 percent and amounts due from reinsurers on outstanding claims at 7.9 percent (Graph 42).

Graph 42
Distribution of Assets for General
Insurance Companies

Reinsurance

Reinsurance premiums ceded offshore increased during the review quarter by \$14.1 million to \$25.0 million. All general insurers complied with the relevant reinsurance requirements.

Liabilities

Total liabilities of general insurers increased by 5.9 percent (or \$20.0m) over the quarter to \$360.7 million. Similarly, the general insurance sector recorded an annual growth in total liabilities of 2.6 percent (or \$9.1m) from \$351.7 million.

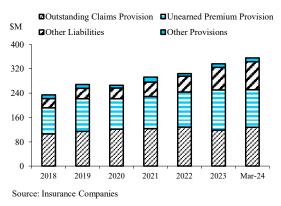

The quarterly growth in total liabilities was mainly due to increases in amounts due to reinsurers (by \$18.7m) and outstanding claims provisions (admitted & IBNR) (by

\$9.6m). These were partly offset by the decrease noted in unearned premium provisions (by \$9.5m).

Outstanding claims provisions (admitted & IBNR) remained the major liability of general insurers at 35.5 percent, followed by unearned premium provisions at 33.9 percent and 'other' liabilities at 25.7 percent (Graph 43).

Graph 43

Distribution of Liabilities of General Insurers

Earnings

The general insurers recorded a reduction in after tax profit by 77.8 percent (or \$15.7m) to \$4.5 million compared to \$20.1

million recorded in the previous quarter. The significant decline was attributed to a decrease in underwriting surplus for the quarter by 54.4 percent (or \$9.8m) to \$8.3 million as net claims incurred increased by 65.3 percent (or \$11.8m) to \$29.8 million while underwriting expenses dropped by 12.5 percent (or \$1.1m) to \$7.5 million.

Additionally, non-underwriting income fell by 77.6 percent over the quarter (or \$7.2m) and stood at \$2.1 million (Graph 44).

Graph 44 General Insurers' Viability ■Net earned premium ■Net claims incurred ■Underwriting results ■Net profit \$M 50 40 30 20 10 -10 2019 2020 2021 2022 2023 Mar-24 Source: Insurance Companies

The decrease in net premium income of \$37.8 million to \$26.5 million was due to

the significant decline in gross premium income (by \$23.7m to \$51.5m) while reinsurance outwards increased (by \$14.1m). A lower increase was noted in net earned premiums by 2.0 percent (or \$0.9m) to \$45.5 million.

Liquidity

The liquidity position of the general insurance sector improved over the quarter by 6.7 percent (or \$22.9m) to \$363.3 million, with liquid assets held assessed as sufficient to cover outstanding claims by 2.8 times.

Insurance Broking

Earnings

The insurance broking sector reported an after-tax profit of \$1.0 million, a marginal increase of 2.2 percent when compared to the previous quarter.

Total revenue for insurance brokers stood at \$5.1 million, a decline of 42.4 percent (or \$3.8m) over the quarter, attributed to the decrease in total brokerage by \$3.5 million and other revenue by \$0.3 million. Brokerage earned as commission accounted for 93.3 percent of the insurance brokers total revenue earned, followed by brokerage earned as fees at 4.0 percent.

Total expenses of insurance brokers fell by 40.1 percent (or \$2.5m) to \$3.7 million, largely owed to decreases in other expenses (by \$2.3m) and salaries & wages (by \$0.1m). PI & FG covers directors' fees and audit fees noted minor decreases during the quarter.

Broking Account

The broking account balance declined over the quarter by 3.4 percent (or \$0.7m) and stood at \$20.7 million as of 31 March 2024, with increases noted in both the monies received and withdrawn during the quarter.

Total monies received by insurance brokers during the review quarter increased by 10.9 percent (or \$8.0m) to \$81.5 million. Premiums received from insureds for payment to local insurers stood at \$64.5 million and accounted for 79.1 percent of the total monies received, while premiums received from insureds on account of offshore insurers amounted to \$16.8 million, and was 20.6 percent of total monies received.

Total monies withdrawn, also increased by 22.6 percent (or \$14.8m) to \$80.0 million, with premium payments to local insurers representing 48.6 percent (at \$38.9m), while premium payments to offshore insurers and payments to self, represented 35.3 percent and 15.8 percent, respectively.

Offshore Placements

402 offshore applications totalling \$27.1 million in premiums were approved during the review quarter, when compared to 233 applications at \$30.9 million approved in the prior quarter (Table 3). Of the 402 approved applications, 67 applications worth \$21.0 million were approved by the RBF whilst the remaining 335 applications worth \$6.1 million were approved by the licensed insurance brokers.

The material damage and business interruption (MD/BI) class continued to dominate the share of premiums remitted offshore at 55.8 percent, followed by term life and medical at 15.9 percent and 7.0 percent, respectively.

Capital Markets Quarterly Performance Report – 31 March 2024

Stock Market

The stock market's key performance indicator of the SPX Total Return Index (STRI) recorded an increase, while the market capitalisation, number of trades,

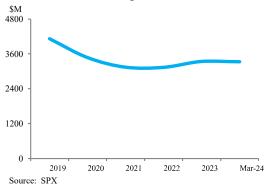

value and volume of shares noted a decline in the March 2024 quarter. The buy and sell ratio continued to reflect the excess number of listed securities on offer relative to bids.

The market capitalisation of listed securities contracted by 0.3 percent (\$9.6m) to \$3,328.0 million over the quarter (December 2023: \$3,337.6m).

Over the year, the market capitalisation expanded by 3.3 percent (or \$106.5m) (Graph 45).

Graph 45

Market Capitalisation

The decline in market capitalisation resulted from a reduction in the share price of three of the top five listed securities, namely Fijian Holding Limited (FHL) by 6.8 percent (or \$0.07 cents), RB Patel Group Limited (RBG) by 1.0 percent (or \$0.03 cents) and Vision Investment Limited (VIL) by 0.5 percent (or \$0.02 cents), despite an additional 71,970 shares quoted by Pleass Beverages & Packaging Ltd (PBP) on the SPX trading platform, as part of the execution of its dividend reinvestment plan.

Furthermore, the composition of the top five listed securities in terms of market capitalisation changed over the March 2024 quarter, noting the exit of Flour Mills of Fiji

Limited (FMF) and the entry of Toyota Tsusho (South Sea) Limited (TTS). The individual market share in terms of market capitalisation and movements over the quarter were as follows:

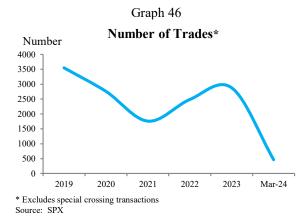

- ATH: 28.8 percent (December 2023: 28.7%);
- RBG: 14.0 percent (December 2023: 14.1%);
- VIL: 12.6 percent (December 2023: 12.7%);
- FHL: 8.8 percent (December 2023: 9.4%); and
- TTS: 8.4 percent (December 2023: 8.5%).

Dividend returns were declared/paid by four (4) listed entities, of which two entities noted an increase, one listed entity recorded a decline, while one remained unchanged.

The increase in capital and dividend returns led to an increase in the SPX Total Return Index (STRI) by 0.1 percent over the quarter to 8,624.22 in March 2024 (December 2023: 8,611.46). On an annual basis, the STRI expanded by 5.7 percent, from 8,160.39 recorded in March 2023.

The year-to-date (YTD) average return for the stock market was reported at 7.6 percent, comprising of capitals gains (CG) of 5.7 percent and average yield of 1.9 percent.

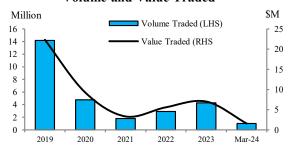

A total of 463 trades were recorded during the March 2024 quarter compared to 1,029 transactions recorded in the previous quarter (Graph 46).

Two special crossing transactions were conducted during the review quarter, whereby the total volume and value of shares traded declined to 1.0 million and \$1.6 million, respectively (December 2023:

volume - 1.4m and value - \$1.9m) (Graph 47).

Graph 47 Volume and Value Traded*

* Excludes special crossing transactions Source: SPX

The buy and sell ratio decreased in the review quarter and stood at 1:17 (December 2023: 1:18)

Managed Investment Schemes (MIS) Market

The MIS market's key performance indicators of funds under management, investment, net profit, liquid assets and number of unitholders noted growth over the quarter while investment income declined.

Balance Sheet

The MIS market's total funds under management noted an expansion of 6.0 percent (or \$34.3m) to \$610.8 million for the quarter ending March 2024 (December 2023: \$576.5m). The quarterly growth in funds under management resulted from increases in total unitholders fund by 5.5 percent (or \$22.0m) to \$425.0 million and total reserves by 7.1 percent (or 12.3m) to \$185.8 million.

The total funds under management for the MIS market expanded by 17.1 percent (or \$89.2m) from \$521.6 million over the course of one year.

Assets

MIS markets total assets as of 31 March 2024 stood at \$621.2 million, an expansion of 5.0 percent (or \$29.8m) from \$591.4 million reported in the preceding quarter. This is attributed to a growth in investments (by \$26.8m) to \$511.9 million, cash on hand (by \$4.1m) to \$102.8 million and other assets (by \$0.5m) to \$2.5 million.

The growth in total assets was however partially outweighed by the decline in accrued income (by \$1.5m) to \$4.0 million.

Total investments of the MIS market expanded by 5.5 percent (or \$26.8m) over the quarter to \$512.0 million when compared to \$485.2 million in the preceding quarter. This is attributed to an increase in term deposits (by \$14.0m), listed securities (by \$12.4m), unlisted securities (by \$0.7m) and properties (by \$0.2m). This increase however was offset by a decline in investments in money market instruments (by \$0.3m) and loans & loans receivables (by \$0.2m).

Similarly, on an annual basis, the investment portfolio expanded by 21.3 percent (or \$89.8m) from \$422.2 million.

Liabilities

Combined total liabilities for the MIS market was reported at \$10.4 million, a contraction of 30.1 percent (or \$4.5m) from \$14.9 million recorded in the prior quarter. This decrease resulted from fall in distributions payable (by \$4.6m), sundry creditors (by \$2.3m) and others (by \$0.2m), which was partially offset by the increase in redemptions payable (by \$2.3m) and management fee payable (by \$0.2m).

Liquid Assets

Liquid assets of the MIS market expanded by 10.1 percent (or \$18.1m) to \$197.9 million (December 2023: \$179.8m), due to an increase in both term deposits and cash on hand by 17.3 percent (or \$14.0m) and 4.2 percent (or \$4.1m) to \$95.1 million and \$102.7 million, respectively. As a result of this increase, the liquid assets to unitholders equity ratio increased from 44.6 percent in the prior quarter to 46.6 percent as of 31 March 2024.

Unit repurchases was reported at \$11.4 million, an increase of 43.5 percent (or \$3.5m) when compared to the prior quarter (December 2023: \$7.9m). This increase resulted from a rise in the unit repurchases for institutional investors (by \$3.7m), while retail investors recorded a decline (by \$0.2m).

Earnings

Net profit after tax for the MIS market was reported at \$2.6 million, an expansion of 30.0 percent (or \$0.6m) from \$2.0 million reported in the prior quarter (Table 4).

Table 4 **MIS Combined Income Statement**

Non-investment expense	-	-	-	-	
Income Tax	-	-	-	-	-
Net Profit after tax	1.8	2.0	2.6	30.0	44.4

Source: MIS Returns

Investment income recorded a greater increase of \$0.9 million to \$4.2 million compared to the increase in investment expenses by \$0.3 million to \$1.6 million, respectively.

As a result of an increase in investment income, the annualised return on investment (AROI) expanded over the quarter to 3.3 percent.

The Bond Market

Total outstanding bonds was reported at \$6.2 billion, a contraction of 1.1 percent (or \$69.8m) from the preceding quarter. This was mainly attributed to higher value of total redemptions at \$99.2 million compared to additional bonds issued valued at \$88.9 million.

Government bonds continue to grow the fixed income market through the issuance of Fiji Infrastructure Bonds (by \$87.0m) and Viti Bonds (by \$1.9m).

Redemptions were noted for Fiji Development Loan (\$48.5m), Fiji Infrastructure Bonds (\$42.7m), Fiji Development Bond (\$6.0m) and Viti Bonds (\$2.0m).

There was no secondary trading of bonds on the SPX in the review quarter.

^{1/} The Monetary & Credit Aggregates table is derived from the Central Bank Survey (CBS) (Table 3) and Other Depository Corporations Survey (ODCS) (Table 2).

^{2/} Monetary base is normally referred to as reserve money and its components include currency in circulation, ODCS deposits at the Reserve Bank and other deposits of other financial corporations.

^{3/}As of May 2012, the official definition of broad money has changed to include securities of money issuers. As a result, M3 will now be known as broad money.

Table 8

^{1/} The Statutory Reserve Deposit is derived as 10 percent of commercial banks' deposits and similar liabilities at the end of the

previous month.

2 From 1996, demand deposits include funds placed in the Trust Account established for re-financing NBF Asset Management Bank.

^{3/} Currency with non-bank public was revised from 2001-October 2015.

^{4/} Held outside of the banking system.

^{5/} Differences, if any, in total assets and liabilities are due to rounding off.

Note:

 $^{^{\}prime\prime}$ Commercial banks liabilities reported in the table include both local and foreign currency denominated liabilities. $^{2\prime}$ Previously reported as demand deposits. $^{3\prime}$ Previously reported as Local Government.

⁴ Previously reported as Statutory Bodies.
5 Includes both savings and time deposits.

^{6/} Includes local bills payable.

⁷ Under Non-Residents, previously reported balance to banks abroad has been separated into transferable and other deposits, while foreign bills payable is classified under others.

8 Differences, if any, in total assets and liabilities are due to rounding off.

Note:

¹¹ As defined under the Section 43 of the RBF Act. Since 1996, when the National Bank of Fiji Restructuring Act became effective, Section 31 exempts the NBF Assets Management Bank from holding Statutory Reserve Deposit and Unimpaired Liquid Asset.

 $^{^{2/}}$ Balances at the end of the review month.

³ Refers to the total only and not individual items. The total is derived as 10% of commercial banks deposits and similar liabilities at the end of the previous month.

^{4/} Balances of deposits and related liabilities as at the end of the previous month.

Source: Reserve Bank of Fiji

n.i.- no issue n.t. - no trade ^{1/}Represents monthly weighted average rate.

^{2/} Prior to October 2006, Minimum Lending Rate (MLR) = Repurchase Facility Rate (Policy Indicator Rate + 100 basis points). From October 2006, MLR = Policy Indicator Rate + 100 basis points and Repurchase Facility Rate = latest weighted average overnight interbank rate + 100 basis points. From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).
