OVERVIEW

The International Monetary Fund (IMF) in its April 2025 World Economic Outlook (WEO), revised its global growth forecast downward, lowering the projection for 2025 from 3.3 percent to 2.8 percent and for 2026 to 3.0 percent (from 3.3%). The revision reflects rising trade tensions, policy shifts by economies around the world and financial market shifts driven by the United States (US) tariff increases on major economies. The intensifying trade conflict and growing policy uncertainty may further constrain global economic growth in the short and long term.

Domestically, the Fijian economy is expected to grow by 3.4 percent in 2025, largely driven by services sector activity. In 2026 and 2027, economic growth is forecast to be 2.9 percent and 2.8 percent, respectively.¹ Additionally, according to the RBF's February 2025 (Feb-25) Business Expectations Survey (BES) results, the overall outlook for business conditions remains generally optimistic across all sectors over the next 6 to 12 months, although this is lower than indicated in the previous survey.

Sectoral outcomes were mostly mixed in the first quarter of 2025. Tourist arrivals contracted (-5.3%, to 184,119 arrivals) cumulative to March, mainly due to lower arrivals from Fiji's key source markets, Australia (-8.5%) and New Zealand (-14.1%). Gold production also fell (-11.8%) cumulative to March, due to maintenance and repair works at the mines. On a positive note, timber output noted a significant outturn (woodchips: 192.6% and sawn timber: 121.2%) higher than a year ago. Mahogany production was also positive (149.8%), driven by favourable weather

conditions. In the year to March, electricity production (0.3%) and its consumption (0.01%) grew marginally, while mineral water production rebounded (26.8%), although likely to be negatively affected if the US tariffs are imposed.

Consumption spending continues to grow, as reflected by generally positive indicators in the first quarter of 2025 and results from the recent Retail Sales Survey (RSS).

In the first three months of this year, net Value Added Tax (VAT) collections rose (11.7%). Similarly, vehicle registrations increased (34.0%) in the year to March. In addition, new consumption-related loans,² a leading indicator of consumption activity, improved (58.2% to \$654.7m) cumulative to March. The RBF's Feb-25 RSS anticipates consumption spending to remain positive, although lower than previous sentiment. Retail sales are now expected to expand by 4.0 percent in 2025, lower than the estimated 7.0 percent earlier.

Key leading investment indicators suggest an improvement in activity. New loans for investment purposes³ by commercial banks grew by 12.2 percent, cumulative to March. In the same period, domestic cement sales also noted annual growth (8.6%). While the total number of building permits issued,⁴ declined over the year in 2024 (-41.0%), its total value increased significantly (92.2%), partly reflecting higher cost of constructionrelated materials. This is in line with elevated building material price index (3.8% to 139.7 points) in the first quarter of 2025. Moreover, results from the latest BES indicates that most businesses plan to invest in plant & machinery (net 23.6%)⁵ in the

¹These forecast figures are currently under review and to be approved in the Macroeconomic Committee (MC) meeting in June. The numbers stated are as at November 2024 MC approved.

² Excluding refinancing.

³ Excluding refinancing.

⁴ A forward-looking indicator.

⁵ Weighted average response rate.

medium term compared to the last survey (net 17.2%), whereas plans to invest in buildings for the next 12 months declined on net (-1.3%), lower than the Aug-24 survey (8.4%).

Supply and demand indicators suggest some stabilisation in the labour market. Migration contracted in the first quarter (-28.2%) compared to the same period last year as the number of Fijian citizens travelling abroad for more than one year for employment, education/training and other purposes, fell.

Demand for workers has moderated as the total number of job vacancies (-0.3%) fell in the year to March. However, the Feb-25 BES results revealed that intentions to hire in the next 6-12 months have increased compared to the previous survey. In addition, the aggregate wages paid to employees rose (9.4%) in the first two months of this year due to an increase in formal employee registrations coupled with wage adjustments as a form of retention measure.

On the prices front, the annual headline inflation rate stood at 1.5 percent in March, from 4.6 percent recorded a year ago. Prices increased for alcoholic beverages, tobacco & narcotics, miscellaneous goods, food and non-alcoholic drinks and restaurants & hotels, which offset the declines noted in the transport and other categories.

Financial sector conditions remained supportive of domestic economic growth with adequate banking system liquidity (\$2.0b) at the end of March, and lending rates remaining near historic lows. Broad money growth slowed to 6.9 percent in March 2025, led by a lower growth in net domestic credit (5.5%) although private sector credit maintained a double-digit growth (11.0%). Looking ahead, businesses expect the demand for credit to remain broadly stable and lending rates largely unchanged in the medium term as per the Feb-25 BES.

Cumulative to February 2025, Fiji's merchandise trade deficit⁶ widened by 4.5 percent on an annual basis to total \$693.0 million, as the growth in imports (\$1,135.9m) outpaced the growth in exports (\$442.9m). Cumulative to March, inward personal remittances⁷ grew by 10.3 percent to \$342.6 million with the largest growth coming from major source markets such as Australia, US and New Zealand (NZ) with mobile network operators being the main platform used to receive funds. At the same time, outward remittances increased by 19.2 percent to \$139.6 million. As such, net remittances increased annually to \$203.1 million (5.0%) cumulative to March.

Foreign reserves (RBF holdings) remained adequate at \$3,521.0 million at the end of the March quarter, sufficient to cover 5.7 months of retained imports (MORI).

Given the comfortable outlook for inflation and foreign reserves, the RBF maintained an accommodative monetary policy stance and kept the overnight policy rate unchanged at 0.25 percent in the first quarter of 2025.

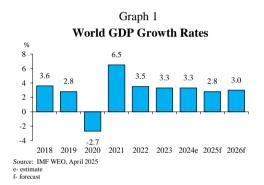

⁶ Trade deficit (value of imports exceeding the value of exports) excluding aircraft.

⁷ Reflects personal transfers that individuals receive from overseas via mobile money, commercial banks and money transfer operators.

THE INTERNATIONAL ECONOMY

International Economic Conditions

The IMF in its April WEO, revised the global growth for 2025 down from 3.3 percent anticipated in January to 2.8 percent and 3.0 percent for 2026 (Graph 1).⁸ The downward revision reflects the escalating trade tensions, policy shifts by economies around the world and financial market adjustments amid US tariff rates on major economies such as China. The escalating trade war and heightened policy uncertainty could further dampen near-term and long-term economic growth prospects.

Global headline inflation is now projected to ease at a slightly slower rate than anticipated in January WEO. Inflation is projected to be at 4.3 percent and 3.6 percent, respectively, in 2025 and 2026.

Over the last quarter of 2024, growth rates⁹ for Fiji's trading partner economies (TPEs) remained positive except for New Zealand.

The Australian economy recorded a growth of 0.6 percent, underpinned by a rebound in household spending, private investment and government spending while the Indian economy expanded by 1.6 percent in the December 2024 quarter. The Japanese economy grew moderately by 0.6 percent, as business investment and government spending gained momentum.

In the first quarter of 2025, the US economy contracted by an annualised rate of 0.3 percent (from 2.4% in the December 2024 quarter), registering the first decline since the first quarter of 2022. The slowdown was attributed to the surge in imports as firms accelerated purchases in anticipation of higher costs following the Trump-era tariffs. The Chinese economy grew by 1.2 percent (seasonally adjusted) in the first quarter of 2025, slower than the 1.6 percent recorded in December 2024. Since February, the US have raised tariffs on Chinese goods to 145.0 percent, prompting China to retaliate and pledge more stimulus to boost consumption. Following a 0.4 percent expansion in the third quarter, the Euro Area stalled with zero growth in the December quarter, due to counterbalancing movements with contractions noted in the largest economies -Germany and France, while growth was reported for Portugal, Spain and Lithuania.

The unemployment rate for most TPEs remains low, indicating tight labour market conditions. On a positive note, the NZ economy grew by 0.7 percent on a quarterly basis in December 2024, recovering from a 1.1 percent contraction in the previous period boosted by the rebound in economic activity with increased spending by international visitors and improved agricultural

⁸ The projection for both 2025 and 2026 has been slightly revised downwards respectively, by 0.5 and 0.3 percentage points from the January 2025 WEO.

⁹ Quarter-over-quarter growth rates.

production. The growth follows two straight quarters of decline and primary drivers of growth arising from agriculture, forestry, & fishing, rental, hiring and real estate services.

Annual headline inflation rates in most economies are steadily approaching the target ranges established by their central banks. In the first quarter of 2025, the inflation rate in Australia remained within the central bank's target range, unchanged at 2.4 percent from December 2024. Over the same period, prices eased in India to 3.3 percent (from 5.2% in 2024 end) while inflation in Japan stood steady at 3.6 percent from December 2024. On the other hand, prices contracted in China to -0.1 percent (from 0.1% in December 2024) while prices fell modestly in the US to 2.4 percent (from 2.9% in December 2024), due to moderation in prices for gasoline and fuel oil. Over the same period, inflation slowed in the Euro Area to 2.2 percent (from 2.4% in December 2024), underpinned by slow services inflation and decline in energy cost. However, inflation rate in NZ accelerated to 2.5 percent in March quarter (from 2.2% in December), largely underpinned by rising rent and construction cost.

Most TPEs' central banks revised their key interest rates over the quarter based on its price developments (Table 1). In February, Reserve Bank of Australia and Reserve Bank of New Zealand respectively lowered their cash rate to 4.10 percent and 3.75 percent and maintained rates in March. Over the same month, Reserve Bank of India slashed its key repo rate by 25 basis points (bps) to 6.25 percent (from 6.50%) since the last cut in 2023, driven by easing inflation. Similarly, the European Central Bank reduced its interest rate by a consecutive 25 bps in January and March, to 2.65 percent. The US Federal Reserve and People's Bank of China kept their rates unchanged from December at 4.25-4.50 percent and 3.10 percent respectively in March. On the contrary, the Bank of Japan raised its interest rates in January by 25 bps to 0.50 percent, registering a third-rate hike since March 2024 to support the economy's fragile recovery. It kept the rate unchanged in its March meeting.

Source: Various Central Bank websites

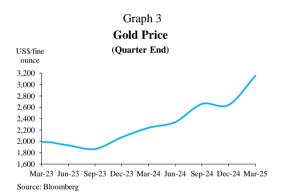

Commodities noted mixed outcomes in the March quarter (March end vs December end). Gold and Brent crude oil prices rose while sugar and food prices dropped over the review period.

World market sugar prices¹⁰ fell over the quarter by 2.1 percent, settling at US18.86 cents per pound at March-end, as persistent demand concerns continued to weigh on the market, despite temporary relief from President Trump's sweeping reciprocal tariffs (Graph 2).

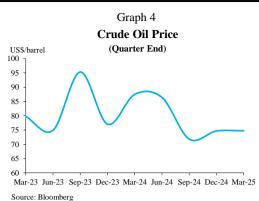

¹⁰ Month-end world market sugar prices per the New York No. 11 benchmark.

Gold prices significantly rose to US\$3,154.8 per fine ounce from December-end by 19.5 percent, recording a historic month-end high, reflecting the precious metal's value as a safe-haven against geopolitical uncertainties and global trade tensions (Graph 3).

The **Brent crude oil** price rose marginally by 0.1 percent over the quarter and closed March at US\$74.7 per barrel, amid President Trump's threats of sanctions on Iranian and Russian oil (Graph 4).

Global food prices¹¹ fell slightly by 0.2 percent in March, reaching 127.1 points compared to the previous quarter-end (Graph 5). The outcome was mainly driven by a fall in sugar, meat and cereals prices over the December quarter. Overall, the index was 6.9 percent higher than the same period last year but remained 20.7 percent below its peak reached in March 2022.

¹¹ As measured by the Food and Agriculture Organisation (FAO) Food Price Index.

THE DOMESTIC ECONOMY

Domestic Economic Conditions

The Fijian economy is projected to grow by 3.4 percent in 2025, largely driven by services sector activity (Graph 6). The economy is forecast to expand in 2026 and 2027 (2.9% and 2.8%, respectively). Considering the growing uncertainty surrounding the global economy, the IMF and other stakeholders¹² have recently revised their growth forecast down. The Macroeconomic Committee¹³ is currently reviewing Fiji's growth projections.

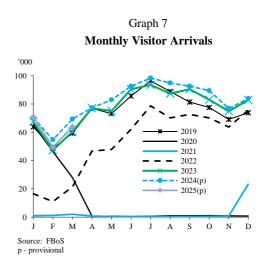

Production

Generally, monitored sectoral outcomes were mixed in the March quarter.

Visitor arrivals dipped in the March quarter, registering an annual fall of 5.3 percent to total 184,119 visitors (from 194,391 visitors in the March 2024 quarter) (Graph 7).

Lower arrivals largely from Fiji's key source markets - Australia (-8.5%; -3.8 percentage points (pp)) and NZ (-14.1%; -2.7 pp), including the Asian markets particularly China (-17.3%; -0.7pp) and Canada (-12.6%; -0.4pp), morethan-offset higher arrivals from the Pacific Islands (22.7%; 1.7pp) and USA (8.2%; 1.0pp).

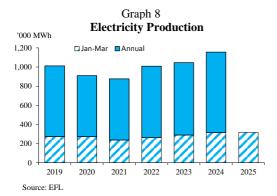

Electricity production in the year to March increased slightly (0.3%) to 315,926 Megawatt hours (MWh), compared to the 8.9 percent rise in the relative period last year (Graph 8). Renewable energy sources, on the other hand, generated less energy (-6.8%), which accounted for 61.7 percent (194,813 MWh) of total electricity generated.

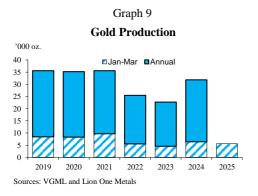

¹² Westpac and ANZ.

¹³ The MC is made up of heads and senior representatives from the Ministry of Finance; Fiji Bureau of Statistics (FBoS); Ministry of Trade, Co-

operatives and Small and Medium Enterprises, Ministry of Tourism and Civil Aviation, Office of the Prime Minister; Investment Fiji; Fiji Revenue & Customs Service and the Reserve Bank of Fiji.

Gold production fell cumulative to March by 11.8 percent, largely underpinned by maintenance and repair works in both mines¹⁴ early in the year, producing 5,649.5 ounces (oz), contrary to the positive outturn (40.4% to 6,404oz) in March 2024 (Graph 9). In contrast, mineral water production rebounded, improving in the year to March by 26.8 percent, following the successful completion of calibration work by the largest water-bottling company.15 However, going forward, production levels may be negatively impacted by the recently imposed US tariffs.

The timber industry began the 2025 season on a positive note, recording favourable results. In the year to March, wood supply noted a turnaround and grew (by 83.4%) to 20,512 tonnes (t) compared to a contraction (-41.6%, to 11,184.2t) noted in the comparable period in 2024. Woodchip output significantly improved by 192.6 percent, churning 26,369 tonnes of chips. Similarly, timber production sawn increased (121.2%) to 6,666 cubic metres (m^3) , due to early production compared to last year.¹⁶ Mahogany production was also boosted (149.8% to 7,992.9m³), mainly resulting from continued favourable weather conditions into the year.

Consumption

Consumption spending continued positively into 2025 as partial indicators remained generally positive in the first quarter, underpinned by improved household incomes, inward remittances, and relatively higher government expenditure.

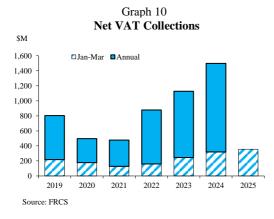

Cumulative to March, net VAT collections increased by 11.7 percent (to \$357.1m) over the year, attributed to higher domestic (15.8%, to \$242.4m) and customs VAT (11.1%, to \$223.4m) collections which more-than-offset the increase in refunds (17.9%, to \$110.2m) (Graph 10).¹⁷

¹⁷ The VAT rate on non-essential items increased from 9 percent to 15 percent since 1 August 2023.

¹⁴ Tuvatu and Vatukoula Gold Mines.

¹⁵ The Company is a major player in the industry.

¹⁶ There was no production of sawn timber and woodchip in January 2024 due to damages to the boiler and generator resulting from a fire.

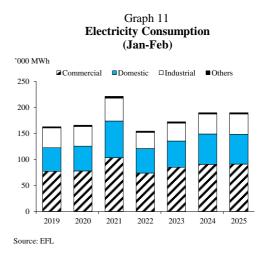

In the year to March, total vehicle registrations increased by 34.0 percent (to 3,693 registrations), from the 20.4 percent growth noted in the same period in 2024. The upbeat outcome was mostly attributed to increases in both second-hand vehicle registrations (31.0%, to 2,074 registrations) and new vehicle registrations (38.1% to 1,619 registrations). Correspondingly, new lending in the personal transport category (excluding refinancing) grew significantly by 74.0 percent (to \$26.0m) in March, mirroring the growing demand for vehicles.

Moreover, new consumption-related loans, a leading indicator of consumption activity, rose by 58.2 percent (to \$654.7m) in March from the 13.4 percent growth (\$413.7m) recorded in March 2024. The growth was predominantly driven by the wholesale and retail sector which noted an expansion of 63.4 percent (to \$575.2m). After adjusting for price effects in new consumption lending, a lower growth of 54.7 percent was recorded in real terms.¹⁸

Electricity consumption rose annually by a marginal 0.01 percent (to 189,786 MWh)

cumulative to February, mainly due to the increased demand from the industrial users (2.3%) (Graph 11).

The WRT¹⁹ Survey revealed that total sales income rose annually (4.6%) to \$6,890.2 million in 2024. However, in real terms,²⁰ WRT sales noted a slight increase of 0.1 percent, as prices for major trading commodities, particularly food, nonalcoholic beverages, alcohol and tobacco were high during the period.²¹

Similarly, based on the Feb-25 RSS, retail sales are estimated to expand by 4.0 percent in 2025, although lower from the earlier forecast (7.0%) in August 2024. Retail sales performance is expected to be driven by most sectors, particularly by the food & drinks (2.70p; fuel (0.49pp); household building goods (0.36pp); materials (0.31pp); motor cars (0.23pp); footwear (0.31pp); and others (0.22pp) categories. For next year, the RSS also indicates a downgrade to growth in sales from 8.0 percent anticipated in the earlier survey to 6.3 percent, while retail sales is forecast to

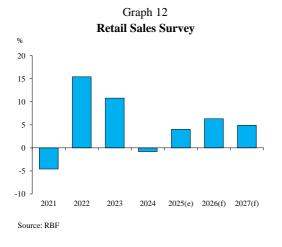

¹⁸ Deflated by CPI.

¹⁹ Wholesale, Retail, Trade.

²⁰ Deflated by the average CPI up to September.

²¹ Deflated by the 2024 annual average CPI. In 2024, annual average inflation was 4.5%.

grow by 4.9 percent in 2027 (Graph 12).

Investment

Key leading indicators of investment activity have shown a gradual improvement at the start of 2025

Domestic cement sales continued to improve by an annual 8.6 percent in the year to March (to 30,359 tonnes), somewhat reflective of increased market demand.

However, the estimated value of work putin-place,²² a measure of construction activity, was low (-4.4% to \$533.4m) annually in 2024, likely due to reduced private and public construction works. In real terms,²³ the total value fell annually (-5.5%), due to the prevailing high-cost environment that continues to impact investment activity. The slowdown in construction activity was primarily driven by a reduced value of work put-in-place during the first and third quarters of 2024, compared to the same period in 2023, which collectively contributed to the overall decline in construction output.

New loans for investment purposes (excluding refinancing) grew by 12.2 percent (to \$183.5m) cumulative to March, mostly driven by higher lending to the building & construction (B&C) sector (39.1% to \$62.6m), and private individuals for second-home purchases (79.7% to \$29.5m). In real terms, new investmentrelated lending (excluding refinancing) grew by 8.1 percent (\$131.4m), mirroring to some extent increased construction input cost.

On the other hand, the total number of building permits issued,²⁴ a forward-looking indicator, declined over the year in 2024 (-41.0%). However, the total value of building permits significantly rose, the highest level so far, by 92.2 percent (to \$589m), partly reflective of higher construction costs, in line with the rising building material price index. In real terms, the annual value of building permits issued grew by 89.9 percent (\$429m).

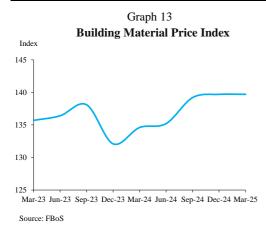

On price developments,²⁵ building material prices in the first quarter of 2025, rose annually by 3.8 percent (to 139.7 points), in contrast to the 0.8 percent fall in the March 2024 quarter. The higher trend is primarily driven by higher prices of cement and related materials, wood and related materials, and electrical products (Graph 13).

²² Lagged Data.

²³ Deflated outcome based on average annual BMPI data.

²⁴ Lagged Data.

²⁵ This is based on the new 2019 BMPI base.

According to the RBF's Feb-25 BES results,²⁶ a majority of surveyed businesses plan to invest in plant & machinery (23.6%) in the medium term, higher than the last survey (17.2%), whereas plans to invest in buildings for the next 12 months declined (-1.3%) and was on net, lower than the Aug-24 survey (8.4%).

Increased intentions to invest in plant & machinery were led by long-term strategies for higher investment by the water supply, construction, transport & storage and manufacturing sectors. This aligns with the continued increase in imports of machinery & transport equipment imports cumulative to 6 months from the survey period.

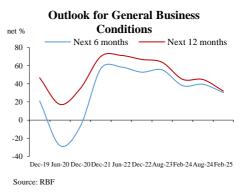

On the other hand, lower investment plans in buildings was underpinned by the real estate, human health & social work activities, ICT, business services and water supply sectors. This is in tandem with the number of building permits, a key leading indicator for construction activity, which had been trending downward (-41.0%) during the same period of the survey.

Furthermore, the overall outlook for business conditions remains generally optimistic on net across all sectors in the next 6 to 12 months (30.4% and 32.0%),

although slightly lower than the previous survey (39.5% and 44.7%) (Graph 14).

The lower net response is due to most businesses expecting conditions to remain the same in the short term (6 months) and improve in the medium term (12 months). The positive but somewhat stagnant growth stems from more businesses shifting perceptions to no change or business conditions remaining the same in the next 6 months (55.9% from 49.3% in Aug-24) and 12 months (39.9% from 46.1% in Aug-24), pulling down the net response rate.

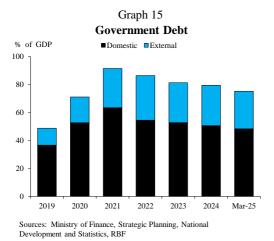

However, uncertain economic conditions, high cost of utility/doing business, poor infrastructure, unfavourable weather conditions and stiff competition in the market can impact investment plans going forward. Thus, businesses have identified cost management or reduction, operational efficiency and revenue growth, as key priorities in the next 6-12 months.

Public Finance

Government debt stood at \$10,826.4 million in March 2025, or 75.2 percent of GDP²⁷ (Graph 15). Domestic debt totalled \$6,947.9 million (48.2% of GDP), while external debt stood at \$3,878.6 million (26.9% of GDP).

²⁶ Weighted average response rate.

²⁷ Based on Nominal GDP.

Labour Market

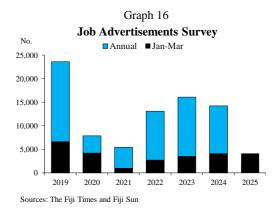

Labour supply and demand have stabilised as portrayed by indicators.

Migration trends²⁸ up to March showed an annual decline of 28.2 percent in the number of Fijian citizens travelling abroad for employment (-42.3%), education/training (-22.2%), and other purposes (-27.9.0%).

In the same period, 697 locals left the country under various labour mobility schemes, which denotes a decrease of 19.8 percent, largely attributed to the reduction in Recognised Seasonal Employer and PALM²⁹ long-term schemes which more-than-offset the growth in PALM short-term program.

The RBF Job Advertisements Survey indicates that the number of job vacancies fell marginally (-0.3% to 4,114 vacancies) cumulative to March, in contrast to an increase of 16.5 percent (4,128 vacancies) in the same period a year ago (Graph 16). Reductions in recruitment intentions were observed in all sectors except for mining & quarrying and community, social & personal services. As per the Feb-25 BES,³⁰ intentions to hire (full-time employment) increased (net 44.3% and 53.9%) in the next 6 to 12 months the compared to previous survey. underpinned by the education, water supply, construction, transport & storage, wholesale & retail trade and ICT sectors.

Likewise, wages paid to employees grew by 9.4 percent in the year to February, reaching \$721.8 million, similar to the 2024 comparative period (12.2%).reflecting enhanced wage compensation strategies aimed at employee retention and wage bargaining amid high cost-of-living The sectors that mainly pressures. contributed to the growth outcome include public administration & defence: compulsory social security, wholesale & retail trade; repair of motor vehicles & motorcycles, accommodation & food service activities and administrative & support service activities.

The BES also reports improvement in labour issues (58.4%), especially in sectors like construction, ICT, and education. However, migration remains a concern (40.1%) in industries such as water supply, construction, and finance. Businesses continue to lose mainly semi-skilled

²⁸ Resident departures for one year and above.

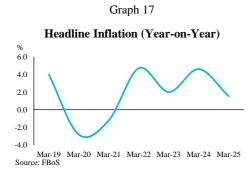

³⁰Weighted response rate.

²⁹ Pacific Australia Labour Mobility.

and highly (43.1%)skilled (42.5%) workers, mostly with 3-10 years of experience. Despite a degree of stabilisation in the labour market, 36.7 percent of businesses expect further worker-losses abroad in the next year, particularly in business services and tourism. Key hiring challenges include shortages (56.1%) skill and wage expectations (33.8%). To retain staff, a net 57.1 percent of businesses have increased wages or incentives.

Inflation

The annual headline inflation rate in March stood at 1.5 percent, from 4.6 percent recorded a year ago. Prices increased for alcoholic beverages, tobacco & narcotics, miscellaneous goods, food and nonalcoholic drinks and restaurants & hotels, which offset the declines noted in the transport and other categories (Graph 17).³¹

Inflation is expected to moderate further in the coming months, barring any major shocks. According to the BES survey, inflation expectations remain high for the next 6 to 12 months (53.2% and 66.5%), consistent with the previous survey. Most businesses anticipate inflation in the 4.0– 6.0 percent range. A majority of businesses foresee increases in labour costs (92.7%), raw materials (82.5%), freight (67.3%), and utilities/technology (36.4%) over the next year.

External Sector

Cumulative to February 2025, Fiji's merchandise trade deficit³² widened by 4.5 percent on an annual basis to total \$693.0 million, as the growth in imports (\$1,135.9m) outpaced the growth in exports (\$442.9m).

Total exports (excluding aircraft) expanded by 23.5 percent to \$442.9 million, compared to a lower growth of 5.1 percent in the same period last year. Domestic exports, particularly mineral water, kava and woodchips exports drove the betterthan-expected outcome. Re-exports were resilient and contributed positively to outcome, mainly in the mineral fuels, machinery & transport equipment, and fresh fish categories.

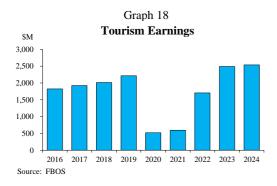

On the other hand, imports (excluding aircraft) grew by 11.2 percent to \$1,135.9 million, much higher than the growth of 0.8 percent noted in the corresponding period of 2024. The growth was driven by the machinery and transport equipment, mineral fuels and chemicals categories.

In 2024, tourism earnings grew by 1.9 percent to total \$2,536.8 million, led by higher average daily spending. This

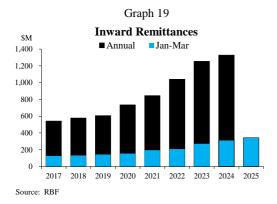

³¹ Other categories include the clothing & footwear, furnishing & repairs, housing & utilities, health, communication, recreation & culture and education categories.

³² Trade deficit (value of imports exceeding the value of exports) excluding aircraft.

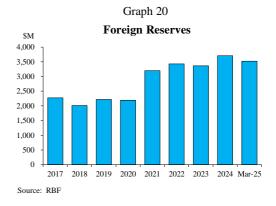

compares to the 46.3 percent growth (\$2,488.7m) in 2023 (Graph 18).

In the year to March, inward personal remittances grew by 10.3 percent to \$342.6 million, compared to 14.3 percent growth (\$310.5m) in the same period last year (Graph 19). The strong performance in inward remittances was led by major source markets such as Australia and the US, followed by NZ. Transfers received across all channels rose, with the share received via mobile money remaining the highest (46.0%) given its convenience, cost-effectiveness, and security. Outward remittances grew by 19.2 percent (\$22.5m from 10.1%, \$10.8m) in the same period to total \$139.6 million, driven by emigrant transfers and the transfers of non-residents Remittances on a net basis. overseas. increased annually to \$203.1 million (5.0%) cumulative to March.

Foreign reserves (RBF holdings) at Marchend stood at \$3,521.0 million (5.7 MORI), drawn down by \$186.8 million from the December quarter, as payments exceeded receipts, in line with seasonal trends during the period (Graph 20). Foreign reserves are projected to be comfortable in 2025 and remain adequate over the medium term.

Domestic Financial Conditions

The RBF maintained an accommodative stance and held the Overnight Policy Rate steady at 0.25 percent. Ample liquidity kept the lending rates near historical lows and aided the expansion in private-sector credit.

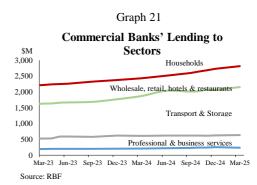

Banking system liquidity, measured by banks' demand deposits (BDD), increased over the year to \$2.0 billion (4.9%) at the end of March.

Financial Intermediation

Broad money (M3) growth decelerated over the year to 6.9 percent (\$782.9m) totalling \$12,061.3 million in March, lower than the 9.2 percent growth recorded a year ago. The slower growth was driven by soft pace expansion in net domestic assets (NDA) (6.3%, \$541.4m) and a pick-up in non-liquid liabilities³³ (NLL) (106.9%, \$97.3m), which outweighed the acceleration in net foreign assets (NFA) (12.0%, \$338.6m). The slowdown in NDA was attributed to the significant contraction in net credit to central Government (NC-CG) (-77.9%, -\$506.9m) which eroded some gains from strong private sector credit growth (11.0%, \$1,032.4m). The high growth in private sector credit was on account of increased financing to private sector business entities (PSBEs) (10.0%, \$639.2m) with most of these increases concentrated around the WRHR (13.6%, \$273.7m) and the RE (11.2%, \$205.7m) sectors. Additionally, the annual growth in NFA was largely driven by increases in reserves (12.2%, gross \$387.7m), specifically foreign reserves (FR) (11.9%, \$374.2m), coupled with the rise in other foreign assets (OFA) (25.6%, \$182.8m) which outweighed the strong growth in foreign liabilities (FL) (21.5%, \$231.9m).

Within the components of M3 on the liabilities side, the annual expansion was primarily driven by narrow money (M1) (6.8%, \$573.8m) coupled with positive contributions from other deposits (OD) currencv (7.3%)\$204.7m) and in circulation (CIC) (3.9%, \$31.4m). The notable rise in M1 was mainly driven by higher transferable deposits (7.1%)\$542.4m), particularly the demand deposits PSBEs. public enterprises of and households (HH).

Commercial banks' (CBs) outstanding loans rose by 12.3 percent (\$1,076.9m) to \$9,825.3 million in March, compared to 10.5 percent in the same 2024 period. The outcome was led by the HHs (\$383.7m), WRHR (\$281.9m), RE (\$198.3m) and B&C sectors (\$152.0m), which offset the contractions noted in the manufacturing (-\$78.3m) sector (Graph 21).

CBs' **new lending** rose by 34.8 percent to \$1,270.2 million in the year to March. The annual growth in new lending was largely led by the WRHR sector (\$240.2m), while the HHs (\$52.5m), T&S (\$27.1m), B&C (\$19.4m) and agriculture (\$19.2m) sectors contributed to a lesser extent. These outweighed the declines noted in the manufacturing (-\$45.4m) and the professional & business services (P&BS) (-\$17.0m) sectors.

CBs' lending rates remained low while term deposit rates rose over the review period. The weighted average new lending rate fell to 4.77 percent from 4.86 percent in the same period last year, while the weighted average outstanding lending rate fell to 4.51 percent in March 2025, from 4.72 percent recorded in the previous year.

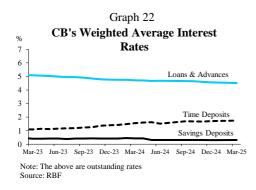

The weighted average new time deposit rate dropped to 1.78 percent from 2.05 percent in the previous year, while existing time deposit rates rose to 1.74 percent in March 2025 from 1.55 percent in March 2024. The uptick in the weighted average time deposit rate was led by movements in short-term maturities offering higher rates and attracting higher volume of deposits. As a result of these movements, the new

³³ NLL is subtracted from NFA and NDA to get the broad money figure. Thus, an increase in NLL

implies it contributed negatively to the broad money growth.

(18bp) interest rate spread widened while the existing (-40bp) interest rate spread narrowed over the year in March 2025 (Graph 22).

As per the Feb-25 BES results, respondents expect the demand for credit to remain broadly stable with expectations on lending rates mostly unchanged in the next 6-12 months.

Money Market

Government treasury bills (T-Bills) remained oversubscribed by \$90.0 million in the March quarter,³⁴ with a total of \$45.0 million accepted on the 91, 182 and 364-day maturity ranges, yielding³⁵ 0.15, 0.40 and 1.14 percent, respectively.

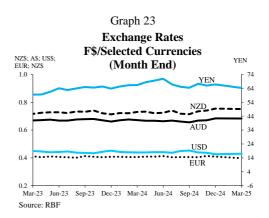

Bond Market

The Fiji Government Infrastructure bonds were oversubscribed by \$29.0 million in the March quarter, and \$141.0 million was accepted on the 10 and 20-year maturities with yields of 3.90 and 5.00 percent respectively. FDB bonds were undersubscribed by \$29.00 in the first quarter of 2025 and \$31.0 million was accepted on the 5, 6 and 7-year maturities with yields of 4.30, 4.33 and 4.62 percent, respectively. There were no issues of Viti bonds recorded in the March quarter.

Exchange Markets

Exchange rate movements between the Fijian dollar (FJD) and major trading partner currencies noted mixed outcomes over the year to March (Graph 23).

In March 2025, the Fijian dollar (FJD) strengthened against the New Zealand dollar (NZD) (2.8%) and Australian dollar (AUD) (1.7%) on an annual basis but depreciated against the Japanese Yen (JPY) (-3.1%), the US Dollar (USD) (-2.1%) and the Euro (EUR) (-2.0%).

Banking Industry Quarterly Condition Report – 31 December 2024

Overview – Commercial Banks

Commercial banking sector performance was considered satisfactory, supported by satisfactory earnings, capital and liquidity

³⁴ Issued in January and February only.

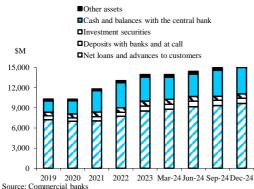

³⁵ Rates quoted for the money and bond market are the weighted average rates.

Balance Sheet

Total assets of commercial banks expanded by 3.4 percent (or \$505.6m) to \$15.5 billion over the quarter, and 11.1 percent (or \$1.5b) over the year.

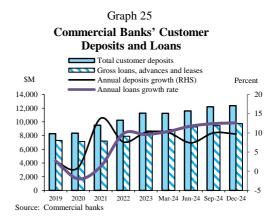

The quarterly growth was mainly driven by the increase in net loans, other assets, investments, statutory reserve deposits and exchange settlement account (Graph 24).

Total assets made up 48.6 percent of the financial system (excluding the RBF) gross assets of \$32.7 billion as at 31 December 2024.

Total deposits grew by 1.3 percent (or \$153.2m) over the quarter to \$12.4 billion, as a result of growth in demand deposits (by \$219.6m), while time deposits and savings deposits noted a decline of \$64.0 million and \$2.4 million, respectively (Graph 25).

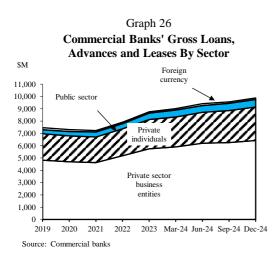

Over the quarter, demand deposits increased by 2.3 percent to \$9.9 billion, underpinned by deposit placements from public enterprises, non-bank financial institutions (NBFIs) and private individuals (PIs), which outweighed the withdrawals made by private sector business entities (PSBEs), central government, local government and non-residents.

In contrast, time deposits fell by 2.5 percent over the month to \$2.5 billion, primarily due to maturities for public enterprises, PIs and non-residents, which offset the increase in placements by NBFIs, PSBEs, and central government.

Similarly, savings deposits fell by 5.2 percent to \$43.0 million, due to withdrawals by PIs.

In terms of composition, demand deposits continued to account for majority of the commercial banks' total deposits at 79.8 percent, followed by time and savings deposits at 19.8 percent and 0.3 percent, respectively. Commercial banks' gross loans & advances stood at \$9.7 billion, noting a growth of 3.3 percent (or \$315.5m) over the quarter and 12.6 percent (or \$1.1b) over the year. The increase in lending over the quarter was largely driven by loans to PSBEs and PIs (Graph 26).

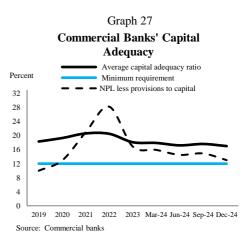

New loans disbursed during the review quarter amounted to \$1.3 billion and were concentrated in the wholesale, retail, hotels & restaurants (WRHR) sector at 36.0 percent, followed by PIs at 20.7 percent and real estate at 11.5 percent sectors.

The 15 largest credit exposures of commercial banks totalled \$2.6 billion as at 31 December 2024, and represented 26.3 percent of the industry's gross loans, and 145.4 percent of total capital.

Capital Adequacy

The aggregated capital adequacy ratio fell slightly to 17.0 percent as at 31 December 2024 (September 2024: 17.5%), resultant of a larger increase in total risk weighted assets by 5.5 percent (or \$517.2m) compared to the total capital by 2.2 percent (or \$36.1m).

All commercial banks complied with the prudential minimum capital adequacy requirement of 12.0 percent and continued to be assessed as satisfactory (Graph 27).

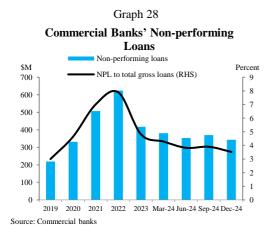

The increase in total capital was attributed to the growth in unaudited retained profits (net of appropriation) by \$25.6 million and tier one/core capital by \$17.3 million.

The increase in total risk weighted assets, on the other hand, was due to the growth in on-balance sheet exposures by 5.8 percent (or \$475.4m) to \$8.7 billion, largely stemming from the 100 percent risk weighted assets (by 8.1% or \$565.4m) and off-balance sheet exposures by 3.7 percent (or \$41.8m) to \$1.2 billion.

Non-performing loans (NPLs) less specific provisions to capital ratio stood at 13.0 percent, decreasing from 14.9 percent reported in the prior quarter, due to a fall in NPLs (by 7.1%) and complemented by the increase in capital & reserves (by 1.7%). However, commercial banks' capital positions remain vulnerable to credit risk given the growth noted in on-balance sheet risk weighted assets over the review quarter.

Asset Quality

Commercial banks continued to be assessed as marginal in asset quality, as classified exposures to gross loans ratio improved slightly to 3.5 percent (September 2024: 3.9%), compared to 4.8 percent for the same period a year ago (Graph 28).

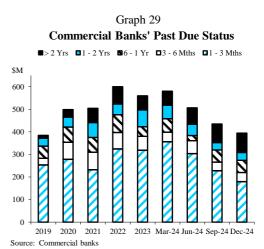

Classified exposures fell over the quarter by 7.1 percent (or \$26.2m) to \$343.9 million, driven by decreases in the substandard (to \$141.7m) and loss (to \$43.4m) categories, which offset the increase in the doubtful category (to \$158.7m). The special mention category noted an increase of 25.0 percent to \$231.2 million.

Past due levels rose over the quarter by 3.8 percent (or \$7.9m) to \$214.9 million (Graph 27), due to increases noted in accounts aged "over two years", "three to six months" and "one to two years" outweighing the decrease in accounts category "six months to one year". Less than three months accounts decreased by \$47.9 million to \$179.6 million.

NPLs were concentrated in the PIs sector at 28.0 percent, followed by the real estate (22.9%), WRHR (14.4%), transport &

storage (10.5%), and manufacturing (10.1%) sectors.

In terms of coverage, specific provisions slightly increased over the quarter by 2.3 percent (or \$2.5m) to \$114.4 million, due to the improvement in individually assessed provisions, while collectively assessed provisions recorded a decrease (by \$5.0m). Banks' impaired assets decreased by \$3.6 million to \$229.2 million. Specific provisions to non-performing loans stood at 33.3 percent (September 2024: 30.2%).

General reserve for credit losses (GRCL) decreased by 9.8 percent (or \$12.0m) to \$109.9 million and covered 1.1 percent of net loans.

Earnings and Interest Spread

Earnings performance was assessed as satisfactory, as net profit before tax (NPBT) increased by 16.0 percent to \$102.7 million, compared to \$88.5 million recorded in the prior quarter.

On an annual basis, net profit before tax decreased by 2.3 percent from \$105.1 million (Table 2).

The quarterly growth noted in before tax profits was due to the increase in both net

interest income (by \$3.9m) and noninterest income (by \$3.7m), against a decrease in operating expenses (by \$1.7m). Commercial banks' operating income stood at \$177.9 million, an improvement of 4.5 percent (or \$7.6m) from the prior quarter.

Operating expenses fell over the quarter by 2.1 percent to \$81.1 million, largely due to a decrease in 'other expenses', while increases were noted in 'personnel expenses', 'other management expenses and depreciation/amortisation.

Bad debts & provisions expenditure fell by \$4.9 million over the quarter, as loan loss provisions decreased by \$4.7m. Bad debt write-offs increased by 12.1 percent, while recoveries marginally improved to \$1.5 million.

An increase in operating income compared to a fall in operating expenses, resulted in a slight improvement in efficiency ratio from 48.6 percent to 45.6 percent.

Source: Commercial banks

In line with the improvement in profits reported in the review quarter, the annualised return on assets (ROA) and return on equity (ROE) for commercial banks increased to 2.1 percent (September 2024: 1.9%) and 18.1 percent (September 2024: 15.9%), respectively.

The combined interest spread for commercial banks noted a slight increase over the quarter at 3.1 percent (September 2024: 3.09%), with cost of funding decreasing by 1 basis point and yield on earning assets remaining constant from the prior quarter (Graph 30).

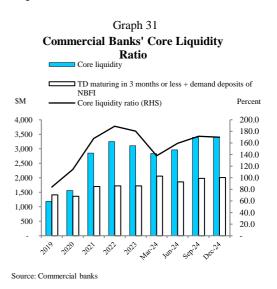

Liquidity

The aggregated liquidity position of commercial banks was assessed as satisfactory in the review quarter. Liquid assets³⁶ increased slightly by 1.9 percent to \$4.1 billion, largely due to the increase in investments and ESA.

Liquid assets ratio stood at 26.3 percent, compared to 26.7 percent in the prior

quarter, while the loans to deposits ratio rose slightly to 79.0 percent (September 2024: 77.4%). Commercial banks' core liquidity³⁷ ratio also decreased, to 169.9 percent from 171.4 percent recorded in the prior quarter, however the commercial banks continued to be assessed as adequately placed to meet short term withdrawal of funds (Graph 31).

Commercial banks' average Liquidity Coverage Ratio³⁸ (LCR) was recorded at 110.3 percent. All the commercial banks met the 60.0 percent minimum LCR required for 2024 and remain on track to meet the 70.0 percent minimum LCR required for 2025.

Overview – Credit Institutions

Credit institutions' aggregated performance was assessed as satisfactory for the quarter, with satisfactory capital, earnings and liquidity positions, despite a poor asset quality rating.

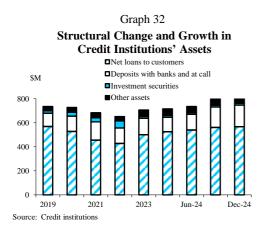

³⁶ Liquid assets include cash on hand, demand balances at RBF, demand and term balances due from corresponding foreign banks and holding of government and quasi government debt securities.

³⁷ Core liquidity includes cash on hand, demand balances at RBF and demand balances due from corresponding

foreign banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in less than three months plus demand deposits of non-bank financial institutions. 38 Liquidity coverage ratio (LCR) is the ratio of stock of high quality liquid assets over the total net cash outflows over the next 30 calendar days.

Balance Sheet

The aggregated assets of credit institutions increased by 2.1 percent over the quarter to \$814.1 million, as a result of increases in mainly deposits with banks and net receivables. On an annual basis, assets grew by 15.0 percent from \$707.6 million (Graph 32).

Balance Sheet Funding

Deposits increased by 7.0 percent over the quarter to \$546.9 million (Graph 32), attributed to placements mainly by public enterprises, PIs, and NBFIs. On an annual basis, total deposits recorded a growth of 29.0 percent (or \$123.1m).

In terms of deposit holdings by sector, the PIs (30.5%) and PSBEs (27.9%) sectors continued to dominate with PEs and NBFIs holding 21.0 percent and 16.1 percent respectively.

The largest 15 depositors totalled \$214.3 million and represented 39.2 percent of the credit institutions' total deposits.

Financial Intermediation

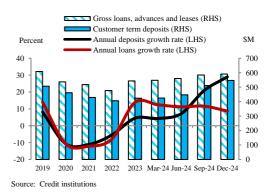

Total loans increased over the quarter by 1.1 percent to \$590.5 million and represented 69.1 percent of total assets. The growth in lending was largely driven by the increase in borrowings by PSBEs, while there was a slight reduction noted in private individuals borrowing. Annual loan growth was recorded at 8.7 percent from \$543.1 million.

Loans to PSBEs increased by \$11.6 million (or 3.9%) to \$305.2 million, in which increases were largely noted in lending to the 'others', building & construction, transport & storage, mining & quarrying, agriculture, real estate and WRHR sectors.

Loans to PIs fell by 1.8 percent to \$283.2 million, underpinned by the decline in loans to cars, motorcycles & other personal transport purpose.

Largest 15 credit exposures of credit institutions were reported at \$35.1 million and represented 5.9 percent of total loans.

Capital Adequacy

Credit institutions' capital adequacy ratio remained satisfactory for the review quarter, with an increase from 24.8 percent to 28.2 percent in the December 2024 quarter. The increase in capital adequacy ratio was due to a greater increase in total capital compared to the risk weighted assets.

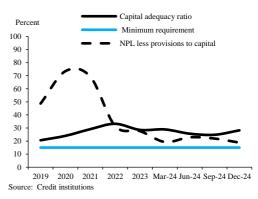

All credit institutions maintained their capital adequacy ratios above the minimum prudential requirement of 15.0 percent.

Total risk weighted assets slightly increased by 0.5 percent to \$632.3 million, as a result of the increase in claims on banks, which offset the decrease in other Fiji Government guaranteed securities & claims and other loans to private sector.

Total capital grew over the quarter by 14.1 percent to \$179.0 million, attributed to increases in paid-up capital, disclosed reserves and 'others' category.

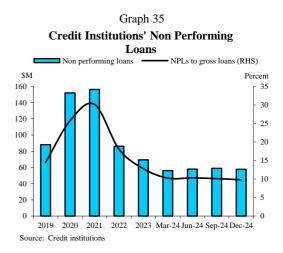

Credit institutions' ability to withstand NPLs related losses, as indicated by the NPLs less provisions to capital ratio, improved from 21.9 percent to 18.8 percent, due to the increase in capital, whilst classified exposures reduced by \$1.1 million (Graph 34).

Asset Quality

Asset quality was assessed as marginal, with classified exposures to gross loans reported at 9.8 percent (September 2024: 10.1%) (Graph 35).

Classified exposures reduced over the quarter by 1.9 percent (or \$1.1m) to \$57.7 million, due to the reduction in doubtful and substandard accounts, while loss accounts increased slightly. Special mention accounts stood at \$66.4 million increasing over the quarter by 0.6 percent.

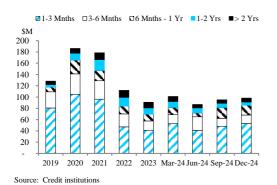

Similarly, impaired assets decreased over the quarter by 3.5 percent to \$46.9 million and represented 8.0 percent of gross loans.

Specific provisions to classified exposures increased to 39.4 percent from 38.2 percent recorded in the prior quarter. This was due to the increase in specific provisions, registering an increase of 1.0 percent (or \$0.2m) over the quarter.

GRCL increased by \$0.9 million to \$12.7 million and covered 2.2 percent of net loans as at 31 December 2024.

Past due levels improved over the quarter and stood at \$45.2 million in the review quarter (September 2024: \$46.9m) with decreases noted for the 6 months – 1-year and 1-2 years buckets (Graph 36).

Graph 36 Credit Institutions' Past Due Status

Earnings and Interest Spread

Earnings performance of the credit institutions was assessed as satisfactory for the review quarter, with an increase in profit before tax to \$10.0 million compared to \$9.7 million reported in the prior quarter (Table 3). The increase in profit before tax was mainly due to the decline in bad debts and provisions expense.

Source: Credit institutions

Net interest income remained at \$21.6 million while non-interest income noted a downward movement by 7.1 percent to \$1.3 million in the review quarter.

Operating expenses increased by 8.4 percent over the quarter to \$10.3 million, underpinned by the increases in other expenses, personnel expenses, other management expenses, and depreciation/ amortisation expenses. Bad debts and provisions expense decreased by 31.6 percent over the quarter to \$2.6 million.

Efficiency ratio stood at 45.0 percent compared to 41.3 percent in the prior quarter, with an increase in operating expenses (by 8.4%) compared to the decline in operating income by 0.4 percent. Annualised interest margin (interest spread) increased to 11.3 percent in the review quarter, compared to 9.6 percent in the previous quarter, due to a higher rate of decline in cost of funds than the yield on earning assets (Graph 37).

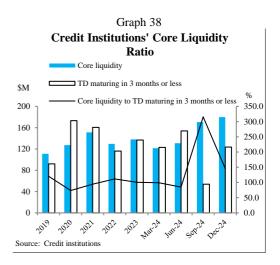

Credit institutions' annualised ROE and ROA ratios (after tax) were recorded at 18.5 percent and 5.0 percent, respectively.

Liquidity

Liquidity position of credit institutions was assessed as marginal. Liquid assets³⁹ increased by 5.2 percent (or \$9.6m) over the quarter to \$194.1 million, as a result of

growth in deposits with banks. Liquid assets represented 23.8 percent of the credit institutions' total assets.

Core liquidity⁴⁰ ratio decreased over the quarter to 145.5 percent from 315.5 percent, attributed to a slower growth in core liquid assets (by 5.6%) compared to the maturing short-term deposits (by 128.7%) (Graph 38).

Insurance Industry Quarterly Condition Report – 31 December 2024

The insurance industry's overall performance continued to be assessed as satisfactory in the December 2024 quarter, based on satisfactory solvency, liquidity and earnings positions.

Life Insurance Sector

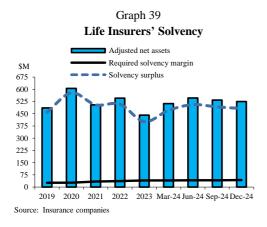

Capital

Life insurers' solvency position continued to be assessed as strong as it stood at \$482.1 million against the minimum solvency requirement of \$43.1 million, despite

³⁹ Liquid assets include demand and term balances with banks, and holdings of Government and Quasi Government debt securities.

⁴⁰ Core liquidity includes demand balances with banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months.

declining by 2.0 percent (or \$10.0m) over the quarter. The decrease was due to higher increase in adjusted liabilities of 4.6 percent compared to the increase in admissible assets by 3.0 percent. As a result of the above, the solvency capital (net adjusted assets) held by the life insurance sector reduced by 1.6 percent to \$525.2 million (Graph 39).

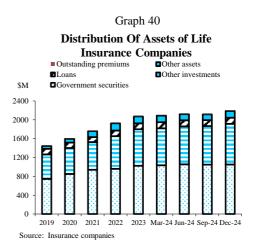

Assets

Total assets of the life insurance sector stood at \$2.2 billion, an increase of 3.3 percent (or \$70.8m) over the quarter and noted a growth over the year of 5.6 percent (or \$144.5m).

The quarterly growth in total assets was primarily driven by an increase in investments (by \$48.2m), followed by increases in cash on hand (by \$23.4m) and policy loans (by \$1.1m).

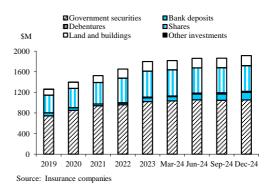

Investments remained the dominant component of total assets in the life insurance sector, accounting for 87.3 percent, followed by other assets at 6.6 percent and policy holder loans at 5.9 percent. Government securities continued to make up the largest share of total investments, representing 55.0 percent, followed by shares at 25.9 percent, land and buildings at 10.3 percent, bank deposits at 7.6 percent, and debentures at 1.2 percent (Graph 40).

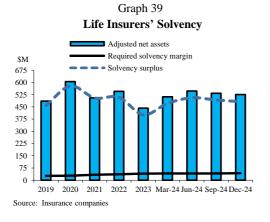

Total investments of life insurers grew over the quarter by 2.5 percent (or \$48.2m) and stood at \$1.9 billion. The growth emanated from the increases in bank deposits, the increase in financial year end valuations with coupled land and building appreciations, shares in related persons, in non-related persons shares and debentures with related persons (Graph 41).

Graph 41

Composition of Investments

the quarter. The decrease was due to higher increase in adjusted liabilities of 4.6 percent compared to the increase in admissible assets by 3.0 percent. As a result of the above, the solvency capital (net adjusted assets) held by the life insurance sector reduced by 1.6 percent to \$525.2 million (Graph 39).

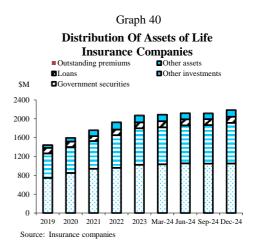

Assets

Total assets of the life insurance sector stood at \$2.2 billion, an increase of 3.3 percent (or \$70.8m) over the quarter and noted a growth over the year of 5.6 percent (or \$144.5m).

The quarterly growth in total assets was primarily driven by an increase in investments (by \$48.2m), followed by increases in cash on hand (by \$23.4m) and policy loans (by \$1.1m).

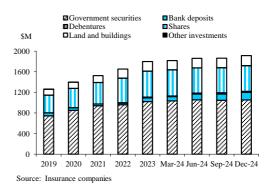

Investments remained the dominant component of total assets in the life insurance sector, accounting for 87.3 percent, followed by other assets at 6.6 percent and policy holder loans at 5.9 percent. Government securities continued to make up the largest share of total investments, representing 55.0 percent, followed by shares at 25.9 percent, land and buildings at 10.3 percent, bank deposits at 7.6 percent, and debentures at 1.2 percent (Graph 40).

Total investments of life insurers grew over the quarter by 2.5 percent (or \$48.2m) and stood at \$1.9 billion. The growth emanated from the increases in bank deposits, the increase in financial year end valuations with coupled land and building appreciations, shares in related persons, in non-related persons shares and debentures with related persons (Graph 41).

Graph 41

Composition of Investments

Liabilities

Total liabilities of life insurers increased over the quarter by 3.3 percent (or \$66.5m) to \$2.1 billion. The increase was underpinned by the growth in the balance of revenue account of 2.8 percent (or \$54.8m), which remained the major liability of life insurers at 96.1 percent. On an annual basis, life insurers' total liabilities recorded an increase of 6.0 percent (or \$118.1m) from \$2.0 billion.

'Other provisions' for the life insurance sector noted an increase of 6.6 percent (or \$2.8m) to \$46.0 million, owing to the increase in taxation and doubtful debts.

Earnings

Life insurers' earning performance remained satisfactory for the review quarter, as the consolidated after-tax profit improved significantly by 190.9 percent (or \$14.4m) to \$22.0 million. On an annual basis, a lower growth of 2.1 percent (or \$0.5m) from \$21.5 million recorded in the previous year was noted.

In line with the above, total income grew by 92.6 percent to \$113.2 million for the quarter. The growth was largely attributed to the increase in dividend income and asset value appreciation by \$26.1 million and \$25.8 million, respectively.

Similarly, total outgoings of life insurers increased by 73.8 percent (or \$37.9m) over the quarter, mainly resulting from the increase in net policy liabilities (by \$30.3m) and net policy payments (by \$5.3m).

Liquidity

Life insurers' core liquidity continued to grow over the quarter by 22.8 percent (or \$46.4m) and stood at \$249.9 million, attributed to the increase in both cash on hand and bank deposits by \$23.4 million and \$23.0 million, respectively.

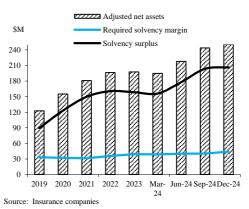

The broad liquidity ratio (including government securities), which gauges the ability of life insurers to meet their total liabilities, showed a slight improvement, rising to 62.0 percent from 61.5 percent in the previous quarter. Overall, the liquidity position of life insurers remained satisfactory.

General Insurance Sector

Capital

General insurers' solvency position remained satisfactory, as the consolidated solvency surplus increased by 1.4 percent (or \$2.9m) to \$206.4 million and is substantively above the mandated requirement of \$44.0 million (Graph 42).

Total net adjusted assets grew by 2.7 percent (or \$6.6m) and stood at \$250.3 million, underpinned by a greater increase in total admissible assets (by \$20.6m) compared to total adjusted liabilities (by \$14.0m).

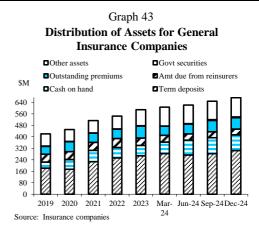

Assets

Total assets grew over the review quarter by 3.7 percent (or \$24.1m) to \$672.7 million. On an annual basis, general insurers' total assets increased by 14.1 percent (or \$83.3m) from \$589.5 million.

The increase was mainly attributed to the increase in bank deposits, land & buildings, shares in related persons, and cash on hand.

The review quarter noted growth in investments of general insurers, increasing by 7.3 percent (or \$26.7m) to \$391.6 million, stemming from the growth in bank deposits, land & buildings and shares in related persons. Total investments represented 58.2 percent of total assets and stood at \$391.6 million as at 31 December 2024.

Bank deposits continue to dominate general insurers' total assets at 45.3 percent (or \$304.4m), followed by other assets at 19.9 percent, whilst cash on hand, outstanding premiums, amounts due from reinsurers, and government securities stood at 16.3 percent, 11.9 percent, 5.9 percent and 0.7 percent respectively (Graph 43).

Reinsurance

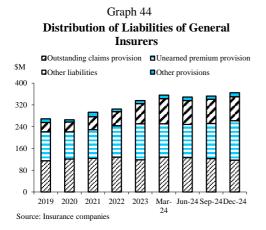

General insurers' reinsurance premiums ceded offshore fell by 38.3 percent (or \$4.7m) to \$7.6 million in the review quarter (September 2024: \$12.3m). All general insurers complied with the reinsurance requirements.

Liabilities

Total liabilities of general insurers increased by 3.3 percent (or \$11.7m) over the quarter and stood at \$369.7 million. Annually, total liabilities grew by 8.5 percent (or \$29.0m) from \$340.7 million. The increase in liabilities is largely attributed to the increase in unearned premium provision (by \$15.7m), however this was partially offset by the decrease in outstanding claims provision (by \$6.0m). Unearned premium provision continued to

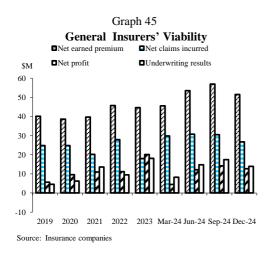

dominate the total liabilities of general

insurers at 39.0 percent, followed by outstanding claims provision (reported and IBNR) at 31.6 percent and 'other' liabilities at 23.9 percent (Graph 44).

Earnings

After-tax profits of general insurers remained marginal in the review quarter, contracting by 10.6 percent (or \$1.5m) to \$12.7 million, compared to \$14.2 million in the prior quarter. The contraction was largely attributed to reduced underwriting results for the quarter by 20.3 percent (or \$3.5m), due mainly to a decline in net earned premiums (Graph 45).

Liquidity

General insurers' core liquid assets (cash and bank deposits) continued to be assessed as strong, further expanding by 5.1 percent (or \$20.2m) to \$413.7 million, compared to \$393.5 million in the previous quarter.

The broad liquidity ratio (incl. Government securities), which measures the ability of general insurers to meet their total liabilities, increased from 111.3 percent to 113.3 percent in the review quarter.

Insurance Broking

Earnings

The consolidated net profit for insurance brokers declined over the quarter to \$1.9 million (September 2024: \$2.2m), due mainly to an increase in expenditure relative to revenue.

Total revenue recorded a 3.8 percent (or \$0.3m) increase over the review quarter and stood at \$8.8 million (September 2024: \$8.5m). This is underpinned by the increase in total brokerage by 5.0 percent (or \$0.4m). Brokerage earned as commission continued to dominate total revenue, representing 95.3 percent.

Total expenses grew over the review quarter by 12.1 percent (or \$0.6m) to \$5.4 million. This was mainly attributed to the increase in 'other expenses' by 25.9 percent (or \$0.7m).

Broking Account

The aggregated insurance brokers' broking account balance substantively fell by 30.0 percent (or \$5.8m) to \$13.5 million over the review quarter, largely attributed to the decrease in monies received compared to the monies withdrawn.

The brokers' total monies received fell by 23.9 percent (or \$22.4m) to \$71.5 million from \$93.9 million in the previous quarter. This was largely underpinned by the decrease in premiums received.

Total monies withdrawn during the quarter decreased by 14.5 percent (or \$13.2m) to \$77.3 million (September 2024: \$90.4m). This was mainly attributed to the decrease in 'payments to or on behalf of unlicensed insurers' by 56.3 percent (or \$15.9m) to \$12.4 million (September 2024: \$28.3m).

Offshore Placements

Insurance brokers consolidated offshore placements expanded by 6.5 percent over the review quarter. Thus, as at 31 December 2024, a total of 291 offshore applications worth \$30.9 million in premiums were approved, as compared to 243 applications at \$29.1 million in the September 2024 quarter.

The RBF approved 41 applications representing 84.6 percent (\$26.2m), whilst the remaining 15.4 percent were approved by the industry at a total of 250 applications worth \$4.8 million.

The material damage and business interruption (MD/BI) class continued to lead the share of premiums remitted offshore at 60.5 percent, followed by 'others' at 18.4 percent and term life at 8.7 percent (Table 4).

Capital Markets Quarterly Performance Report – 31 December 2024

Stock Market

The stock market's key performance indicators of market capitalisation recorded a decline whilst the SPX Total Return Index (STRI), number of trades, and volume and value of shares traded recorded increases. The buy and sell ratio continued to reflect the excess number of listed securities on offer relative to bids.

The market capitalisation of listed securities stood at \$3,658.4 million as at 31 December 2024, a 0.3 percent (or \$10.6m) decrease from the prior quarter. On an annual basis, market capitalisation grew by 9.6 percent (or \$320.8m) from \$3,337.6 million (Graph 46).

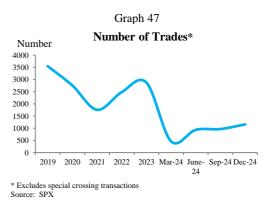

decline The quarterly in market capitalisation was largely attributed to the decrease in the share price of three of the listed five securities. namelv top Amalgamated Telecom Holdings Ltd (ATH) by 6.5 percent, Flour Mills of Fiji Ltd (FMF) by 4.5 percent and R B Patel Group Ltd (RBG) by 1.7 percent. The decrease in share prices of six other listed securities was also noted during the quarter contributing to the decline in market capitalisation, namely Atlantic & Pacific Packaging Ltd Co. (APP). Communications (Fiji) Ltd (CFL), Fiji Television Ltd (FTV), Rice Company of Fiji Ltd (RCF), Port Denarau Marina Ltd (PDM) and Kontiki Finance Ltd (KFL).

The top 5 listed securities composition in terms of the market capitalisation decreased to 67.4 percent as at 31 December 2024. During the review four listed quarter, companies declared/paid dividends and three listed securities reported increased dividend returns, while one listed entity's dividend returns remained consistent with the prior period.

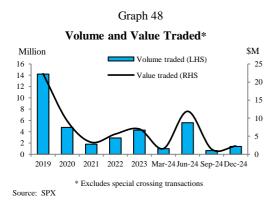

SPX Total Return Index (STRI) increased by 0.3 percent over the quarter to 9,249.49, in line with the increase in dividend and capital returns. On annual basis, the STRI increased by 7.4 percent from 8,611.46.

As at 31 December 2024, the stock market recorded a year-to-date (YTD) average return of 8.87 percent consisting of an average dividend yield of 1.97 percent and capital gain of 6.90 percent.

During the December 2024 quarter, 1,158 trades were executed compared to 968 trades in the preceding quarter (Graph 47).

There was no special crossing transactions conducted over the quarter, therefore the volume and value of shares traded stood at 1.4 million and \$2.3 million, respectively (Graph 48).

The buy to sell ratio improved to 1:18 compared to 1:24 in the previous quarter.

Managed Investment Schemes (MIS) Market

The MIS market's key performance indicators of funds under management, net profit, liquid assets noted strong growth over the quarter while the number of unitholders recorded a decline.

Balance Sheet

Funds under management grew by 6.5 percent (or \$44.2m) to \$724.7 million relative to the 6.9 percent increase in the preceding quarter. The quarterly growth was attributed to the increases in unitholders' funds and fair value reserve by \$33.0 million and \$11.2 million, respectively.

Similarly, on an annual basis, funds under management grew by 25.7 percent (or \$148.2m) from \$576.5 million.

Assets

Total assets of the MIS market grew by 7.0 percent (or \$49.1m) over the quarter to \$745.7 million, largely attributed to the increases in investments (by \$48.9m), cash on hand (\$6.8m) and other assets (by \$1.2m).

The combined investment portfolio of the MIS market expanded by 8.3 percent (or \$48.9m) to \$639.2 million in the review quarter, underpinned by the increases in the following investment categories:

- unlisted securities by \$19.8 million;
- cash and cash equivalents \$19.0 million;
- listed securities by \$10.8 million; and
- property by \$0.2 million.

However, a reduction was noted in bonds by \$0.6 million and loans and receivables by \$0.2 million.

Over the year, the investment portfolio of MISs expanded by 31.7 percent (or \$154.0m).

Investments in listed securities continued to dominate the investment portfolio at 32.7 percent, followed by unlisted securities at 32.1 percent, term deposits at 24.3 percent, bonds at 6.5 percent, loans and receivables at 2.3 and property at 2.1 percent.

Liabilities

Total liabilities increased by 30.5 percent (or \$4.9m) over the quarter to \$21.0 million. This increase was mainly due to the growth in distribution payable (by \$2.4m), other liabilities (by \$1.3m) and sundry creditors (by \$1.2m). Management fee and redemption payable, on the other hand, recorded a marginal decrease.

Liquid Assets

Liquid assets of the MIS market expanded by 11.5 percent (or \$25.8m) over the quarter to \$250.3 million as at 31 December 2024. This increase was underpinned by the growth in term deposits held with financial institutions by \$19.0 million and cash on hand by \$6.8 million. The liquid assets were able to cover 48.0 percent of total unitholders' funds.

Unit repurchases/redemptions increased over the quarter by 25.4 percent to \$13.2 million (units redeemed: 8.7m) when compared to \$10.6 million (units redeemed: 8.1m) in the preceding quarter. Institutional investors continued to record the highest repurchases at 79.5 percent (or \$10.5m), followed by local retail investors at 20.5 percent (or \$2.7m).

The repurchases to unitholders funds ratio grew from 2.2 percent in the preceding quarter to 2.5 percent in the December 2024 quarter.

As a result of the significant increase in repurchases. the liquid assets to repurchases ratio deteriorated from 21.3 times to 18.9 times.

Earnings

The combined net profit of the MIS market for the December 2024 quarter increased by 72.2 percent (or \$1.3m) to \$3.1 million (September 2024: \$1.8m) as a result of an increase in investment income (Table 5).

Table 5 **MIS Combined Income Statement**

| Quarter | Dec-24 | Sep-24 | Dec-23 | % Change | |
|---------------------------|--------|--------|--------|--------------|-------------|
| Performance (\$M) | | | | Over Qtr. | Over Yr. |
| Investment income | 5.0 | 3.6 | 3.3 | 38.9 | 51.5 |
| Investment expense | 1.9 | 1.8 | 1.3 | 5.6 | 46.2 |
| Net operating income | 3.1 | 1.8 | 2.0 | 72.2 | 55.0 |
| Other operating income | - | - | 0.0 | 0.0 | 0.0 |
| Non-investment expense | - | - | 0.0 | 0.0 | 0.0 |
| Income Tax | - | - | 0.0 | 0.0 | 0.0 |
| Net Profit after tax | 3.1 | 1.8 | 2.0 | 72.2 | 55.0 |

The Annualised Return on Investment (AROI) grew over the quarter to 1.9 percent. following the increase in investment income.

The Bond Market

The value of bonds outstanding further increased by 0.8 percent (or \$54.6m) over the quarter to \$6.6 billion (September 2024: \$6.5b), as a result of an additional \$86.5 million bond issuance during the December 2024 quarter (September 2024: \$243.3m), which outweighed the redemptions of \$31.9 million (September 2024: \$83.4m).

Government bonds continued to grow the fixed income market through the issuance of Fiji Infrastructure Bonds (FIB) (by \$74.0m) and Viti Bonds (by \$1.5m). On the other hand, bond redemptions were noted for Fiji Development Loan (FDL) of \$8.9 million and FIB of \$4.0 million.

There was no secondary trading of bonds on the SPX in the review quarter.

Note:

^{1/} The Monetary & Credit Aggregates table is derived from the Central Bank Survey (CBS) (Table 3) and Other Depository Corporations Survey (ODCS) (Table 2).

²⁷ Monetary base is normally referred to as reserve money and its components include currency in circulation, ODCS deposits at the Reserve Bank and other deposits of other financial corporations.

³⁷ As of May 2012, the official definition of broad money has changed to include securities of money issuers. As a result, M3 will now be known as broad money.

Note:

1/ The Statutory Reserve Deposit is derived as 10 percent of commercial banks' deposits and similar liabilities at the end of the

previous month.
 ²⁷ From 1996, demand deposits include funds placed in the Trust Account established for re-financing NBF Asset Management Bank.
 ³⁷ Currency with non-bank public was revised from 2001-October 2015.

⁴⁷ Held outside of the banking system.
 ⁵⁷ Differences, if any, in total assets and liabilities are due to rounding off.

Note:

¹⁷ The values reported in the table include both local and foreign currency denominated assets.

^{2/} The actual Statutory Reserve Deposit held by commercial banks.

^{3/} This includes RBF Notes & Bonds.

^{4/} The previously reported Balance with banks abroad has been separated into either transferable deposits or other deposits.

^{5/} Differences, if any, in total assets and liabilities are due to rounding off.

Note:

¹⁷ Commercial banks liabilities reported in the table include both local and foreign currency denominated liabilities.
 ² Previously reported as Local Government.
 ⁴⁷ Previously reported as Statutory Bodies.
 ⁵⁵ Includes both savings and time deposits.
 ⁶⁶ Includes local bills payable.

⁷¹ Under Norse Keidents, previously reported balance to banks abroad has been separated into transferable and other deposits, while foreign bills payable is classified under others.
⁸² Differences, if any, in total assets and liabilities are due to rounding off.

Note:

¹⁷ As defined under the Section 43 of the RBF Act. Since 1996, when the National Bank of Fiji Restructuring Act became effective, Section 31 exempts the NBF Assets Management Bank from holding Statutory Reserve Deposit and Unimpaired Liquid Asset.

^{2/} Balances at the end of the review month.

^{3/} Refers to the total only and not individual items.

^{4/} Balances of deposits and related liabilities as at the end of the previous month.

Note:

n.i.- no issue n.t. - no trade ^{1/}Represents monthly weighted average rate.

² Prior to October 2006, Minimum Lending Rate (MLR) = Repurchase Facility Rate (Policy Indicator Rate + 100 basis points). From October 2006, MLR = Policy Indicator Rate + 100 basis points and Repurchase Facility Rate = latest weighted average overnight interbank rate + 100 basis points. From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 5 percentage points). From January 2009, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).
