

**HON. TOMASI N. TUNABUNA**  
**Minister for Agriculture and Waterways**

---

Written Question Response

Monday 3<sup>rd</sup> November 2025

---

*(Written question 205/2025) Can the Minister update Parliament with respect to the following: –*

- a) how many farm roads were constructed by division from 2023 to date;*
- b) how many farm roads are expected to be constructed per Division in the current financial year.*

---

The Ministry of Agriculture and Waterways remains committed to enhancing rural infrastructure to support the growth and sustainability of Fiji's agricultural sector. One of the key initiatives under this commitment is the construction of farm roads, which is implemented through the Ministry's **"Farm Access Program"**.

The construction of farm roads is driven by several critical objectives:

- **Enhancing market connectivity:** - many farmers in isolated regions face significant challenges in transporting their produce to markets. These roads provide vital links that reduce travel time and costs, enabling farmers to sell their goods more efficiently.
- **Encouraging farm expansion:** - improved access allows farmers to utilise previously unreachable land, promoting larger-scale farming and diversification of crops.
- **Boosting food security and income generation:** - by facilitating better access to inputs and markets, farm roads contribute to a more resilient and productive agricultural system, especially in rural and maritime communities.

The impact of these farm roads is transformative:

- **Improved livelihoods:** - farmers can now transport produce more reliably, increasing their income and reducing post-harvest losses.
- **Community development:** - better infrastructure fosters economic activity, encourages youth participation in agriculture, and strengthens community resilience.

- **Social inclusion:** - the initiative ensures that even the most remote communities are not left behind, aligning with the government's broader goals of equitable development.
- **Increase volume of agricultural production:** - farm roads significantly boost agricultural production by improving access to markets, reducing transportation costs, and enabling timely delivery of inputs and harvests.

A total of **73 farm roads** have been constructed from **2023 to date (Annex 1)**, reflecting the Ministry's continued commitment to improving rural infrastructure and supporting agricultural development.

During the **2023-2024 financial year**:

- **11 farm roads** have been successfully constructed across the Central Division, covering a combined distance of **16.3 kilometers**. This has directly benefited **314 households**.
- **14 farm roads** have been successfully constructed across the Western Division, covering a combined distance of **35.5 kilometers**, benefiting **1,030 households**.
- **2 farm roads** were successfully constructed in the Northern Division, covering a combined distance of **10.5 kilometers**, benefiting **105 households**.
- **3 farm roads** were successfully constructed in the Eastern Division, covering a combined distance of **67 kilometers**, benefiting **118 households**.

In the **2024-2025 financial year**:

- **25 farm roads** have been successfully constructed across the Central Division, covering a combined distance of **45.9 kilometers**, benefiting **405 households**.
- **11 farm roads** have been successfully constructed across the Western Division, covering a combined distance of **47.5 kilometers**, benefiting **433 households**.
- **3 farm roads** have been successfully constructed across the Northern Division, covering a combined distance of **9.5 kilometers**, benefiting **109 households**.
- **4 farm roads** have been successfully constructed across the Eastern Division, covering a combined distance of **8.9 kilometers**, benefiting **121 households**.

These developments represent a strategic investment in enhancing access to farms, facilitating transportation of produce, and strengthening the agricultural sector across all regions.

A total of **thirteen (13) farm roads** are scheduled for construction during the **2025-2026 financial year**. Of these:

- 7 farm roads will be developed in the Central Division;
- 4 in the Western Division;
- 1 in the Northern Division; and
- 1 in the Eastern Division.

Although the Ministry of Agriculture and Waterways has demonstrated commendable commitment to supporting rural farmers through the construction of farm roads, several persistent challenges threaten the timely and effective implementation of this initiative:

- The lengthy tender process often delays the commencement of projects, pushing construction timelines beyond optimal periods.
- Compounding this issue is the financial year, which begins in August, resulting in actual roadwork starting around November – coinciding with the rainy season, when construction becomes more difficult and costly.
- Additionally, service providers are frequently contracted by multiple ministries within the same financial year, leading to resource strain and scheduling conflicts.

These hurdles are further exacerbated by limited budget allocations, which restrict the scope and quality of road development, ultimately impacting farmers' access to market and essential services.

In conclusion, the construction of farm roads under the Farm Access Program is a cornerstone of the Ministry of Agriculture and Waterways development strategy. It reflects the Ministry's unwavering commitment to empowering farmers, enhancing food security, and building a prosperous Fiji.

Thank You.
